Risk Communication and Public Health ,2010

Bringing together a wide variety of perspectives on risk communication this up to date review of a high profile and topical area includes practical examples and lessons *Communicating Risk in Public Health Emergencies* World Health Organization, 2017 During public health emergencies people need to know what health risks they face and what actions they can take to protect their health and lives Accurate information provided early often and in languages and channels that people understand trust and use enables individuals to make choices and take actions to protect themselves their families and communities from threatening health hazards Publisher's description *Risk, Communication And Health Psychology* Berry, Dianne, 2004-05-01 This is the first book to clearly assess the increasingly important area of communication of risk in the health sector We are moving away from the days when paternalistic doctors managed healthcare without involving patients in decision making With the current emphasis on patient empowerment and shared decision making patients want and need reliable comprehensive and understandable information about their conditions and treatment In order to make informed decisions the people concerned must understand the risks and benefits associated with possible treatments But the challenge for health professionals is how best to communicate this complex medical information to diverse audiences

Global Public Health Communication Muhiuddin Haider, 2005 Public health officials are constantly dispensing important health information to the masses through various media outlets This comprehensive practical new book teaches important skills and techniques to communicate public health issues effectively including health communication in emergency preparedness the importance of social marketing techniques public private partnerships building direct links between communication and health service delivery by way of pragmatic strategies maximizing information reach through interdisciplinary planning and much more ***Effective Risk Communication*** V.T. Covello, David B. McCallum, Maria T. Pavlova, 2012-12-06 One of the greatest challenges facing those concerned with health and environmental risks is how to carry on a useful public dialogue on these subjects In a democracy it is the public that ultimately makes the key decisions on how these risks will be controlled The stakes are too high for us not to do our very best The importance of this subject is what led the Task Force on Environmental Cancer and Heart and Lung Disease to establish an Interagency Group on Public Education and Communication This volume captures the essence of the Workshop on the Role of Government in Health Risk Communication and Public Education held in January 1987 It also includes some valuable appendixes with practical guides to risk communication As such it is an important building block in the effort to improve our collective ability to carry on this critical public dialogue Lee M Thomas Administrator U S Environmental Protection Agency and Chairman The Task Force on Environmental Cancer and Heart and Lung Disease Preface The Task Force on Environmental Cancer and Heart and Lung Disease is an interagency group established by the Clean Air Act Amendments of 1977 P L 95 95 Congress mandated the Task Force to recommend research to determine the relationship between environmental pollutants and human disease and to recommend research aimed at reducing the incidence of environment related disease The Task Force's Project Group on

Risk and Health Communication in an Evolving Media Environment H. Dan O'Hair, 2018-01-12 Broadcast media has a particular fascination with stories that involve risk and health crisis events disease outbreaks terrorist acts and natural disasters contexts where risk and health communication play a critical role An evolving media landscape introduces both challenges and opportunities for using communication to manage extreme events and hazardous contexts Risk and Health Communication in an Evolving Media Environment addresses issues of risk and health communication with a collection of chapters that reflect state of the art discussion by top scholars in the field The authors in this volume develop unique and insightful perspectives by employing the best available research on topics such as brand awareness in healthcare communication occupational safety climate change communication local broadcasts of weather emergencies terrorism and the Ebola outbreak among many other areas It features analysis of new and traditional media that connects disasters crises risks and public policy issues into a coherent fabric This book bridges a substantial but sometimes disconnected body of literature and by doing so asks how contexts related to risk and health communication are best approached how researchers balance scientific findings with cultural issues and how scholars study an increasingly media savvy society with traditional research methods

Risk Communication in Public Health and Health Security Petra Dickmann, 2017 Risk communication is a core capacity under the World Health Organisation's WHO International Health Regulations 2005 and an important part of modern public health practice However while international legislative frameworks set the scope of risk communication there is a demand for increasing and improving evidence and skills in risk communication research policy and strategy development evaluation of practice and sustainable capacity building This cumulative habilitation describes the major contributions to the field of risk communication in public health and health security both at a thematic content level of risk communication research policy and practice and at a broader methodological level It introduces the new conceptual paradigm of risk communication that moves risk communication from being a technical capacity to convey health risk information to a targeted audience to a governance approach with three strategic axes of information gathering assessing and sharing communication strategies key messages and means of communication and coordination at various administrative levels It introduces a new system to understand risk communication practice by providing a matrix of risk communication activities such as information listening communication relationship building and coordination supportive environments across the lifecycle of an event e.g. outbreak before during and after Adopting this new perspective can generate innovative insights as demonstrated in the field of antimicrobial resistance The new paradigm and its methodology can also support strategy development at health policy level and facilitate the assessment of public health security The Marburg Biosafety and Biosecurity Scale MBBS is a framework for rational risk assessment and risk communication and offers a new metric to assess biosafety and biosecurity that can also guide capacity building in these areas
