Importing the Law in Post-Communist Transitions Catherine Dupré, 2003-03-14 This book one of the very first monographs on the Hungarian Constitutional Court available in English is a unique study of the birth of a new legal system after the collapse of communism in Central and Eastern Europe It shows that the genesis of the new legal order was determined by massive Western involvement and an unprecedented movement of export import of law Anchored in a detailed comparative study of German and Hungarian constitutional case law on human dignity this book argues that law importation was a deliberate strategy carried out by the Hungarian Court in the early years of its operation It explains how the circumstances of the transition and the background of the importers determined the choice of German case law as a model and how the Court used it to construct its own version of the right to human dignity It highlights the Hungarian Court's instrumentalisation of imported law in order to lay the foundations of a new conception of fundamental rights While focusing on the Hungarian experience this book engages with international debates and provides an original theoretical framework for approaching the movement of law from the importers perspective

The Transformation of Property Regimes and Transitional Justice in Central Eastern Europe Liviu Damşa, 2017-01-03 This volume examines the property transformations in post communist Central

Eastern Europe CEE and focuses on the role of restitution and privatisation in such transformations It argues that the theorisation of restitution in post communist CEE is incomplete in the transitional justice scholarship and in the literature on correction of historical wrongs The book also argues that for a more complete theorisation of post communist restitution the transformations of property in post communist societies ought to be studied in a more holistic way The main legal vehicles used for such transformations privatisation and restitution should not be studied separately and in abstract but in their reciprocal relationship and in connection to the dimension of justice which each could achieve Finally the book integrates privatisation in a theory of post communist transformation of property *Legal Symbolism* Jiří Přibáň, 2016-04-22 Jir Prib n s book contributes to the field of systems theory of law in the context of European legal and political integration and constitution making It puts recent European legislative efforts and policies especially the EU enlargement process in the context of legal theory and philosophy Furthermore the author shows that the system of positive law has a symbolic meaning reflecting how it also contributes to the semantics of political identity democratic power and moral values as well as the complex relations between law politics and morality The formation of Croatian national identity Alex Bellamy, 2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license This book assesses the formation of Croatian national identity in the 1990s It develops a novel framework calling into question both primordial and modernist approaches to nationalism and national identity before applying that framework to Croatia In doing so the book provides a new way of thinking about how national identity is formed and why it is so important An explanation is given of how Croatian national identity was formed in the abstract via a historical narrative that traces centuries of yearning for a national state The book shows how the government opposition parties dissident intellectuals and diaspora groups offered alternative accounts of this narrative in order to legitimise contemporary political programmes based on different versions of national identity It then looks at how these debates were manifested in social activities as diverse as football religion economics and language This book attempts to make an important contribution to both the way we study nationalism and national identity and our understanding of post Yugoslav politics and society **Turkey: facing a new millennium** Amikam Nachmani, 2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license Turkey s involvement in the Gulf War in 1991 paved the way for the country s acceptance into the European Union This book traces that process and in the first part looks at Turkey s foreign policy in the 1990s considering the ability of the country to withstand the repercussions of the fall of communism It focuses on Turkey s achievement in halting and minimising the effects of the temporary devaluation in its strategic importance that resulted from the waning of the Cold War and the disintegration of the Soviet Union the skilful way in which Turkey avoided becoming embroiled in the ethnic upheavals in Central Asia the Balkans and the Middle East and the development of a continued policy of closer integration into the European and western worlds Internal politics are the focus of the second part of the book addressing the curbing of

the Kurdish revolt the economic gains made and the strengthening of civil society Nachmani goes on to analyse the prospects for Turkey in the twenty first century in the light of the possible integration into Europe which may leave the country's leadership free to deal effectively with domestic issues This book will make crucial reading for anyone studying Turkish politics or indeed European or European Union politics

The European Union and the Cyprus Conflict Thomas

Diez,2002 In the lead essay for this volume Joshua Foa Dienstag engages in a critical encounter with the work of Stanley Cavell on cinema focusing skeptical attention on the claims made for the contribution of cinema to the ethical character of democratic life In this debate Dienstag mirrors the celebrated dialogue between Rousseau and Jean D Alembert on theatre casting Cavell as D Alembert in his view that we can learn to become better citizens and better people by observing a staged representation of human life with Dienstag arguing with Rousseau that this misunderstands the relationship between original and copy even more so in the medium of film than in the medium of theatre Dienstag's provocative and stylish essay is debated by an exceptional group of interlocutors comprising Clare Woodford Tracy B Strong Margaret Kohn Davide Panagia and Thomas Dumm The volume closes with a robust response from Dienstag to his critics

Marrus,2009-10-02 Can there ever be justice for the Holocaust During the 1990s triggered by lawsuits in the United States against Swiss banks German corporations insurance companies and owners of valuable works of art claimants and their lawyers sought to rectify terrible wrongs committed more than a half century earlier Some Measure of Justice explores this most recent wave of justice seeking for the Holocaust what it has been why it emerged when it did how it fits with earlier reparation to the Jewish people its significance for the historical representation of the Holocaust and its implications for justice seeking in our time Writings on the subject of Holocaust reparations have largely come from participants lawyers philosophers journalists and social scientists specializing in restitution In Some Measure of Justice Michael Marrus takes up the issue as a historian deeply involved with legal issues He engages with larger questions about historical understanding and historical interpretation as they enter the legal arena Ultimately this book asks What constitutes justice for a great historic wrong And Is such justice possible Winner Helen and Stan Vine Canadian Jewish Book Award for Holocaust Literature

The Age of Dignity Catherine Dupré,2016-02-11 Human dignity is one of the most challenging and

exciting ideas for lawyers and political philosophers in the twenty first century Even though it is rapidly emerging as a core concept across legal systems and is the first foundational value of the European Union and its overarching human rights commitment under the Lisbon Treaty human dignity is still little understood and often mistrusted Based on extensive comparative and cross disciplinary research this path breaking monograph provides an innovative and critical investigation of human dignity's origins development and above all its potential at the heart of European constitutionalism today Grounding its analysis in the connections among human dignity human rights constitutional law and democracy this book argues that human dignity's varied and increasing uses point to a deep transformation of European constitutionalism At its

heart are the construction and protection of constitutional time and the multi dimensional definition of humanity as human beings citizens and workers Anchored in a detailed comparative study of case law including the two European supranational courts and domestic constitutional courts especially those of Germany the UK France and Hungary this monograph argues for a new understanding of European constitutionalism as a form of humanism **Comparative Criminal Procedure**

Jacqueline E. Ross, Stephen C. Thaman, 2016-06-24 This Handbook presents innovative research that compares different criminal procedure systems by focusing on the mechanisms by which legal systems seek to avoid error protect rights ground their legitimacy expand lay participation in the criminal process and develop alternatives to criminal trials such as plea bargaining as well as alternatives to the criminal process as a whole such as intelligence operations The criminal procedures examined in this book include those of the United States Germany France Spain Russia India Latin America Taiwan and Japan among others *Two Tiers Or Two Speeds?* James Sperling, 1999 The sudden transformation of the Cold War security order in 1989 altered the structure of the European state system and necessitates the striking of a new balance between the economic political and military requirements of security This volume focuses on the most important institutions of European security the European Union and NATO Both institutions are expanding especially eastwards in terms of their respective roles and membership This double expansion raises many questions most crucially whether Europe will be a two speed security order which suggests openness inclusiveness and the emergence of an anarchical society or a two tiered security order which suggests a continued hierarchical security system with all of its associated historical liabilities **Theory and reform in the EU**

Dimitris N. Chrysoschoou, Michael J. Tsinisizelis, Stelios Stavridis, Kostas Ifantis, 2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license This substantially updated and revised edition offers a comprehensive overview of the challenges confronting the political system as well as the international politics of the European Union It draws from a spectrum of regional integration theories to determine what the Union actually is and how it is developing examining the constitutional politics of the European Union from the Single European Act to the Treaty of Nice and beyond The ongoing debate on the future of Europe links together the questions of democracy and legitimacy competences and rights and the prospects for European polity building The aim is to contribute to a better understanding of the emerging European polity and the questions that further treaty reform generates for the future of the regional system The authors also assess the evolving European security architecture the limits and possibilities of a genuine European foreign security and defence policy and the role of the EU in the post Cold War international system Common themes involve debates about stability and instability continuity and change multipolarity and leadership co operation and discord power capabilities and patterns of behaviour The book traces the defining features of the new order in Europe and incorporates an analysis of the post September 11th context
