Price, Size & Publisher's Name of Each Book William Swan Sonnenschein,1901 *Books in the Life of a Child* Maurice Saxby,1997-10-15 *Books in the Life of a Child* explores the value of books and reading in the stimulation of children's imagination and their fundamental importance in the development of language and true literacy. It examines not only the vast range of children's books available but also how to introduce young people to the joys of reading in the home, the school and in the community. The book has been written as a resource for all adults especially teachers, student teachers, librarians and parents and those who care about the value of literature for children. It is a comprehensive and critical guide with chapters on the history of children's literature and an analysis of its many forms and genres from poetry, fairytale, myth, legend and fantasy through realistic and historical fiction to humour, pulp fiction and information books. Learning English Neil Mercer,Joan Swann,Barbara Mayor,2020-10-28 *Learning English* focuses on young children's acquisition of spoken and written English in monolingual and bilingual contexts and explores the debates surrounding English in schools and colleges and the often controversial nature of the English curriculum in different parts of the world. English is learned in most parts of the world both through use in the home and community and as a major language of education. *Learning English* represents just some of this diversity. **Language Development and Aphasia in Children** R. W. Rieber,2014-05-10 *Language Development and Aphasia in Children* New Essays and a Translation of *Kindersprache und Aphasie* by Emil Frischels deals with problems of theory, method and therapy as well as the interpretation of language development and aphasia in children. A translation of Emil Frischels' book *Kindersprache und Aphasie* into English, *Child Language and Aphasia* is included. Comprised of 26 chapters, this book begins with a historical review that illustrates how the ideas of other influential figures laid the groundwork for *Child Language and Aphasia* 1918 including G. A. S. de Cordemoy and Denis Diderot. The discussion then turns to the environment that surrounded *Child Language and Aphasia* and some of Frischels' observations regarding the nature of aphasia in children. The effect of left hemisphere arteriopathy on communicative intent, expression and language comprehension in a right-handed nine-year-old girl is also examined. Subsequent chapters focus on theories of reading and language development, the psychology of association, the theory of the transitive contents of consciousness and stuttering in children and aphasics. This monograph should be of considerable interest to students, researchers and specialists in the fields of neurolinguistics, psycholinguistics, neuropsychology and neurophysiology. **The School Achievement of Minority Children** Ulric Neisser,2020-11-25 Lower school achievement of minority children is usually explained by projecting deficits upon the children, deficits that are attributed to genetic or environmental causes. In contrast with tradition, the contributors to this book demonstrate how group differences in academic accomplishment and test scores are affected by cultural factors and standard educational practices as well. **The Psychology of Illustration** Harvey A. Houghton,Dale M. Willows,2012-12-06 From the earliest stages of elementary school to the advanced college level, various types of illustrations are included in educational materials in order to promote learning. These illustrative adjuncts are often profuse and in many

cases they may be the most striking feature that distinguishes one set of learning materials from another In addition the perceived effectiveness of the illustrations clearly plays an important role in the marketing of many educational materials Despite this pervasiveness and salience in education there has never been a systematic effort to bring together the results of research on illustrations in order to provide some level of guidance to the developers of commercial learning materials There is however a considerable research literature that is directly relevant to this aspect of education The purpose of the present two volume set is to summarize and interpret the existing research literature that deals with the various educational functions of illustrations In undertaking to produce an omnibus reference work on psychological and instructional issues surrounding illustrated learning material our paramount aim has been to stimulate closer collaboration between researchers producers and users of educational text The problems associated with moving the findings of educational research into the realm of everyday practice have been perennial ones While many researchers and practitioners are interested in fundamentally similar questions they typically speak dissimilar languages read different journals and carry out their work under disparate ideologies

AB Bookman's Weekly ,1996 **Specific Learning Difficulties (Dyslexia)** Mr Peter D Pumfrey, Peter Pumfrey, Rea Reason, 2013-09-05 Drawing on the work of eleven experienced educational psychologists this book presents a variety of approaches to prevention identification and intervention and makes practical recommendations for future progress
