becoming a society with an aging population and assesses the tremendous risks and challenges involved. Based on the development of pension security systems around the world, the book studies the status quo and future requirements of the Chinese pension security system from the perspectives of capital service and spirit and puts forwards a three pillar pension security system that is in conformity with China's current situation and reflects the developmental trend that in future social security will likely transform from material security into comprehensive security. In addition, the book analyzes the Chinese pension security system. While integrating international perspectives, its main focus is on statistical analysis combining theory with practice and qualitative with quantitative analysis. As such, the book not only offers a window for the world on the status and evolution of China's pension security system but also an opportunity for international academic dialogues.

Human-in-the-loop System Design and Control Adaptation for Behavior-Assistant Robots Yuquan Leng, Ningbo Yu, Bi Zhang, Benyan Huo, Xu Jin, 2024-06-03. With the progress and development of human robot systems, the coordination among humans, robots, and environments has become increasingly sophisticated. In this Research Topic, we focus on an important field in robotics and automation disciplines which is commonly defined as behavior assistant robots. The scope includes but is not limited to: 1. rehabilitation assistive devices such as rigid/soft exoskeletons, prosthetic systems, orthoses, and intelligent wheelchairs; 2. intelligent medical systems such as endoscopic robots, surgical robots, and the navigation systems; 3. industrial application devices such as collaborative manipulators, load bearing exoskeletons, supernumerary robotic limbs; 4. intelligent domestic devices such as mobile robots, elderly care robots, walking aids, robots, and so on. The emergence of robot assisted daily behaviors based on aforementioned devices is gradually becoming part of our social lives which can improve weak motor abilities, enhance physical functionalities, and enable various other benefits.

Healthcare Information Management Systems Charlotte Weaver, Joan Kiel, Marion J. Ball, Judith V. Douglas, Robert I. O'Desky, James W. Albright, 2013-11-11. Addressed to practitioners of healthcare administration, the book looks beyond traditional information systems. This text suggests how information systems can bring a competitive advantage to hospitals and other healthcare providers. Its viewpoint is neither technical nor clinical. Rather, it is concerned with the role and the use of information in the provision of healthcare. The text is divided into several reader friendly units which allows the reader to quickly select only what he wants to study in depth. Divided into two sections, one dealing with support for the private practitioner, the other with managing an institution, the material spans a wide array of types of computers. This provides valuable instructional information for nurses, physicians, and administrators.
