Ourselves and Other Animals Harcourt Education,1996-01-01 **Animals and Women** Carol J. Adams,Josephine Donovan,1995-11-14 *Animals and Women* is a collection of pioneering essays that explores the theoretical connections between feminism and animal defense Offering a feminist perspective on the status of animals this unique volume argues persuasively that both the social construction and oppressions of women are inextricably connected to the ways in which we comprehend and abuse other species Furthermore it demonstrates that such a focus does not distract from the struggle for women's rights but rather contributes to it This wide ranging multidisciplinary anthology presents original material from scholars in a variety of fields as well as a rare early article by Virginia Woolf Exploring the leading edge of the species gender boundary it addresses such issues as the relationship between abortion rights and animal rights the connection between woman battering and animal abuse and the speciesist basis for much sexist language Also considered are the ways in which animals have been regarded by science literature and the environmentalist movement A striking meditation on women and wolves is presented as is an examination of sexual harassment and the taxonomy of hunters and hunting Finally this compelling collection suggests that the subordination and degradation of women is a prototype for other forms of abuse and that to deny this connection is to participate in the continued mistreatment of animals and women *Ourselves and Other Animals* ,1997 The Oxford Handbook of Animal Ethics Tom L. Beauchamp,R.G. Frey,2011-11-17 This text is designed to

capture the nature of the questions as they stand today and to propose solutions to many of the major problems in the ethics of how we use animals

The Human Animal Markus Gabriel, 2024-11-13 The climate crisis has forced us to recognize that we are not separate from nature but are part of the natural world on which we depend human beings are animals and we must understand much better our place in nature and our impact on our environment if we are to avoid our own annihilation as a species And yet we feel nevertheless that we do not entirely fit into nature that we stand apart from other animals in some way in what way exactly Markus Gabriel argues that what distinguishes humans from other animals is that humans are minded living beings who seek to understand the world and themselves and who possess ethical insight into moral contexts Mind is the capacity to lead one's life in the light of a conception of who or what one is The undeniable difference between us and other animals defines the human condition and places a special responsibility on us to consider our actions in the context of other living beings and our shared habitat It also calls on us to cultivate an ethics of not knowing to recognize that however much we may seek to understand the world we will never completely master it Our grasp of reality mediated by our animal minds will always be limited much is and will remain alien to us lending itself only to speculation and to remember this is to stand us in better stead for carving out an existence among the environmental crisis that looms before us all

What are the Animals to Us? David Aftandilian, 2007 In What Are the Animals to Us scholars from a wide variety of academic disciplines explore the diverse meanings of animals in science religion folklore literature and art

Ourselves and Other Animals, 1996

Understanding Nature Hub Zwart, 2008-01-29 This summons clearly resonates with the archetypal image associated with water as a basic element discussed in Chapter 2 water as the element of freedom of mobility of widening one's horizon Although Nietzsche himself refrained from doing what he summoned others to do scientists like Darwin and novelists like Melville actually went to sea Darwin although regarded by Nietzsche as an arid and mediocre mind exposed himself to the experience of a long term trans oceanic voyage in the course of which he did discover new worlds new justifications new moral watchwords even struggle for life that were to have a tremendous impact on science philosophy and even culture at large Other perspectives are present in Moby Dick as well such as the theologian's one depicting the whale as the biblical Leviathan and the ocean as that part of the world where the great flood never abated Indeed the interpretation of marine phenomena in Biblical terms is more or less omnipresent in the novel and also resounds in the views and language of the philosophical sailor and story teller Ishmael But what about the novelist's whale Actually there is not one novelist's whale Ishmael the narrator unmistakably sides with the whaler's point of view but Melville the author is interested in and tries to do justice to a plurality of voices

Other Animals in Twenty-First Century Fiction Catherine Parry, 2017-07-19 This book is about ordinary animals and how they are imagined in twenty first century fiction Examining contemporary animal representations and the fraught and potent distinctions humans fashion between themselves and all other animals it asks how a range of novels make re make or unmake traditional conceptions of the creatures we love admire eat vilify and abuse Other Animals detailed readings of horses an animalised human a donkey ants chickens and chimpanzees develop new critical practices in Literary Animal Studies They explore the connections between fictional animal representation narrative form ethics and the lives and warm bodies of the real world creatures that precede and exceed our imagination Human animal relationships are conditioned by our imaginative shapings of other animals and by our sense of distinction from them and Other Animals opens out how fictional animal forms and tropes respond to participate in or challenge the ways animals lives are lived out in consequence of human imaginings of them **Our Dogs, Our Selves** , 2016-09-12 The ubiquity of references to dogs in medieval and early modern texts and images must at some level reflect their actual presence in those worlds yet scholarly consideration of this material is rare and scattered across diverse sources This volume addresses that gap bringing together fifteen essays that examine the appearance meaning and significance of dogs in painting sculpture manuscripts literature and legal records of the period reaching beyond Europe to include cultural material from medieval Japan and Islam While primarily art historical in focus the authors approach the subject from a range of disciplines and with varying methodology that ultimately reveals as much about
