Volker Boehme-Neßler, 2020-01-29 This book argues that in the digital era a reinvention of democracy is urgently necessary
It discusses the mounting evidence showing that digitalisation is pushing classical parliamentary democracy to its limits
offering examples such as how living in a filter bubble and debating with political bots is profoundly changing democratic
communication making it more emotional hysterical even and less rational It also explores how classical democracy involves
long slow thinking and decision processes which don't fit to the ever increasing speed of the digital world and examines the
technical developments some fear will lead to governance by algorithms In the digitalised world democracy no longer
functions as it has in the past This does not mean waving goodbye to democracy instead we need to reinvent it How this
could work is the central theme of this book Readers' Guide to Periodical Literature ,1920 **The Correspondence of**
Michael Faraday Michael Faraday, 1991 Almost 75% of the letters in Volume 3 were previously unpublished During this
period 1841-1848 he discovered the magneto-optical effect and diamagnetism allowing him to argue for his views on the

Michael Gehler, Robert Rollinger, 2022-03-10 By applying a comparative approach the volume focuses on a select group of
empires which are generally not in the focus of empire studies They are studied in detail and analyzed due to a strict
concept that takes into account real history and reception history as well Reception history becomes more and more an
important element in empire studies although this topic is still often more or less underdeveloped The volume singles out a
series of such forgotten empires It aims to provide a methodologically clearly structured as well as a uniform and consistent
approach It develops a general set of questions that help to compare and distinguish these entities This way the volume
intends to examine and to illuminate empires that are generally ignored by modern scholarship **International Books in**
Print ,1991 Chinese Character Manipulation in Literature and Divination Anne Kathrin Schmiedl, 2020-04-06 In Chinese
Character Manipulation in Literature and Divination Anne Schmiedl analyses the little studied method of Chinese character
manipulation as found in imperial sources Focusing on one of the most famous and important works on this subject the Zichu
by Zhou Lianggong 1612-1672 Schmiedl traces and discusses the historical development and linguistic properties of this
method This book represents the first thorough study of the Zichu and the reader is invited to explore how on the one hand
the educated elite leveraged character manipulation as a literary play form On the other hand as detailed exhaustively by
Schmiedl practitioners of divination also used and altered the visual phonetic and semantic structure of Chinese characters
