Rising To The Light A Portrait Of Bruno Bettelheim:

Rising to the Light Theron Raines, 2002 In 1983 after years of trying to persuade Bruno Bettelheim to write his autobiography Theron Raines his friend and literary agent himself undertook to tell the life of the renowned but often controversial child psychologist With no thought of writing a conventional biography Raines began a series of interviews in which Bettelheim reflected at length upon the major moments triumphs crises and tragedies of his extraordinary life *Rising to the Light* is the fascinating synthesis of these encounters and of Raines's interviews with counselors teachers and former students from the world famous Orthogenic School Here is Bettelheim's sudden passage from a life of wealth and luxury in Vienna to the appalling brutality of Dachau and Buchenwald where his intellect helped him survive the horrific conditions that often broke down a prisoner's personality His understanding of the parallels between the extreme situation of a concentration camp prisoner and the inner world of a disturbed child would shape him as a therapist Here is his voyage from the Old World to the New and his professional ascent in Chicago where he developed a total therapeutic milieu for children unable to survive emotionally at home or in any other school Though he had no specialized training he was uniquely qualified by his uncanny insights into children and his deep Freudian and post Freudian convictions about human nature and behavior Based on his success as a clinician and teacher he would go on to become a best selling author But toward the end of a long life Bettelheim would succumb to a stroke and to a devastating depression intensified by his feelings of uselessness when he was no longer able to do the work that had been his daily salvation for so many decades Raines who visited him twice in his last weeks also gives us the days just before the puzzling suicide of this man who had endured and built so much Despite his demonstrably tireless commitment to children Bettelheim's reputation was blemished after his death by attacks on his writings and his unorthodox clinical methods in particular his use of physical discipline in the psychotherapeutic setting Raines's conversations with Bettelheim have much to tell us about this bitterly disputed aspect of his legacy and they reveal a complex man who had to explore the boundary between compassion and brutality *Rising to the Light* is a portrait of a great teacher it gives us a more direct line of sight into the Bettelheim enigma than any other book is likely to provide

Bettelheim David James Fisher, 2008 Wallerstein M D Emeritus Professor and former Chair Department of Psychiatry University of California San Francisco School of Medicine These sparkling personal essays on Bettelheim a pathbreaker of modern ego psychology who has been savagely attacked and deprecated since his death seventeen years ago restore the man and his work in historical clinical and human context for the contemporary clinician and informed reader Fisher has done a splendid job of bringing this complex fascinating figure to life Peter J Loewenberg Ph D Professor of History and Political Psychology University of California at Los Angeles former Director of Education New Center for Psychoanalysis in Los Angeles David James Fisher has written a moving personal portrait of Bruno Bettelheim as thinker writer and friend

Intelligent Love Marga Vicedo,2021-03-23 Winner of the History of Science Society s 2022 Davis Prize How one mother challenged the medical establishment and misconceptions about autistic children and their parents In the early 1960s Massachusetts writer and homemaker Clara Park and her husband took their 3 year old daughter Jessy to a specialist after noticing that she avoided connection with others Following the conventional wisdom of the time the psychiatrist diagnosed Jessy with autism and blamed Clara for Jessy s isolation Experts claimed Clara was the prototypical refrigerator mother a cold intellectual parent who starved her children of the natural affection they needed to develop properly Refusing to accept this Clara

decided to document her daughter's behaviors and the family's engagement with her. In 1967 she published her groundbreaking memoir challenging the refrigerator mother theory and carefully documenting Jessy's development. Clara's insights and advocacy encouraged other parents to seek education and support for their autistic children. Meanwhile Jessy would work hard to expand her mother's world and ours. Drawing on previously unexamined archival sources and firsthand interviews, science historian Marga Vicedo illuminates the story of how Clara Park and other parents fought against medical and popular attitudes toward autism while presenting a rich account of major scientific developments in the history of autism in the US. *Intelligent Love* is a fierce defense of a mother's right to love intelligently, the value of parents' firsthand knowledge about their children, and an individual's right to be valued by society. language that separates experts from laypeople parental advocacy and activism call these distinctions into question Silverman reveals how parental care has been a constant driver in the volatile field of autism research and treatment and has served as an inspiration for scientific change Recognizing the importance of parental knowledge and observations in treating autism this book reveals that effective responses to the disorder demonstrate the mutual interdependence of love and science

Psychoanalysis as a Spiritual Discipline Paul Marcus, 2021-04-27 The great existential psychiatrist Ludwig Binswanger famously pointed out to Freud that therapeutic failure could only be understood as the result of something which could be called a deficiency of spirit Binswanger was surprised when Freud agreed asserting Yes spirit is everything However spirit and the spiritual realm have largely been dropped from mainstream psychoanalytic theory and practice This book seeks to help revitalize a culturally aging psychoanalysis that is in conceptual and clinical disarray in the marketplace of ideas and is viewed as a theory in crisis no longer regarded as the primary therapy for those who are suffering The author argues that psychoanalysis and psychoanalytic psychotherapy can be reinvigorated as a discipline if it is animated by the powerfully evocative spiritual moral and ethical insights of two dialogical personalist religious philosophers Martin Buber a Jew and Gabriel Marcel a Catholic who both initiated a Copernican revolution in human thought In chapters that focus on love work faith suffering and clinical practice Paul Marcus shows how the spiritual optic of Buber and Marcel can help revive and refresh psychoanalysis and bring it back into the light by communicating its inherent vitality power and relevance to the mental health community and to those who seek psychoanalytic treatment

Edoardo Weiss Paul Roazen, 2017-12-04 Edoardo Weiss 1889 1970 was a favored disciple of Freud and is acknowledged as the founder of psychoanalysis in Italy Although he was the author of six books and over a hundred professional papers he has remained a shadowy figure In this volume Paul Roazen provides a definitive portrait of this notable individual Based on his extensive interviews with Weiss Roazen evaluates the significance of Weiss's own contribution to psychoanalytic thought and practice and presents a fascinating picture of the reception given to Freud's thought in Italy Despite his prominence Weiss's life and work has not been well documented Roazen shows that his links to modern Italian history and culture were extensive and closely bound to the political and social conflicts of the twentieth century Born in the cosmopolitan city of Trieste Weiss was the nephew of the novelist Italo Svevo whose masterpiece The Confessions of Zeno remains one of the principle psychoanalytic novels in modern literature Another Triestine Umberto Saba one of the great modern Italian poets was Weiss's patient Weiss's career also intersected with Italian politics The daughter of one of Mussolini's cabinet ministers was one of his patients an analysis that has raised questions about Freud's own relation to the Italian dictator Roazen documents Weiss's tribulations in trying to establish a psychoanalytic culture opposed not only by the fascist regime but the Catholic Church In spite of these instances of opposition Roazen shows that the Italian intellectual world was highly receptive to Freudian ideas and that psychoanalysis is flourishing today in Italy Weiss has never before been recognized as a front rank analytic thinker but he

was leader of the movement in Italy a country that mattered deeply to Freud This along with the genuine intimacy of his contacts with Freud makes Weiss a figure of considerable interest to students of psychoanalysis Italian culture and intellectual history

In a Different Key John Donvan, Caren Zucker, 2016-01-19 PULITZER PRIZE FINALIST NEW YORK TIMES BESTSELLER Sweeping in scope but with intimate personal stories this is a deeply moving book about the history science and human drama of autism Walter Isaacson 1 New York Times bestselling author of *The Code Breaker* Remarkable A riveting tale about how a seemingly rare childhood disorder became a salient fixture in our cultural landscape The Wall Street Journal Ten Best Nonfiction Books of the Year The inspiration for the PBS documentary *In a Different Key* In 1938 Donald Triplett of Forest Mississippi became the first child diagnosed with autism Beginning with his family's odyssey *In a Different Key* tells the extraordinary story of this often misunderstood condition from the civil rights battles waged by the families of those who have it to the fierce debates among scientists over how to define and treat it Unfolding over decades *In a Different Key* is a beautifully rendered history of people determined to secure a place in the world for those with autism by liberating children from dank institutions campaigning for their right to go to school challenging expert opinion on what it means to have autism and persuading society to accept those who are different This is also a story of fierce controversies from the question of whether there is truly an autism epidemic and whether vaccines played a part in it to scandals involving facilitated communication one of many unsuccessful treatments to stark disagreements about whether scientists should pursue a cure for autism to compelling evidence that Hans Asperger discoverer of the syndrome named after him participated in the Nazi program that consigned disabled children to death By turns intimate and panoramic *In a Different Key* takes us on a journey from an era when families were shamed and children were condemned to institutions to one in which a cadre of people with autism push not simply for inclusion but for a new understanding of autism as difference rather than disability

Emotionally Disturbed Deborah Blythe Doroshow, 2019-04-26 Before the 1940s children in the United States with severe emotional difficulties would have had few options for care The first option was usually a child guidance clinic within the community but they might also have been placed in a state mental hospital or asylum an institution for the so called feeble-minded or a training school for delinquent children Starting in the 1930s however more specialized institutions began to open all over the country Staff members at these residential treatment centers shared a commitment to helping children who could not be managed at home They adopted an integrated approach to treatment employing talk therapy schooling and other activities in the context of a therapeutic environment *Emotionally Disturbed* is the first work to examine not only the history of residential treatment but also the history of seriously mentally ill children in the United

States As residential treatment centers emerged as new spaces with a fresh therapeutic perspective a new kind of person became visible the emotionally disturbed child Residential treatment centers and the people who worked there built physical and conceptual structures that identified a population of children who were alike in distinctive ways Emotional disturbance became a diagnosis a policy problem and a statement about the troubled state of postwar society But in the late twentieth century Americans went from pouring private and public funds into the care of troubled children to abandoning them almost completely Charting the decline of residential treatment centers in favor of domestic care based models in the 1980s and 1990s this history is a must read for those wishing to understand how our current child mental health system came to be

What Matters Most Leonard Sweet, 2012-03-13 Belief can exist in isolation but faith requires a relationship Why wade in the shallows of belief when you can plunge into the depths of faith Belief involves a different way of thinking but faith brings about a new way of living It grows through direct experience and a close relationship both of which come as you follow Jesus As Christians we often talk about developing a personal relationship with Christ but instead of pursuing a relationship we pursue knowledge We are tempted to place confidence in our definite settled beliefs which offer a pale substitute for the daily adventure of an honest relationship with Jesus In *What Matters Most* Leonard Sweet presents a challenging and compelling approach to belief that is joined by dynamic engagement with God You are invited to explore the uncharted regions of faith by following Jesus completely on his terms Once you begin you will never go back to mere belief
