Morality and Legality of Secession Pau Bossacoma Busquets, 2019-11-19 This book explores secession from three normative disciplines political philosophy international law and constitutional law The author first develops a moral theory of secession based on a hypothetical multinational contract Under this contract theory injustices do not determine the existence of a right to secede but the requirements to exercise it The book's second part then argues that international law is more inclined to accept and advance a remedial right approach to secession Therefore justice as multinational fairness is to be fully institutionalized under the constitutional law of liberal democracies The final part proposes constitutionalizing a qualified right to secede with the aim of fostering recognition and accommodation of national pluralism as well as cooperation and compromise between majority and minority nations

Before Boas Han F. Vermeulen, 2015-07 The history of anthropology has been written from multiple viewpoints often from perspectives of gender nationality theory or politics Before Boas delves deeper into issues concerning anthropology's academic origins to present a groundbreaking study that reveals how ethnography and ethnology originated during the eighteenth rather than the nineteenth century developing parallel to anthropology or the natural history of man Han F. Vermeulen explores primary and secondary sources from Russia Germany Austria the United States the Netherlands Hungary the Czech Republic Slovakia France and Great Britain in tracing how ethnography originated as field research by German speaking historians and naturalists in Siberia Russia during the 1730s and 1740s was generalized as ethnology by scholars in Göttingen Germany and Vienna Austria during the 1770s and 1780s and was subsequently adopted by researchers in other countries Before Boas argues that anthropology and ethnology were separate sciences during the Age of Reason studying racial and ethnic diversity respectively Ethnography

and ethnology focused not on other cultures but on all peoples of all eras Following G W Leibniz researchers in these fields categorized peoples primarily according to their languages Franz Boas professionalized the holistic study of anthropology from the 1880s into the twentieth century *Peoples and International Law* James Summers, 2007-08-13 Peoples and International Law is the most comprehensive current account of the right of self determination in international law The book examines the law of self determination as the product of the interaction between nationalism and international law This broad and interdisciplinary work charts this interaction through different aspects of the legal process in international instruments judicial decisions legal obligations and historical context critically and in extensive detail The book is essential reading for those with an interest both in peoples rights in international law and the study of nationalism The Nation, 1866
