Organizational Change in Police Departments John DeCarlo, Michael J. Jenkins, 2015-08-25 This Brief examines the role of Police Unions in law enforcement policy development. It provides an overview of the historical and political background of police labor unions and takes a critical look at the shifting perception of labor unions from generally positive to somewhat negative to compare this perception with their real impact. It examines the perceived role that unions play, whether positive, negative, or neutral, in the development and advancement of contemporary law enforcement agencies and their respective policies. This work provides a multisite survey of police administrators' views and opinions on police union impact on a variety of police functions, including delivery of services, prevention of crime and disorder, and interaction with the public. The results of this research provide a comprehensive look at ways to improve the ways police departments operate and how they improve and enhance legitimacy in their communities. It provides a context for the current state of the public sector labor relations environment. It will be of interest to researchers in criminology and criminal justice, police science, and public policy.

Critical Issues in Police Labor Relations International Association of Chiefs of Police, 1977 Police Unions and the Reform Movement Ron DeLord, Ron York, 2023-01-05 The authors have more than 100 years of collective experience in assisting police unions. It all seemed so simple and formulaic: A social movement that had been lingering for decades reached a tipping point, and unions now had their greatest challenge ever. The last 5 years have seen what unions would describe as apocalyptic demands for reforms. Union leaders ranted about a war on the police, the end of the profession, and increasing hostility towards the police by the liberal media and politicians. Unions must change the way they do business if they want to survive. This book identifies the who, what, and why of the reform movement, how to mount an effective political campaign, the complexities of an effective message, and the reasons police union leaders succeed and fail. This book is divided into five primary parts, each of which explores a police profession under attack from reform activists, left-leaning media, politically correct chiefs, and weak mayors and councils afraid to push back against unrealistic and overreaching demands for reforms. Part I focuses on viewing reform as a social movement. Part II examines the battle between unions and reform activists. Part III unravels the mysterious world of police unions. Part IV predicts the future of the reform movement and police unions in light of the struggle taking place nationwide, and finally, Part V are case studies, perspectives, and predictions from contributing authors who are on the front lines of the police labor movement in the U.S. and Australia. By following the superb analysis and creative ideas in this book, police union leaders, police management, law enforcement personnel, criminal justice professors, and policymakers will see a path to reaching an accord on reform and advancing the police profession. **What is the Future of Police Management-employee Relations in California by the Year 2000** Lewis J. Pollack, California. Commission on Peace Officer Standards and Training. Command College, 1988 This study examined the history of the police labor movement using the 1987 League of California Cities Benchmark Survey to determine how police jurisdictions are represented today. The study used a cross section of professionals to assist in developing trends and events that impact on

the issue of police labor relations in California Three future scenarios were constructed using information from a cross impact analysis to show possible alternatives if certain trends and events occurred The first and most promising strategy involved development of a state school of labor relations The second dealt with creation within police jurisdiction of a labor management committee to provide a framework in which labor and management would work cooperatively to discuss and resolve day to day issues Finally a strategic plan would be implemented to transform the concept of a labor management committee into reality within police jurisdiction

Police Personnel Administration William J. Bopp, 1974 The operational environment of police personnel administration the personnel function manpower development internal affairs and police labor relations are discussed A historical overview of police personnel administration a review of police organization and a discussion of the role of the police officer provide a foundation for this work Introductions to personnel administration in a police department in a municipal personnel agency and in the federal government are also given An analysis of interrelated aspects of compensation administration and conditions of employment is provided as well Such topics as recruitment selection training personnel evaluation leadership and promotion are included and issues in internal affairs such as communication interpersonal behavior and disciplinary actions are discussed Featured in the discussion of labor relations in law enforcement are such factors as employee organization collective bargaining job actions grievance machinery and the role of the police management in labor relations
