Right Ventricular Hypertrophy And Function In Chronic Lung Disease:

Right Ventricular Hypertrophy and Function in Chronic Lung Disease V. Jezek, M. Morpurgo, R.

Tramarin, 2013-11-11 This monograph comprises 17 papers written by prominent authors in the field each of whom presents his most recent experiences The papers were not specially selected so that this work is far from being a comprehensive textbook covering all aspects of right ventricular hypertrophy and failure in chronic lung disease Perhaps some of the papers dealing with more strictly physiological problems and experimental models will be somewhat difficult to relate directly to former modes of thinking of both cardiologists and pneumologists Nevertheless we hope and expect that this book will provide the reader with an in depth appreciation of the situation of present research in different laboratories and countries Occasionally contradictions between different papers may be noticed We have not tried to remove these since each contradiction reflects current areas of dispute or uncertainty in this developing field We wish finally to acknowledge the continuing support of the Clinica del Lavoro Foundation for projects aimed at promoting education in all fields related to medical rehabilitation Vlastimil Jdek Mario Morpurgo Roberto Tramarin Foreword This volume is the sixth issue in the Series Current Topics in Rehabilitation which was first conceived in 1987 with the aim of offering updated indications as to functional comprehensive evaluation strategies and rehabilitation programmes *Chronic Obstructive Lung Diseases*

Norbert F. Pride,2013-11-11 **Management of Chronic Obstructive Pulmonary Disease** N.M. Siafakas,2006-12-01 Since the 1970s therapeutic nihilism has moved towards a more optimistic attitude regarding therapeutic alternatives in COPD Research focused on inflammatory and physiological mechanisms has substantially increased during the last 10 years This has led to an increased understanding of the pathophysiology of the disease which has resulted in improved treatment Thus in parallel to smoking cessation programmes other treatment modalities have been shown to be successful Physiotherapy and pharmacotherapy have been extensively studied and the knowledge regarding what these therapeutic approach *Pulmonary Heart Disease* L.J. Rubin,2012-12-06 Responsibility for the diagnosis and management of disorders of the pulmonary circulation has become the shared domain of the pulmonologist cardiologist surgeon radiologist pathologist and perhaps most important of all the internist It is the general internist who is most likely to care for the majority of patients with lung diseases that secondarily give rise to pulmonary heart disease and it is the internist who will first evaluate the patient with primary pulmonary hypertension or recurrent pulmonary thromboembolism who presents with nonspecific complaints and may manifest subtle and nondiagnostic findings on preliminary evaluation The burgeoning medical literature concerning aspects of the pulmonary circulation both clinical and investigative is a reflection of the reawakening of great interest in this field and has led to many new developments both in our understanding of cardiopulmonary pathophysiology and in the diagnosis and treatment of pulmonary vascular diseases This book is an attempt to provide the clinician with a comprehensive overview of pulmonary heart disease from the perspective of experts representing a variety of disciplines It is intended to be thorough yet clinically relevant Individuals familiar with some facets of pulmonary heart disease may gain insight into other aspects of this condition whereas those unfamiliar with this disorder may find this work useful as a general reference or as a resource to address a specific question **Faces of Right Ventricular Failure, An Issue of Cardiology Clinics** James A. Goldstein,Jonathan D. Rich,2012-05-28 Although heart failure typically begins with the left side of the heart it is also important for cardiologists to understand right sided heart failure which is the inability of the right side of the heart to adequately pump venous blood into the pulmonary circulation Right heart failure causes a back up of fluid in the body resulting in swelling and edema This issue covers the normal right ventricle RV imaging of the RV RV failure in a variety of settings and treatment of RV failure including interventions Respiratory Care: Principles and Practice Dean R.
