Entrepreneur's Guide to Writing Business Plans and Proposals K. Dennis Chambers, 2007-12-30 Entrepreneurs and entrepreneurial companies live or die by the quality of their plans and proposals Whether it's to get funding for a new product line or business from a client writing hard hitting prose that answers essential questions and makes specific requests is an indispensable skill Entrepreneur ad man and writing teacher Dennis Chambers shows how entrepreneurs can persuade people through skillful writing to pony up capital or contracts This ability which can be learned is rare in today's media saturated world But it counts more than ever if an entrepreneur wants to make it over the magical five year hump and on into lasting business success Numerous examples and exercises ensure that entrepreneurs understand how the writing game is played and that they play it well Unfortunately most don't play this game well Most business writers mistakenly believe their

task is to inform. They write to fill an information gap or to update the reader on a particular project. Or they write about what's important to them. What these writers do not take into account is that the speed of today's work world has reached overdrive. The typical reader simply doesn't have time to ponder dense poorly organized information and intuit the appropriate action. And readers don't give a hoot about what's important to the writer; they want to know what's in it for themselves. Business writers need to use all the tools at their command to persuade, inspire action, and in general move a project forward. This book is about how to be persuasive in two key skills in business writing: proposals and writing business plans. Step by step, Dennis Chambers illustrates the techniques of effective business writing with numerous examples throughout. Whether the objective is to secure financing from an investor, lay out a marketing strategy, or secure a large contract, getting results requires crafting an effective structure for the proposal and using words that sell. Chambers is an able guide in saving entrepreneurs time and undue effort while reaching the goal of long-term business success. *Eclectic Magazine* John Holmes Agnew, Walter Hilliard Bidwell, 1875

Your Writing Well Bob Davis, Dr. Dr. Bob Davis, 2012-10-23

Fifteen essays for anyone in any profession or academic level. *Your Writing Well* studies every aspect of the writing process, providing faster means to better products than do narrowly focused trade handbooks and academic texts. Having combed through writing pedagogy and cut through nonsense about composition and grammar, Dr. Davis provides an all-inclusive set of theory highlighting logic-based skills and practical strategies to create, develop, defend, and communicate coherently organized, well-expressed thoughts. Not marketed for dummies, *Your Writing Well* assumes readers have the smarts to follow mature common-sense guidance, grasp examples, and thus compensate for their existing lack of knowledge of what to do, how and why to do it, and where. Informed, not by needless prohibitions, but by relaxed, reassuring balances of freedom and prudent regulation, *Your Writing Well* is a comprehensive cure for all writers' ailments and deficiencies.

Writing the Natural Way Gabriele Lusser Rico, 2000-04-03

Writing the Natural Way, first published fifteen years ago, has shown hundreds of thousands of readers how to turn the task of writing into the joy of writing. Completely revised, newly illustrated, and with a wealth of updated, field-tested exercises, this

popular classic will help unlock natural writing styles and storytelling abilities **The Writing on the Wall** William C. Hannas, 2013-03-26 Students in Japan China and Korea are among the world's top performers on standardized math and science tests The nations of East Asia are also leading manufacturers of consumer goods that incorporate scientific breakthroughs in telecommunications optics and transportation Yet there is a startling phenomenon known throughout Asia as the creativity problem While East Asians are able to use science they have not demonstrated the ability to invent radically new systems and paradigms that lead to new technologies In fact the legal and illegal transfer of technology from the West to the East is one of the most contentious international business issues Yet Asians who study and work in the West and depend upon Western languages for their research are among the most creative and talented scientists no less so than their Western counterparts William C Hannas contends that this paradox emerges from the nature of East Asian writing systems which are character based rather than alphabetic Character based orthographies according to the author lack the abstract features of alphabetic writing that model the thought processes necessary for scientific creativity When first learning to read children who are immersed in a character based culture are at a huge disadvantage because such writing systems do not cultivate the ability for abstract thought Despite the overwhelming body of evidence that points to the cognitive side effects the cultural importance of character based writing makes the adoption of an alphabet unlikely in the near future
