of the potential emergence of corporate obligations and engages in a structural analysis of what corporate obligations under international human rights law might entail Ultimately it warns against conceptualizing corporations as both holders and potential violators of human rights explaining why they are not automatically bound by the same obligations that are imposed on states Due Diligence Obligations in International Human Rights Law Maria Monnheimer,2021-02-18 With the

importance of non State actors ever increasing the traditional State centric approach of international law is being put to the test In particular significant accountability lacunae have emerged in the field of human rights protection To address these challenges this book makes a case for extraterritorial due diligence obligations of States in international human rights law It traces back how due diligence obligations evolved on the international plane and develops a general analytical framework making the broad and vague notion of due diligence more approachable The framework is applied to different fields of international law which provides guidance on how due diligence obligations can be better conceptualized Drawing inspiration from these developments the book analyses how extraterritorial human rights due diligence obligations could operate in practice and foster global human rights protection International Human Rights Law and Practice Ilias Bantekas,Lutz

international obligations by subjects of this law this book explores the normative and functional links between the sources and rules of international law on the one hand and the responsibility for violating international law on the other In the sphere of law making the theory of obligations allows for a more precise and considered formulation of international obligations It has the potential to enable subjects of international law to behave more rationally allowing deeper reflection on whether to take on obligations and how to properly perform them This book proposes a new approach to the issue of the proper operation of international law with the theory of obligations at its heart Linking the institutions and concepts of international law into a rational whole the book offers an analysis of the operation of international law and the behaviour of its subjects to develop a framework for ensuring the ultimate effectiveness of international law Analysing sources of law including treaties and common law alongside the resolutions of international organisations this book demonstrates the practical application of the subject with reference to the jurisprudence of international courts and other bodies The volume will be of interest to scholars students and practitioners concerned with international law its creation performance application compliance and enforcement *The International Law Commission's Draft Articles on State Responsibility* Shabtai Rosenne,2025-01-20

*International Law Obligations on Climate Change Mitigation* Benoit Mayer,2022-07-11 Recent years have witnessed exciting developments in international negotiations litigation and scholarship about climate change but doctrinal research in the field remains in its infancy In particular little is known about how fast states are required to limit and reduce their greenhouse gas emissions The first part of the book identifies the relevant obligations through an analysis of treaties custom

and other sources of international law Beyond express quantified commitments contained for instance in nationally determined contributions the book sheds light on the existence of general obligations of due diligence While these general obligations are difficult to interpret they are often more demanding The second part explores how these general obligations can be applied objectively for instance by a court in concrete cases Instead of an improbable judicial assessment of a state s requisite level of mitigation action the book shows the possibility of assessing a state s conduct based on the measures that general mitigation obligations entail These measures relate to corollary duties of cooperation vigilance and consistency This book presents a first comprehensive doctrinal study of states obligations on climate change mitigation It shows that such obligations arise not only from climate treaties but also from customary international law unilateral declarations and possibly human rights treaties It also explores the interactions between these multiple obligations
