A People Betrayed Alfred Döblin,1983 Set in Berlin after Germany's defeat in World War I Doblin makes vividly real the public and private dramas of a nation on the brink of revolution He brings to life a fascinating cast of characters that includes both the makers of history and the historically anonymous **The silent morning** Trudi Tate,Kate Kennedy,2016-01-04

This is the first book to study the cultural impact of the Armistice of 11 November 1918 It contains 14 new essays from scholars working in literature music art history and military history The Armistice brought hopes for a better future as well as sadness disappointment and rage Many people in all the combatant nations asked hard questions about the purpose of the war These questions are explored in complex and nuanced ways in the literature music and art of the period This book revisits the silence of the Armistice and asks how its effect was to echo into the following decades The essays are genuinely interdisciplinary and are written in a clear accessible style *Weimar on the Pacific* Ehrhard Bahr,2008-08-08 In the 1930s and 40s LA became a cultural sanctuary for a distinguished group of German artists and intellectuals including Thomas Mann Theodor W Adorno Bertolt Brecht Fritz Lang and Arnold Schoenberg who were fleeing Nazi Germany This book is the first to examine their work and lives **The Critical Reception of Alfred Döblin's Major Novels** Wulf Köpke,2003 The first thorough study in English of the reception of Döblin's novels written by one of the foremost Döblin scholars Alfred Döblin 1878-1957 is one of the major German writers of the twentieth century His experimental ever changing avant garde style kept both readers and critics off guard and although he won the acclaim of critics and had a clear impact on German writers after the Second World War Günter Grass called him my teacher he is still largely unknown to the reading public and under researched by literary scholars He was a prolific writer with thirteen novels alongside a great many other shorter fiction works and non-fiction writings to his credit and yet paradoxically he is known to a larger public as the author of only one book the 1929 novel *Berlin Alexanderplatz* which sold more copies in the first weeks of publication than all his previous novels combined *Alexanderplatz* is known for its depiction of the criminal underground of Berlin and a montage and stream of consciousness technique comparable to James Joyce's *Ulysses* it became one of the best known big city novels of the century and has remained Döblin's one enduring popular success Döblin was forced into exile in 1933 and the works he wrote in exile were neglected by critics for decades Now epic works like *Amazonas* *November 1918* and *Hamlet Oder die lange Nacht nimmt ein Ende* are finding a fairer critical evaluation Wulf Köpke tackles the paradox of Döblin the leading but neglected avant gardist by analysis of contemporary and later criticism both journalistic and academic always taking into account the historical context in which it appeared Wulf Köpke is Professor Emeritus at Texas A M University The Image of the Soldier in German Culture, 1871-1933 Paul Fox,2017-12-14 This study examines the force of tradition in conservative German visual culture exploring thematic continuities in the post conflict representation of battlefield identities from the Franco Prussian

War in 1870 71 to the demise of the Weimar Republic in 1933 Using over 40 representative images sampled from both high and popular culture Paul Fox discusses complex and interdependent visual responses to a wide spectrum of historical events spanning world war regional conflict internal security operations and border skirmishes The book demonstrates how all the artists illustrators and photographers whose work is addressed here were motivated to affirm German moral superiority on the battlefield They produced images that advanced dominant notions of how the ideal German man should behave when at war even when the outcome was defeat Their construction of an imagined martial masculinity based on aggressive moral superiority became so deeply rooted in German culture that it eventually provided the basis for a programmatic imagining of how Germany might again recover its standing as a great military power in Central Europe in the wake of defeat in 1918 The Image of the Soldier in German Culture 1871 1933 is an important volume for any historian interested cultural history the representation of armed conflict in European culture the history of modern Germany the Franco Prussian War and the First World War

Why the Church? Hans Joas, 2024-10-01 Why did Christianity produce the special organizational form church in the first place Is it possible to be a Christian without the church To what extent is Christian faith in community with other believers an alternative to the mere self optimization of individuals In this accessible and questioning new work Hans Joas traverses theological church historical sociological and ethical territory in search of a viable conception of the church adequate to contemporary globalized societies Across eleven essays that draw on work by Ernst Troeltsch Max Weber Emile Durkheim H Richard Niebuhr Leszek Kolakowski and others Joas reflects on key debates from the failure of so called secularization theory to explain religiosity in modern society to the role of Christianity and the church in relation to rampant nationalism and refugee crises and to the question of whether or not human dignity ever was or still is the highest value in the West Addressing the sociology of the church as the distinctive communal formation of Christianity for the last two millennia Joas underscores the need for Christian conceptions of church to balance theological sensibility with concrete sociological grounding In the process he considers the relation of a community of faith to contemporary ideas about the optimization of life

Visual Conflicts Paul Fox, Gil Paternak, 2020-05-15 This collection of essays explores ways in which visual cultures have engaged with armed conflict and politically motivated acts of violence of all types It works out of analytical frameworks developed in the fields of Art History and Visual Culture in order to address the politics of representing conflict within and beyond these disciplines The contributors seek to extend perceived well established academic approaches to thinking about visual production in the context of war conflict and militarism through a study of various themes including historiography subjectivity biography narrative construction commemoration identity and memory formation Each author considers how visual representations of conflict shape the meanings of politically significant events of specific social formations of subject positions and enacted roles The volume investigates a set of representational regimes in visual media including print making painting photography and digital imaging and the use to which they have been put to
