historical and cultural contexts the Space Race the Cold War 1960s psychedelia Chion goes on to locate it within Kubrick's career He then conducts a meticulous and subtle analysis of its structure and style arguing that 2001 is an absolute film a unique assemblage of cinema's elements through which pulses a vision of human existence Animals who know they will die beings lost on earth forever caught between two species not animal enough not cerebral enough In a supplementary chapter Chion argues that Kubrick's last film Eyes Wide Shut 1999 is a return to 2001 a final statement of its concerns And in a series of appendices Chion provides production details an analytic synopsis credits and a consideration of the legacy of 2001
