Post-Truth Society Arpad Szakolczai, 2021-11-29 It is widely asserted that we are now living in a post truth society What that means this book argues is that the contemporary global world is thoroughly infested not only with trickster figures but an entire and operational trickster logic or that we now live in a Trickster Land an argument advanced by the claim that in modernity liminality has become permanent or that modern life is patently absurd The first part of the book presents a series of guides to this condition in the form of key thinkers and writers who can help us understand and navigate our Trickster Land Such guides include Hermann Broch Lewis Hyde Roberto Calasso Michel Serres S ndor M rai Colin Thubron and Albert Camus The second part goes on to discuss five main regions of Trickster Land art thought the economy politics and society This last central chapter of the book contrasts trickster logic with the basic foundational logic of social life presented as gift giving by Marcel Mauss and as sociability by Georg Simmel and which is expressed here combining Heraclitus and Plato with the Gospel of John by three basic terms of ancient Greek culture as *arkh charis logos* meaningful social life originally and in its essence is animated by the power of kind benevolence This volume will appeal to scholars of social theory anthropology and sociology with interests in political thought and contemporary culture

A Player's Guide to the Post-Truth Condition Steve Fuller, 2020-11-20 A Player's Guide to the Post Truth Condition The Name of the Game presents sixteen short readable chapters designed to leverage our post truth condition's deep historical and philosophical roots into opportunities for unprecedented innovation and change Fuller offers a bracing proactive and hopeful vision against the tendency to demonize post truth as the realm of fake news and bullshit Where others see threats to the established order Fuller sees opportunities to overturn it This theme is pursued across many domains including politics religion the economy the law public relations journalism the performing arts and academia not least academic science The red thread running through Fuller's treatment is that these domains are games that cannot be easily won unless one can determine the terms of engagement which is to say the name of the game This involves the exercise of modal power which is the capacity to manipulate what people think is possible Once the necessarily true appears to be only contingently so then the future suddenly becomes a more open space for action This was what frightened Plato about the alternative realities persuasively portrayed by playwrights in ancient Athens Nevertheless Fuller believes that it should be embraced by denizens of today's post truth condition
