that make up these languages Renewed interest in this subject was sparked by recent claims that recursion is perhaps the sole uniquely human and as such universal trait of human language cf Chomsky Hauser and Fitch 2000 In this volume the issue of recursion is tackled from a variety of angles Some articles cover formal issues regarding the proper characterization or definition of recursion while others focus on empirical issues by examining the kinds of structure in languages that suggest recursive mechanism in the grammar Most articles discuss syntactic phenomena but several involve morphology the lexicon and phonology In addition we find discussions that involve evolutionary notions and language disorders and the broader cognitive context of recursion
