Listening, Religion, and Democracy in Contemporary Boston William W. Young III, 2018-11-01 This book is a study of religious practices of listening in the Boston area Through ethnographic study of a variety of religious communities with an extensive focus on Quaker listening it argues that religious practice shapes our habits of listening by creating a plurality of regimes of listening across Boston's landscape These practices moreover cultivate specific dispositions as well as distinct

patterns of religious and democratic virtues Through these dispositions and virtues religious listening facilitates a diverse range of forms of democratic engagement and varied contributions to the pursuit of social justice William Young provides an innovative interpretation of these religious practices It argues that insofar as religious listening helps practitioners to extend and amplify their listening and makes them more responsive to their communities it creates a social mode of embodied receptivity and agency Through both their listening and their actions these groups express their conceptions of divinity embodying divine attributes and activity within the sociopolitical realm serving as God's ears within the world It is by interpreting their practices as creating modes of social discipline reception and agency that the book explicates the full significance of religious listening in its adaptations and extensions of our aural capacities and their implications for sociopolitical life
