Italian landowners presided over the economic and social life of two predominantly agricultural regions the U S South and

Italy's Mezzogiorno Enrico Dal Lago ingeniously compares these agrarian elites demonstrating how the study of each enhances our understanding of the other as well as of their shared nineteenth century world Agrarian Elites charts the parallel developments of plantations and latifondi in relation to changes in the world economy At the same time it examines the spread of paternalistic models of family relations and of slave and free labor management that accompanied the rise of large groups of American slaveholders and southern Italian landed proprietors in the early to mid 1800s According to Dal Lago the most articulate and enlightened members of both elites combined the pursuit of profit with the implementation of modern contractual practices in dealing with their workforces Both elites also used their economic and social power for political advantage opposing the intervention of their national governments in local affairs The search for ever better protection of their respective interests in slaveholding and landed property led ultimately to their support for the creation of two nations the Confederate States of America and the Kingdom of Italy both in 1861 Dal Lago brings together two subjects that have generated considerable debate and research systems of slave and nominally free labor and the elites who employed them and nineteenth century nationalism With its pathbreaking approach and singular and comparative insights Agrarian Elites will inform not only American and Italian studies but also the very practice of comparative history

Across Colonial Lines Devyani Gupta, Purba Hossain, 2023-02-09 Across Colonial Lines takes a multi perspective approach to the study of empire and commodities and encourages readers to look at commodity histories in alternative spatial and temporal contexts It offers a comparative understanding of commodities in the Venetian Portuguese Dutch French and British Empires Highlighting the interwoven character of multiple commodity networks this book situates commodities like gold coffee tea and indigo to name a few within pre existing networks of labour consumption and knowledge production It explores the nexus between the local and the global and highlights the role played by individual producers petty traders sailors and even consumers in creating regional circulations within a global political economy In this volume commodity networks are not just sites of production and

trade but also of political control social organisation and consumption choices They provide the impetus for globalisation from as early as the thirteenth century Each chapter takes an individual commodity to illustrate the history of commodity transmission within imperial contexts From early modern Venetian commerce to the trade networks of the Eurasian world from the trading ambitions of British sailors to Portuguese global imperial ambitions from the cross imperial knowledge networks of indigo to the assertion of indigenous agency in Angola and from the commodification of labour to the experience of tourism in the Caribbean and Indian Ocean World Across Colonial Lines uses commodity networks as a lens to study empire building across varied yet connected geographies and chronologies **An Empire Divided** Andrew Jackson

O'Shaughnessy, 2015-12-14 There were 26 not 13 British colonies in America in 1776 Of these the six colonies in the Caribbean Jamaica Barbados the Leeward Islands Grenada and Tobago St Vincent and Dominica were among the wealthiest These island colonies were closely related to the mainland by social ties and tightly connected by trade In a period when most British colonists in North America lived less than 200 miles inland and the major cities were all situated along the coast the ocean often acted as a highway between islands and mainland rather than a barrier The plantation system of the islands was so similar to that of the southern mainland colonies that these regions had more in common with each other some historians argue than either had with New England Political developments in all the colonies moved along parallel tracks with elected assemblies in the Caribbean like their mainland counterparts seeking to increase their authority at the expense of colonial executives Yet when revolution came the majority of the white island colonists did not side with their compatriots on the mainland A major contribution to the history of the American Revolution An Empire Divided traces a split in the politics of the mainland and island colonies after the Stamp Act Crisis of 1765-66 when the colonists on the islands chose not to emulate the resistance of the patriots on the mainland Once war came it was increasingly unpopular in the British Caribbean nonetheless the white colonists cooperated with the British in defense of their islands O'Shaughnessy decisively refutes the widespread belief that there was broad backing among the Caribbean colonists for the American Revolution and deftly reconstructs the history of how the island colonies followed an increasingly divergent course from the former colonies to the north *A Short History of Transatlantic Slavery* Kenneth Morgan, 2016-04-25

From 1501 when the first slaves arrived in Hispaniola until the nineteenth century some twelve million people were abducted from west Africa and shipped across thousands of miles of ocean the infamous Middle Passage to work in the colonies of the New World Perhaps two million Africans died at sea Why was slavery so widely condoned during most of this period by leading lawyers religious leaders politicians and philosophers How was it that the educated classes of the western world were prepared for so long to accept and promote an institution that would later ages be condemned as barbaric Exploring these and other questions and the slave experience on the sugar rice coffee and cotton plantations Kenneth Morgan discusses the rise of a distinctively Creole culture slave revolts including the successful revolution in Haiti 1791-1804 and the rise of abolitionism when the ideas

of Montesquieu Wilberforce Quakers and others led to the slave trade's systemic demise At a time when the menace of human trafficking is of increasing concern worldwide this timely book reflects on the deeper motivations of slavery as both ideology and merchant institution The Harvard Guide to African-American History Evelyn Brooks Higginbotham,2001 This massive guide sponsored by the W E B Du Bois Institute for Afro American Research at Harvard University and compiled by renowned experts offers a compendium of information and interpretation on over 500 years of black experience in America A History of Portugal and the Portuguese Empire Anthony R. Brooke,2014-03-17 The first global study by a historian to fully integrate the earth system approach of the new climate science with the material history of humanity *Born in Blackness: Africa, Africans, and the Making of the Modern World, 1471 to the Second World War* Howard W. French,2021-10-12 Revealing the central yet intentionally obliterated role of Africa in the creation of modernity Born in Blackness vitally reframes our understanding of world history Traditional accounts of the making of the

modern world afford a place of primacy to European history Some credit the fifteenth century Age of Discovery and the maritime connection it established between West and East others the accidental unearthing of the New World Still others point to the development of the scientific method or the spread of Judeo Christian beliefs and so on ad infinitum The history of Africa by contrast has long been relegated to the remote outskirts of our global story What if instead we put Africa and Africans at the very center of our thinking about the origins of modernity In a sweeping narrative spanning more than six centuries Howard W French does just that for *Born in Blackness* vitally reframes the story of medieval and emerging Africa demonstrating how the economic ascendancy of Europe the anchoring of democracy in the West and the fulfillment of so called Enlightenment ideals all grew out of Europe's dehumanizing engagement with the dark continent In fact French reveals the first impetus for the Age of Discovery was not as we are so often told even today Europe's yearning for ties with Asia but rather its centuries old desire to forge a trade in gold with legendarily rich Black societies sequestered away in the heart of West Africa Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II *Born in Blackness* interweaves precise historical detail with poignant personal reportage In so doing it dramatically retrieves the lives of major African historical figures from the unimaginably rich medieval emperors who traded with the Near East and beyond to the Kongo sovereigns who heroically battled seventeenth century European powers to the ex slaves who liberated Haitians from bondage and profoundly altered the course of American history While French cogently demonstrates the centrality of Africa to the rise of the modern world *Born in Blackness* becomes at the same time a far more significant narrative one that reveals a long concealed history of trivialization and more often elision in depictions of African history throughout the last five hundred years As French shows the achievements of sovereign African nations and their now far flung peoples have time and again been etiolated and deliberately erased from modern history As the West ascended their stories siloed and piecemeal were swept into secluded corners thus setting the stage for the hagiographic rise of the West theories that have endured to this day Capacious and compelling Laurent Dubois *Born in Blackness* is epic history on the grand scale In the lofty tradition of bold revisionist narratives it reframes the story of gold and tobacco sugar and cotton and of the greatest commodity of them all the twelve million people who were brought in chains from Africa to the New World whose reclaimed lives shed a harsh light on our present world

The Americas in the Age of Revolution, 1750-1850 Lester D. Langley, 1996-01-01 Langley examines the political and social tensions reverberating throughout British French and Spanish America pointing out the characteristics that distinguished each upheaval from the others the impact of place or location on the course of

revolution the dynamics of race and color as well as class the relation between leaders and followers the strength of counterrevolutionary movements and especially the way that militarization of society during war affected the new governments in the postrevolutionary era Langley argues that an understanding of the legacy of the revolutionary age sheds tremendous light on the political condition of the Americas today virtually every modern political issue the relationship of the state to the individual the effectiveness of government the liberal promise for progress and the persistence of color as a critical dynamic in social policy was central to the earlier period Reader's Guide to American History Peter J.
