The presentation is organized around 3 aspects of nutrition: basic facts, nutrient functions and utilization, and nutrition throughout the life cycle. Some of the specific topics covered include the food groups, eating patterns, digestion and absorption, and weight control. Nutrition care is discussed within the framework of the nursing process and includes nutrition assessment, diagnosis, and nutrition support. The objectives, rationales, and results of dietary management are examined. The nurse's roles are defined and the nurse's relationships to the dietitian and health care team are explored. Learning objectives, case histories, charts, and tables provide further educational support.
