*Sweet, Reinforced and Fortified Wines* Fabio Mencarelli, Pietro Tonutti, 2013-04-16 Wines from Grape Dehydration is the first of its kind in the field of grape dehydration the controlled drying process which produces a special group of wines These types of wine are the most ancient made in the Mediterranean basin and are even described in Herodotus Until few years ago it was thought that these wines such as Pedro Ximenez Tokai Passito and Vin Santo were the result of simple grape drying because the grapes were left in the sun or inside greenhouses that had no controls over temperature relative humidity or ventilation But Amarone wine one of the most prized wines in the world is the first wine in which the drying is a controlled process This controlled process grape dehydration changes the grape at the biochemical level and involves specialist vine management postharvest technology and production processes which are different from the typical wine making procedure After a history of grape dehydration the book is then divided into two sections scientific and technical The scientific section approaches the subjects of vineyard management and dehydration technology and how they affect the biochemistry and the quality compounds of grape as well as vinification practices to preserve primary volatiles compounds and colour of grape The technical section is devoted to four main classes of wine Amarone Passito Pedro Ximenez and Tokai The book then covers sweet wines not made by grape dehydration and the analytical sensorial characteristics of the wines A concluding final chapter addresses the market for these special wines This book is intended for wineries and wine makers wine operators postharvest specialists vineyard managers growers enology wine students agriculture viticulture faculties and course leaders and food processing scientists Melatonin: Role in Plant Signaling, Growth and Stress Tolerance Soumya

Mukherjee, Francisco J. Corpas, 2023-08-31 The new edited volume on phyto-melatonin and its diverse roles in plants under a challenging environment shall be an important reference book with updated information and future perspectives on the involvement of this biomolecule in stress resilience in plants Investigations on different aspects of melatonin in plants have undergone a prolific surge in the last decade In view of such a considerable volume of investigations in melatonin the proposed new volume will collate its role in different aspects of plants signaling growth and metabolism In this context it has been important to understand its function as a stress priming molecule that executes associative synergistic relation with various other plant growth regulators viz nitric oxide hydrogen sulfide inorganic ions and enzymes Thus crop management under diverse stressful environments can be better achieved by elucidating our current understanding of the role of melatonin and its interplay with various plant metabolites The book shall provide a collation of recent advancements in genomic transcriptomic and metabolomic approaches to decipher the molecular mechanisms of melatonin signaling and its agronomic importance in plants *Harper's Magazine*, 1857 Important American periodical dating back to 1850
