Factors in the Pathogenesis of Cardiovascular Diseases Dragan M. Djuric, Devendra K. Agrawal, 2024-08-01 Environmental conditions and processes are one of the major pillars on which the human well being rests It is the core responsibility of the society to preserve and enhance better conditions for the human well being Indeed there are several evolving unmet needs in public health Emerging and re emerging infectious diseases and a surge in the incidence of non communicable diseases including cardiovascular diseases CAD chronic respiratory diseases and metabolic diseases have been impediments to sustainable well being Many factors are critical in the global surge in the rate and incidence of cardiovascular diseases These include the shift from acute to chronic conditions the shift from single risk factor vs multiple influences aging population global health disparities exposure to lower harmful influences over a longer period etc However

the epigenetic factors due to unhealthy environment play a most significant role in the underlying pathogenesis of cardiovascular diseases. Unfortunately this has been ignored for a long time and realized lately to expand and disseminate knowledge to general population expand research activities to investigate the cellular and molecular mechanisms and develop better preventive and treatment strategies. The most significant environmental impoverishment in the pathogenesis of cardiovascular diseases include different genetical chemical physical and biological influences but not limited to socio economic status and lack of nutrients nutritional aspects including habits diets and additives inhaled and ingested pollutants exhaust gas and gasoline products tobacco smoke water pollution alcohol consumption soil and mineral pollution solvents pesticides microplastics non critical usage of drugs climate change extreme atmospheric conditions extremes in noise and temperature electromagnetic influences microwaves and radiation outdoor light pollution mental stressors lack of or over exercise microbiota and microbiological agents like SARS CoV 2 virus etc

 Sandra Alters, Wendy Schiff, 2011-01-28 Health Wellness *Nursing for Wellness in Older Adults* Carol A. Miller, 2009 Now in its Fifth Edition this text provides a comprehensive and wellness oriented approach to the theory and practice of gerontologic nursing. Organized around the author's unique functional consequences theory of gerontologic nursing the book explores normal age related changes and risk factors that often interfere with optimal health and functioning to effectively identify and teach health promotion interventions. The author provides research based background information and a variety of practical assessment and intervention strategies for use in every clinical setting. Highlights of this edition include expanded coverage of evidence based practice more first person stories new chapters and clinical tools such as assessment tools recommended by the Hartford Institute of Geriatric Nursing

Biology of Women's Heart Health Lorrie Kirshenbaum, Inna Rabinovich-Nikitin, 2023-11-18 Cardiovascular disease CVD is the leading cause of morbidity and mortality in women and men worldwide and represents a major financial burden to world health care systems. Importantly CVD has eclipsed cancer as the leading cause of death for women globally. Through advancements in research and clinical testing the symptoms and risk factors for CVD have been well established for men but not for women. Consequently there is an immediate need for new innovative research that will bridge this gap and allow for improved early diagnosis and treatment of CVD in women. This book will serve as a guide for health care providers to better understand the physiological biochemical and genetic differences in heart disease in women with the goal of providing improved education awareness and treatment of cardiovascular disease in women. The book will cover topics such as sex dependent clinical outcomes of cardiovascular disease cardiac protection by estrogen cardiac health during menopause cardiac rehabilitation programs fitness and exercise cardio oncology shift work and the CVD risk and pregnancy related CVD

Biochemistry of Cardiovascular Dysfunction in Obesity Paramjit S. Tappia, Sukhwinder K. Bhullar, Naranjan S. Dhalla, 2020-10-03 Obesity is an independent risk factor for cardiovascular disease CVD in adults as well as in obese children. This book will provide a description of the impact of obesity

on the cardiovascular system and increased predisposition to CVD It will identify the major biochemical mechanisms that lead to the occurrence of myocardial abnormalities and vascular alterations in obesity We will also have some discussion on the biochemistry of the so called obesity paradox in relation to CVD The contributors to this book are international experts on obesity and associated cardiovascular complications This book is also uniquely positioned as it focuses on the biochemistry of obesity induced cardiovascular dysfunction There are 20 chapters in 2 different parts in this book comprising of Part A Pathophysiology of Cardiovascular Complications in Obesity 11 chapters and Part B Modification of Cardiovascular Dysfunction in obesity 9 chapters The intent of this volume is to provide current and basic understanding of the biochemical mechanisms of obesity induced cardiovascular dysfunction that will be of value not only to cardiologists and other allied health professionals but will also stimulate and motivate biomedical researchers and scientists to find the way to prevent the epidemic of obesity associated cardiovascular abnormalities Furthermore this book will serve as a highly useful resource for medical students fellows residents and graduate students with an interest in the cardiovascular system In summary this book covers a broad range of biochemical mechanisms of obesity induced cardiovascular complications We hope that the reader will understand that obesity is linked to an increase in the risk and occurrence of fatal CVD Furthermore the underlying message presented in the book is that the cause of obesity related disorders is complex and that understanding the biochemistry of cardiovascular dysfunction may contribute to the development of novel interventions for the prevention and treatment of obesity associated comorbidities
