Nurture Assumption:

The Nurture Assumption Judith Rich Harris, 1999 Harris takes on the experts and boldly questions conventional wisdom of parents role in their children s lives asserting that it s not the home environment that shapes children but the environment they share with their peers

The Nurture Assumption Judith Rich Harris, 2009-02-24 This groundbreaking book a Pulitzer Prize finalist and New York Times notable pick rattled the psychological establishment when it was first published in 1998 by claiming that parents have little impact on their children s development In this tenth anniversary edition of The Nurture Assumption Judith Harris has updated material throughout and provided a fresh introduction Combining insights from psychology sociology anthropology primatology and evolutionary biology she explains how and why the tendency of children to take cues from their peers works to their evolutionary advantage This electrifying book explodes many of our unquestioned beliefs about children and parents and gives us a radically new view of childhood

Leading Mind Peter Hey, 2019-02-14 With his blend of engineering and the fields of personal transformation Peter Hey takes us on a deep yet accessible journey into the inner recesses of our minds He presents a unique model of the mind and the mechanisms that define our behavior Based on his own personal experiences as the son of a Holocaust survivor his sessions with his own clients and his background in computer design he brings the concept of programs in our unconscious as the basic mechanism that determines our actions Millions of programs operating below our everyday awareness each of them associated with emotions that in fact are the actual power behind our decisions in daily life Leading Mind explains how these programs are created from all our experiences starting already at conception through our time in the mother s womb all the way to full adulthood It also shows how when accessing our deep unconscious we discover aspects in us that transcend our current physical life Based on thousands and thousands of sessions done by practitioners around the world with remarkably consistent results across cultures education social status and personal beliefs Leading Mind shows how the current events that are impacting our civilization nowadays are the result of our emotional ignorance It brings to light an urgent call to reform our educational curriculum to teach how our mind works and tools for personal transformation and conflict resolution Understanding our minds brings tolerance and compassion for all It gives us the knowledge to change our limiting behaviors The start of real personal power to direct our lives in the direction that is our

authentic individual expression **Steeped in Blood** Frances J. Latchford,2019-08-15 What personal truths reside in biological ties that are absent in adoptive ties And why do we think adoptive and biological ties are essentially different when it comes to understanding who we are At a time when interest in DNA and ancestry is exploding Frances Latchford questions the idea that knowing one s bio genealogy is integral to personal identity or a sense of family and belonging Upending our established values and beliefs about what makes a family **Steeped in Blood** examines the social and political devaluation of adoptive ties It takes readers on an intellectual journey through accepted wisdom about adoption twins kinship and incest and challenges our naturalistic and individualistic assumptions about identity and the biological ties that bind us sometimes violently to our families Latchford exposes how our desire for bio genealogical knowledge understood as it is by family and adoption experts pathologizes adoptees by posing the biological tie as a necessary condition for normal identity formation Rejecting the idea that a love of the self same is fundamental to family bonds her book is a reaction to the wounds families suffer whenever they dare to revel in their difference A rejoinder to rhetoric that defines adoptees adoptive kin and their family intimacies as inferior and inauthentic **Steeped in Blood** s view through the lens of critical adoption studies decentres our cultural obsession with the biological family imaginary and makes real the possibility of being family in the absence of blood **Teen Spirit** Paul Howe,2020-11-15 **Teen Spirit** offers a novel and provocative perspective on how we came to be living in an age of political immaturity and social turmoil Award winning author Paul Howe argues it s because a teenage mentality has slowly gripped the adult world Howe contends that many features of how we live today some regrettable others beneficial can be traced to the emergence of a more defined adolescent stage of life in the early twentieth century when young people started spending their formative developmental years with peers particularly in formal school settings He shows how adolescent qualities have slowly seeped upward where they have gradually reshaped the norms and habits of adulthood The effects over the long haul Howe contends have been profound in both the private realm and in the public arena of political economic and social interaction Our teenage traits remain part of us as we move into adulthood so much so that some now need instruction manuals for adulting **Teen Spirit** challenges our assumptions about the boundaries between adolescence and adulthood Yet despite a cultural system that seems to be built on the ethos of Generation Me it s not all bad In fact there has been an equally impressive rise in creativity diversity and tolerance within society all traits stemming from core components of the adolescent character Howe s bold and suggestive approach to analyzing the teen in all of us helps make sense of the impulsivity driving society and encourages us to think anew about civic reengagement **The Groupness Factor - How to Achieve a Corporate Success Culture Through First-Class Leadership** Charlie Lang,2006-06-07 **The Groupness Factor** is a useful guide for any leader who wants to become more influential and create outstanding business results through attraction and retention of top talent and high employee engagement In his quest for innovative and effective leadership methods executive coach Charlie Lang came across an age old almost unknown concept the groupness factor

which accounts for some of the complexities of group behavior By carefully examining the principles behind this factor Lang discovered that a leader could get his team to want what he wants by being aware of this powerful factor and how it can be controlled This book describes the evolutionary background of the groupness factor and how it still exists in today s modern society With real life examples and anecdotes from his coaching practice the author provides a practical approach to first class leadership and a corporate success culture

Revisiting Psychology Jared M. Bartels, William E Herman, 2018-11-16 This textbook presents overviews of 12 landmark studies in psychology from diverse areas of research such as consciousness developmental psychology learning memory social psychology and psychopathology Through a range of critical thinking exercises and reflective questions students can evaluate the methodology and impact of these classic studies and quickly hone their analytical and critical thinking skills Accessible clearly structured and written with undergraduate students in mind this book will make essential reading for any psychology course

The Public Family David Herring, 2010-11-23 Those concerned with investigating the political functions of the family far too often identify only one the production of good democratic citizens As a result public discussion of family law and policy has been confined to a narrow continuum that ignores the family s other often subversive political functions In *The Public Family* David Herring s goal is to create a new rhetoric that moves beyond the stalemate that often results from the war between advocates of parental rights and those of children s rights This rhetoric of associational respect allows him to constructively address the role of rights and the limits of individualism in political and legal theory While acknowledging the family s importance in facilitating state functioning and power in a large pluralistic democracy the aforementioned production of good citizens Herring fully explores the ways in which the family produces diversity and promotes tolerance Unlike other works on the subject which view the differences between individuals as constituting the central challenge for American society Herring focuses on the importance of such differences In doing so he enriches and enlivens the often divisive public discussion of family law and policy

Evolution of Morals Carlos Stegmann, 2021-06-02 Carlos Stegmann is a civil engineer whose disposition always led him to have a main interest in the multidisciplinary overview of large and complex planning studies a subject on which he accumulated a 40 year experience having acted as coordinator of many such studies It was this disposition this innate tendency always to strive for the composite whole and the application of his experience to the subject of morals which originated the interdisciplinary insights of his thesis of moral evolution which is the subject of this book It is important to stress this interdisciplinary experience for to be able to produce credible results an attempt to explain something as pervadingly inclusive as human behavior must include all the manifestations of this behavior from the cognitive to the physiological No other work on human morals offers such an interdisciplinary approach and the inquiry presented in this book may be considered the first of this kind

Freaks, Geeks, and Cool Kids Murray Milner Jr., 2013-04-15 In this timely and insightful book award winning sociologist Murray Milner tries to understand why teenagers behave the way they do Drawing upon two years of intensive

fieldwork in one high school and 300 written interviews about high schools across the country he argues that consumer culture has greatly impacted the way our youth relate to one another and understand themselves and society He also suggests that the status systems in high schools are in and of themselves an important contributing factor to the creation and maintenance of consumer capitalism explaining the importance of designer jeans and designer drugs in an effort to be the coolest kid in the class

Musical Prodigies Gary E. McPherson, 2016-11-17 Child prodigies have been observed in a range of disciplines particularly music mathematics chess and art The question of what makes a prodigy has long been controversial Some have dismissed the notion of giftedness arguing that most famous prodigies had strong parental cultural and environmental influences that helped them develop their extraordinary abilities One recent theory suggested that anyone could achieve outstanding success in whatever endeavour they wanted with a minimum of 10 000 hours of practice Nevertheless many studies of prodigies have suggested that there might be strong underlying cognitive differences regarding their use of short term versus long term memory spatial memory imagery and language Whatever the arguments for those interested in child development prodigies remain a fascinating subject of study when considering questions about creativity intelligence development and the impact of nature versus nurture This book breaks new ground in presenting the first scientific exploration on the topic of musical prodigies It brings together research from a range of disciplines including psychology neurobiology and genetics to provide a thorough exploration of prodigious talent In addition the book includes fascinating case studies of prodigies and also looks at their long term development into adulthood many child prodigies have had problems making the transition into adolescence and adulthood Musical prodigies will be required reading for anyone interested in child development music and the arts

On Being Moved Stein Bråten, 2007-01-01 In this collective volume the origins neurosocial support and therapeutic implications of pre verbal intersubjectivity are examined with a focus on implications of the discovery of mirror neurons Entailing a paradigmatic revolution in the intersection of developmental social and neural sciences two radical turnabouts are entailed First no longer can be upheld as valid Cartesian and Leibnizian assumptions about monadic subjects with disembodied minds without windows to each other except as mediated by culture Supported by a mirror system specified in this volume by some of the discoverers modes of participant perception have now been identified which entail embodied simulation and co movements with others in felt immediacy Second no longer can be retained the Piagetian attribution of infant egocentricity Pioneers who have broken new research grounds in the study of newborns protoconversation and early speech perception document in the present volume infant capacity for interpersonal communion empathic identification and learning by altercentric participation Pertinent new findings and results are presented on these topics i Origins and multiple layers of intersubjectivity and empathy ii Neurosocial support of pre verbal intersubjectivity participant perception and simulation of mind iii From preverbal sharing and early speech perception to meaning acquisition and verbal intersubjectivity iv New windows on other centred movements and moments of meeting in

therapy and intervention Series B **50 Great Myths of Popular Psychology** Scott O. Lilienfeld, Steven Jay Lynn, John Ruscio, Barry L. Beyerstein, 2011-09-15 50 Great Myths of Popular Psychology uses popular myths as a vehicle for helping students and laypersons to distinguish science from pseudoscience Uses common myths as a vehicle for exploring how to distinguish factual from fictional claims in popular psychology Explores topics that readers will relate to but often misunderstand such as opposites attract people use only 10% of their brains and handwriting reveals your personality Provides a mythbusting kit for evaluating folk psychology claims in everyday life Teaches essential critical thinking skills through detailed discussions of each myth Includes over 200 additional psychological myths for readers to explore Contains an Appendix of useful Web Sites for examining psychological myths Features a postscript of remarkable psychological findings that sound like myths but that are true Engaging and accessible writing style that appeals to students and lay readers alike *Family Constellations* Damian Janus, 2022-02-16 Based on the knowledge derived from family constellations a therapeutic method developed by Bert Hellinger Janus investigates other psychotherapeutic approaches and introduces a new perspective on human behavior Janus addresses debated issues like nature versus nurture the role of unconscious factors in shaping behavior and the structure of the conscience arguing that family constellations offer new understandings for the fields of psychotherapy psychology anthropology and religious studies **The Case Against Free Will** David Lieberman, 2016-01-26 Do judges decisions depend on how long it is since they ate their lunch Is the best place for a woman to seduce a man on a rickety bridge Does free will really exist This book explores how our genes and experiences determine our behaviour as well as discussing the implications determinism may have on personal responsibility and morality

Parenting and the Child's World John G. Borkowski, Sharon Landesma Ramey, Marie Bristol-Power, 2001-10-01 Stimulated by the publication of *The Nurture Assumption* by Judith Rich Harris Parenting and the Child's World was conceived around the notion that there are multiple sources of influence on children's development including parenting behavior family resources genetic and other biological factors as well as social influences from peers teachers and the community at large The text's 39 contributors search for when where and how parenting matters and the major antecedents and moderators of effective parenting The chapters focus on the major conceptual issues and empirical approaches that underlie our understanding of the importance of parenting for child development in academic socio emotional and risk taking domains Additional goals are to show how culture and parenting are interwoven to chart future research directions and to help parents and professionals understand the implications of major research findings **Delinquency in Society** Regoli, John D. Hewitt, Matt DeLisi, 2016-08-15 Delinquency in Society Tenth Edition provides a comprehensive and systematic overview of juvenile delinquency criminal behavior and status offending youths **No Two Alike** Judith Rich Harris, 2010-02-15 A display of scientific courage and imagination William Saletan New York Times Book Review Why do people even identical twins reared in the same home differ so much in personality Armed with an inquiring mind and insights

from evolutionary psychology Judith Rich Harris sets out to solve the mystery of human individuality The Genius in All of Us David Shenk, 2011-03-08 Fresh insights into the nature of exceptional performance A deeply interesting and important book New York Times Book Review that offers a revolutionary and life changing message on the new science of human potential Is true greatness obtainable from everyday means and everyday genes Conventional wisdom says no that a lucky few are simply born with certain gifts Now you can forget everything you think you know about genes talent and intelligence and take a look at the amazing new evidence Here interweaving cutting edge research from numerous scientific fields David Shenk offers a new view of human potential giving readers more of a sense of ownership over their accomplishments and freeing parents from the bonds of genetic determinism As Shenk points out our genes are not a blueprint that dictate individual destinies Rather we are all the product of interplay between genes and outside stimuli a dynamic that we can influence It is a revolutionary and life changing message
