New Horizons in Medical Anthropology Margaret

Lock, Mark Nichter, 2003-09-02 *New Horizons in Medical Anthropology* is a festschrift in honor of Charles Leslie whose influential career helped shape this subfield of anthropology. This collection of cutting edge essays explores medical innovation and medical pluralism at the turn of the 21st century. The book accomplishes two things: it reflects recent research by medical anthropologists working in Asia who have been inspired by Charles Leslie's writing on such topics as medical pluralism and the early emergence of what has become a globalized biomedicine; the social relations of therapy management and the relationship between the politics of the state and discourse about the health of populations; illness and medicine. The book also takes up lesser known aspects of Leslie's work: his contribution as an editor and the role he played in carrying the field forward; his ethics as a medical anthropologist committed to humanism and sensitive to racism and eugenics; and the passion he inspired in his co-workers and students. Charles Leslie is a remarkable and influential social scientist. *New Horizons in Medical Anthropology* is a fitting tribute to a sensitive scholar whose theories and codes of practice provide an essential guide to future generations of medical anthropologists.

It ends with health insurance, longevity risk, long term care insurance, life insurance, financial products, and social insurance. This second version of the *Handbook* contains 15 new chapters. Each of the 37 chapters has been written by leading authorities in risk and insurance research; all contributions have been peer reviewed, and each chapter can be read independently of the others.

Theories of Uncertainty and Risk across Different Modernities Patrick Brown, 2018-12-07 Setting out to challenge various common assumptions in risk research, this collection explores how uncertainty is handled in a range of social contexts across the globe. Social science research often emphasises the salience of risk and uncertainty for grasping the dynamics of late modern societies, with theoretical frameworks tending to associate the emergence of risk with particular, fairly homogenous European or North Western paths of modernisation. These theoretical narratives can be seen as shaping various assumptions regarding risk cultures, not least associations with post-traditional, largely secular and liberal characteristics. Risk is therefore analysed in terms of modern, active, rational citizens; meanwhile, faith, hope, or magic are implicitly relegated to the past, the oriental, the passive, and/or the irrational. Central to the book is the consideration of risk across a range of different modernities. While the precise meaning and organisational processes of risk vary, we see the common combining of risk, faith, magic, and hope as people go forward amid uncertain circumstances. Whether seeking health amid illness, survival amid flooding, or safety amid migration, we explore the

pertinence of risk around the globe We also stress the ubiquity of faith and the magical in various modern settings This book was originally published as a special issue of Health Risk Society
