*Right Makes Might* David C. Gompert, 1998 The emergence of China begs a fresh look at power in world affairs more precisely at how the spread of freedom and the integration of the global economy due to the information revolution are affecting the nature concentration and purpose of power Chapters freedom power and the rise of China globalization and power politics knowledge and freedom knowledge and national power powers as partners and coda on U S policy Concludes that the U S need not fear a cold war with China China s own priorities economic growth and stability propel it toward legitimacy that can only come through reform and toward the dominant technology "Right Makes Might" Wolfgang Mieder, 2019-04-04 A powerful and timely addition to the literature of rhetoric and folklore Choice In 1860 Abraham Lincoln employed the proverb Right makes might opposite of the more aggressive Might makes right in his famed Cooper Union address While Lincoln did not originate the proverb his use of it in this critical speech indicates that the fourteenth century phrase had taken on new ethical and democratic connotations in the nineteenth century In this collection famed scholar of proverbs Wolfgang Mieder explores the multifaceted use and function of proverbs through the history of the United States from their early beginnings up through their use by such modern day politicians as Barack Obama Hillary Rodham Clinton and Bernie Sanders Building on previous publications and unpublished research Mieder explores sociopolitical aspects of the American worldview as expressed through the use of proverbs in politics women s rights and the civil rights movement and by looking at the use of proverbial phrases Mieder demonstrates how one traditional phrase can take on numerous expressive roles over time and how they continue to play a key role in our contemporary moment *Strategic Assessment ...* , *Strategic Assessment 1999* , 1999 **Networking the World, 1794-2000** Armand Mattelart, 2000 In the age of satellites and the Internet worldwide communication has become increasingly unified amid overblown claims about the redemptive possibilities of international networks But this rhetoric is hardly new As Armand Mattelart demonstrates in *Networking the World 1794 2000* globalization and its attendant hype have existed since road and rail were the fastest way to move information Mattelart plates contemporary global communication networks into historical context and shows that the networking of the world began much earlier than many assume in the late eighteenth century He argues that the internationalization of communication was spawned by such Enlightenment ideals as universalism and liberalism and examines how the development of global communications has been inextricably linked to the industrial revolution modern warfare and the emergence of nationalism Throughout Mattelart eloquently argues that discourses of better living through globalization often mask projects of political economic and cultural domination *Governing the Internet* Marcus F. Franda, 2001 This volume explores the many complex issues and challenges that confront governments technocrats business people and others as they try to create and implement rules for a truly global interoperable Internet **The strategic implications of a nuclear-armed Iran** , **Democracy and the Internet** Leslie David Simon, Javier Corrales, Donald R.

Wolfensberger,2002-09-03 In Democracy and the Internet Allies or Adversaries three essays draw evidence from starkly different regions of the world the Middle East Latin America and the United States *Preventing the Use of Weapons of Mass Destruction* Eric Herring,2013-01-11 These studies concentrate on preventing the use of weapons of mass destruction A common argument runs through all of the papers that while complacency must be avoided much of the post Cold War focus among Western governments on the threat posed by weapons of mass destruction is alarmist *Illuminating Tomorrow's War* Martin C. Libicki,1999 Considers how the information revolution is creating a revolution in military affairs that will fundamentally change the way U S forces fight supported by a system of systems that will give U S forces superior battlespace awareness Chapters precision guided munitions precision location a world of sensors the potential proliferation of the revolution in military affairs standoff warfare coalition structures prospects for the grid defining the grid knowledge maintenance access security difficulties of top down integration cutting to the core planning experimentation opportunities for bottom up integration **The Revolution in Military Affairs** Robbin F. Laird,Holger H. **All Possible Wars?** Sam J. Tangredi,2000 This survey is a product of the Quadrennial Defense Review QDR 2001 Working Group a project of the Institute for National Strategic Studies at the National Defense University Sponsored by the Chairman of the Joint Chiefs of Staff the working group is an independent honest broker effort intended to build intellectual capital for the upcoming QDR More specifically it aims to frame issues develop options and provide insights for the Chairman the services and the next administration in three areas defense strategy criteria for sizing conventional forces and force structure for 2005 2010 One of the group s initial tasks was to assess the future security environment to the year 2025 This was pursued by surveying the available literature to identify areas of consensus and debate The goal was to conduct an assessment that would be far more comprehensive than any single research project or group effort could possibly produce This survey documents major areas of agreement and disagreement across a range of studies completed since the last QDR in 1997 Because it distills a variety of sources and organizes and compares divergent views this volume makes a unique contribution to the literature It also provides a particularly strong set of insights and assumptions on which both strategists and force planners can draw in the next Quadrennial Defense Review This survey does not claim to predict or illustrate all possible wars that America might face between now and the year 2025 Rather it attempts through analysis of representative and reputable sources to incorporate the most likely characteristics of the future security environment into a single scenario while heightening our awareness of dissenting viewpoints and plausible wild cards *Innovation Ecosystems* Michel Saloff-Coste,2022-06-22 Our current situation marked simultaneously by the Anthropocene global warming digitization and

exponential artificial intelligence leads us to sudden and total change in global civilization and de facto to rebuilding the foundations of the international economy Innovation Ecosystems explores the risks and opportunities facing the contemporary world by analyzing comparing and categorizing the world's most dynamic innovation ecosystems by region and city This includes the identification of key characteristics common or original and learning from them in terms of culture management system and structure in order to meet current challenges and think about civilizations of the future Futures Carine Dartiguepeyrou, Michel Saloff-Coste, 2023-08-15 In the same way as there are many futures not just one there are many ways to conceive and practice foresight The challenge of the great turning point of our civilization is to free ourselves from our prejudices in order to imagine and build desirable futures The process is by nature ethical and prospective In a complex uncertain and geopolitically transforming world we must be open to the diversity of cultures and the different perceptions of the future This requires us to reflect on the purpose and means of our societies Futures proposes different cultural and ethical views on civilizational transformation by offering a rare transnational panorama of the visions of the future in a European American and Chinese context Through numerous examples this book illustrates how foresight is practiced and what this can achieve in strategic terms *Visions of the Atlantic Alliance* Simon Serfaty, 2005-12-16 *The Revenge of the Melians* Kenneth F. McKenzie, 2000 This essay is a product of the Quadrennial Defense Review QDR 2001 Working Group a project of the Institute for National Strategic Studies at the National Defense University Sponsored by the Chairman of the Joint Chiefs of Staff the working group is an independent honest broker effort intended to build intellectual capital for the upcoming QDR More specifically it aims to frame issues develop options and provide insights for the Chairman the services and the next administration in three areas defense strategy criteria for sizing conventional forces and force structure for 2005 2010 One of the group's initial tasks was to assess the future security environment to the year 2025 This was pursued by surveying the available literature to identify areas of consensus and debate and by deepening knowledge of asymmetric threats to the United States both at home and abroad given their potential appeal to likely adversaries in view of America's conventional military superiority The essay that follows grew out of that latter effort and reflects a growing consensus that the issues posed by asymmetric threats should occupy a more prominent place in defense strategy and force planning This essay makes a unique contribution to the growing literature on asymmetric threats by providing a conceptual framework for thinking about such threats offering an approach to determining which threats should receive the greatest attention from defense planners and suggesting concrete steps that the Nation should take to address them Strategic Appraisal Zalmay Khalilzad, Tom LaTourrette, David E. Moshier, Lois M. Davis, David R. Howell, Barbara Raymond, 1999-05-11 Advances in information technology have led us to rely on easy communication and readily available information both in our personal lives and in the life of our nation For the most part we have rightly welcomed these changes But information that is readily available is available to friend and foe alike a system that relies on communication can become useless if its ability to

communicate is interfered with or destroyed Because this reliance is so general attacks on the information infrastructure can have widespread effects both for the military and for society And such attacks can come from a variety of sources some difficult or impossible to identify This the third volume in the Strategic Appraisal series draws on the expertise of researchers from across RAND to explore the opportunities and vulnerabilities inherent in the increasing reliance on information technology looking both at its usefulness to the warrior and the need to protect its usefulness for everyone The Strategic Appraisal series is intended to review for a broad audience issues bearing on national security and defense planning

**Nomination of David C. Gompert to be Principal Deputy Director of National Intelligence** United States. Congress. Senate. Select Committee on Intelligence,2010      The Information Society Armand Mattelart,2003-04-03 The impact of the information society are multiform and transdisciplinary There are few areas of social political and economic life that have not been affected or challenged by the new technologies of information and communication In this short introduction Armand Mattelart unpacks the notion of the information society and examines why it has become the dominant paradigm for social change in the 21st Century Critically he also asks why the notion has come to dominant in the absence of any critical examination of the conditions under which it has been produced Combining a long term historical and geopolitical perspective Mattelart questions the axioms used to legitimate the Information Society and critically assesses the ways in which it has been conceptualised as a theoretical concept as well as policy making tool This introduction will be of interest to all students of media and communication as well as social scientists in general      **Right To National Self-Defense** Dimitrios Delibasis,2007-11-19 This ambitious work which took the better part of a decade to produce will be essential reading for all serious defence study students and of absorbing interest to military professionals and lay people concerned with the future of warfare and all aspects of response to military attack Its ultimate aim is to demonstrate that the advent of Cyberwarfare has pushed traditional legal thinking regarding the regulation of forcible action beyond traditional boundaries It attempts to do so by critically analyzing specific characteristics which are inherent to Cyberwarfare such as stealth speed untraceability the availability to State as well as Non State sponsored agents their defiance of traditional borders and an unprecedented potential for destruction all of which have played a major role in making obsolescent traditional legal norms relied upon for the effective regulation of the use of force It follows from the above that no defence system can be effectively regulated especially one as new and unconventional as Information Warfare unless all its specific aspects are explored as deeply as possible The best means to achieve such a purpose have been deemed to be through the inclusion as well as the careful analysis of as many real life examples of Information Warfare operations as possible in order to illustrate the special nature of Information Warfare and its various individual features The examples compiled for inclusion have been selected not on the basis of being the most recent but on the basis of their factual background being as fully known as possible Consequently this book has been constructed around the concept of legality starting with a section

outlining currently existing legal norms of individual self defense then applying those norms to Information Warfare Operations including a presentation of existing international legal instruments with provisions applicable to Information Warfare which could serve as additional essential guidelines for a future legal framework specifically crafted to regulate the use of force in cyberspace Last but not least this book sets a paradigm with regard to Cyberwarfare as well as with other methods of warfare which escape the boundaries of the traditional State monopoly of the use of force It ultimately shows the extent to which traditional legal thinking which is shaped around the premise of regulating typical forms of State forcible action when faced with such methods of warfare is totally obsolete
