Clover Adams Natalie Dykstra, 2012-02-08 A biography of one of the Gilded Age's most fascinating and mysterious society women that reads as well as any page turning novel Library Journal At twenty eight Clover Adams a fiercely intelligent Boston Brahmin married the soon to be eminent American historian Henry Adams She thrived in her role as an intimate of power brokers in Gilded Age Washington where she was admired for her wit and taste by such luminaries as Henry James H H Richardson and General William Tecumseh Sherman Clover so clearly possessed as one friend wrote all she wanted all this world could give Yet at the center of her story is a haunting mystery Why did Clover having begun in the spring of 1883 to capture her world vividly through photography end

her life less than three years later by drinking a chemical developer she used in the darkroom The key to the mystery lies as Natalie Dykstra s searching account makes clear in Clover s photographs themselves The aftermath of Clover s death is equally compelling Dykstra probes Clover s enduring reputation as a woman betrayed and most movingly she untangles the complex poignant and universal truths of her shining and impossible marriage

Migration and Integration in Singapore Yap Mui Teng,Gillian Koh,Debbie Soon,2014-10-30 Between 2000 and 2010 Singapore witnessed a huge influx of foreign migrants The proportion of permanent residents in the total population increased from 7% to 11% while the share of non resident foreigners has risen from 19% to 25% This was as much the result of the spontaneous movement of labour to economic opportunities as it was of active policy direction by the Singapore government The social impact both beneficial and disruptive of this movement was felt at all levels of society and brought other attending public policy issues to the fore Taking a multi disciplinary approach with a focus on policy and practice this book examines the social economic and political issues that have arisen with the

influx of foreigners in Singapore since the turn of the 21st century Drawing on empirical research it documents the impact of increasing levels of immigration and provides an analysis of the longer term implications of these trends with each chapter covering a different aspect of socio cultural political or economic outcome arising from intercultural contact and adaptation The contributors also provide policy suggestions to ensure Singapore continues to be a harmonious nation and a cosmopolitan and vibrant global city Migration and Integration in Singapore Policies and Practice will appeal to students and scholars of Southeast Asian studies migration and social policy as well as to practitioners and policy makers with an interest in migration in the region

Neutrosophic Sets and Systems, vol. 59/2023 {Special Issue on Symbolic Plithogenic Algebraic Structures} Florentin Smarandache, Mohamed Abdel-Basset, Said Broumi, 2023-09-01 Neutrosophic Sets and Systems has been created for publications on advanced studies in neutrosophy neutrosophic set neutrosophic logic neutrosophic probability neutrosophic statistics that started in 1995 and their applications in any field such as the neutrosophic structures developed in algebra geometry topology etc Neutrosophy is a new branch of philosophy that studies the origin nature and scope of neutralities as well as their interactions with different ideational spectra This theory considers every notion or idea together with its opposite or negation and with their spectrum of neutralities in between them i e notions or ideas supporting neither nor The and ideas together are referred to as Neutrosophy is a generalization of Hegel s dialectics the last one is based on and only According to this theory every idea tends to be neutralized and balanced by and ideas as a state of equilibrium In a classical way are disjoint two by two But since in many cases the borders between notions are vague imprecise Sorites it is possible that and of course have common parts two by two or even all three of them as well Neutrosophic Set and Neutrosophic Logic are generalizations of the fuzzy set and respectively fuzzy logic especially of intuitionistic fuzzy set and respectively intuitionistic fuzzy logic In neutrosophic logic a proposition has a degree of truth T a degree of indeterminacy I and a degree of falsity F where $T \cup I \cup F$ are standard or non standard subsets of $[0, 1]$ Neutrosophic Probability is a generalization of the classical probability and imprecise probability Neutrosophic Statistics is a generalization of the classical statistics What distinguishes the neutrosophics from other fields is the which means neither nor which of course depends on can be indeterminacy neutrality tie game unknown contradiction ignorance imprecision etc

processes form a class of stochastic models with a sizeable scope of applications biology insurance neuroscience networks finance Such processes are defined by a deterministic motion punctuated by random jumps at random times and offer simple yet challenging models to study Nevertheless the issue of statistical estimation of the parameters ruling the jump mechanism is far from trivial Responding to new developments in the field as well as to current research interests and needs Statistical inference for piecewise deterministic Markov processes offers a detailed and comprehensive survey of state of the art results It covers a wide range of general processes as well as applied models The present book also dwells on statistics in the context of Markov chains since piecewise deterministic Markov processes are characterized by an embedded Markov chain corresponding to the position of the process right after the jumps

A Foreign Policy for an Independent Papua New Guinea James Griffin,1974 From the John Holmes Library collection *EMF*D* Dr. Joseph Mercola,2020-02-18 The dangers of electromagnetic fields are real and now a renowned health authority reveals exactly what they are and how you can protect yourself The hazards of electronic pollution may once have been the stuff of science fiction but now we know they are all too real And with the advent of 5G ultra wideband technology the danger is greater than ever Dr Joseph Mercola one of the world's foremost authorities on alternative health has mined the scientific literature to offer a radical new understanding of how electromagnetic fields impact your body and mind In this first of its kind guide he reveals What EMFs electromagnetic fields actually are where you find them in your daily life and how they affect you The toll that EMFs have been proven to take in conditions such as cancer heart disease and neuropsychiatric illnesses Why you've been largely kept in the dark about this threat to your health How you can actually repair the damage done by EMFs at a cellular level Practical strategies to protect yourself and your loved ones from EMFs at home at work and out in the world The coming 5G technology will be pervasive and powerful It will also be one of the largest public health experiments in history with no way of opting out That's why you need to read this book Now

Numerical Methods for Simulation and Optimization of Piecewise Deterministic Markov Processes Benoîte de Saporta,François Dufour,Huiling Zhang,2016-01-26 Mark H A Davis introduced the Piecewise Deterministic Markov Process PDMP class of stochastic hybrid models in an article in 1984 Today it is used to model a variety of complex systems in the fields of engineering economics management sciences biology Internet traffic networks and many more Yet despite this there is very little in the way of literature devoted to the development of numerical methods for PDMPs to solve problems of practical importance or the computational control of PDMPs This book therefore presents a collection of mathematical tools that have been recently developed to tackle such problems It begins by doing so through examples in several application domains such as reliability The second part is devoted to the study and simulation of expectations of functionals of PDMPs Finally the third part introduces the development of numerical techniques for optimal control problems such as stopping and impulse control problems
