The First Steps in Numbers Dana Pond Colburn,George Augustus Walter,1857 **My Numbers, My Friends** Paulo Ribenboim,2000-06-09 This selection of expository essays by Paulo Ribenboim should be of interest to mathematicians from all walks Ribenboim a highly praised author of several popular titles writes each essay in a light and humorous language without secrets making them thoroughly accessible to everyone with an interest in numbers This new collection includes essays on Fibonacci numbers prime numbers Bernoulli numbers and historical presentations of the main problems pertaining to elementary number theory such as Kummer s work on Fermat s last theorem **Number and Numbers** Alain Badiou,2018-05-18 The political regime of global capitalism reduces the world to an endless network of numbers within numbers but how many of us really understand what numbers are Without such an understanding how can we challenge the regime of number In *Number and Numbers* Alain Badiou offers an philosophically penetrating account with a powerful political subtext of the attempts that have been made over the last century to define the special status of number Badiou argues that number cannot be defined by the multiform calculative uses to which numbers are put nor is it exhausted by the various species described by number theory Drawing on the mathematical theory of surreal numbers he develops a unified theory of Number as a particular form of being an infinite expanse to which our access remains limited This understanding of Number as being harbours important philosophical truths about the structure of the world in which we live In Badiou s view only by rigorously thinking through Number can philosophy offer us some hope of breaking through the dense and apparently impenetrable capitalist fabric of numerical relations For this will finally allow us to point to that which cannot be numbered the possibility of an event that would deliver us from our unthinking subordination of number **The Ladies' Repository, and Gatherings of the West** ,1843 Hugh MacDiarmid, the Poetry of Self John Baglow,1987 Christopher

Grieve writing under the name of Hugh MacDiarmid was a major modern poet and founder of the Scottish literary Renaissance In this study of his poetry John Baglow eliminates what has been a stumbling block for most MacDiarmid scholars by showing the very real thematic and psychological consistency which underlines MacDiarmid's work He demonstrates the extent to which the work was dominated by a desire to find a faith that could justify his desire to write poetry a desire continually thwarted by a critical intellect which destroyed whatever faith he was able to construct This constant search without a successful conclusion is at the heart of the work of many major modernist writers MacDiarmid's poetry can be seen as embracing this tradition and making it explicit
