Rites Of Winter:

Coming Down from Above Lee Irwin, 2014-10-20 For longer than five centuries Native Americans have struggled to adapt to colonialism missionization and government control policies This first comprehensive survey of prophetic movements in Native North America tells how religious leaders blended indigenous beliefs with Christianity's prophetic traditions to respond to those challenges Lee Irwin gathers a scattered literature to provide a single volume overview that depicts American Indians creative synthesis of their own religious beliefs and practices with a variety of Christian theological ideas and moral teachings He traces continuities in the prophetic tradition from eighteenth century Delaware prophets to Western dream dance visionaries showing that Native American prophecy was not merely borrowed from Christianity but emerged from an interweaving of Christian and ancient North American teachings integral to Native religions From the highly assimilated ideas of the Puget Sound Shakers to such resistance movements as that of the Shawnee Prophet Irwin tells how the integration of non Native beliefs with prophetic teachings gave rise to diverse ethnotheologies with unique features He surveys the beliefs and practices of the nation to which each prophet belonged then describes his or her life and teachings the codification of those teachings and the impact they had on both the community and the history of Native religions Key hard to find primary texts are included in an appendix An introduction to an important strand within the rich tapestry of Native religions Coming Down from Above shows the remarkable responsiveness of those beliefs to historical events It is an unprecedented encyclopedic sourcebook for anyone interested in the roots of Native theology

The Cults of the Greek States Lewis Richard Farnell, 1909

Hidatsa Social and Ceremonial Organization Alfred W. Bowers, 1965 Hidatsa Social and Ceremonial Organization a study of an important horticultural Plains Indian tribe synthesizes the rich material Alfred W Bowers recorded in the early 1930s from the last generation of Hidatsas who lived in

the historic village of Like a Fishhook This documentary record of their nineteenth century lifeways is now a classic in American ethnography The book is distinguished for its presentation of extensive personal and ritual narratives that allow Hidatsa elders to articulate directly their conceptions of traditional culture It combines archeological and ethnographic approaches to reconstruct a Hidatsa culture history that is shaped by a concern for cultural detail stemming from the American ethnographic tradition of Franz Boas At the same time its concern for the understanding of social structure reflects the influence of the British structural functional approach of A R Radcliffe Brown The most comprehensive account ever published on the Hidatsas it is of enduring value and interest A HISTORY OF ANCIENT CHINESE MUSIC AND DANCE

Wang Ningning, 2019-11-04 A History of Ancient Chinese Music and Dance describes the history of music and dance in ancient China in the past five thousand years in the forms of poems music and dance It includes court music and dance music and dance in drama and folk music and dance It covers historical and professional knowledge such as music dance poetry and drama The book consists of eleven chapters from ancient times to the Ming Dynasty and the Qing Dynasty In each chapter there are historical background music and dance works people events and related poetry and images The Yellow Emperor created tonality for wind instruments Emperor Yao and Emperor Shun invented musical instruments qin and se Duke of Zhou made system of rites and music Apart from these music dance and acrobatics in the Qin Dynasty and the Han Dynasty grand compositions in the Tang Dynasty and the Song Dynasty and music and dance in drama in the Ming Dynasty and the Qing Dynasty can all lead us to the long developing process of ancient music and dance The book was the Project of 2003 National Tenth Five Year Plan for Art Science in China It was co funded by the National Publishing Fund and China Classics International of the General Administration of Press and Publication **The Origin of Table Manners** Claude Lévi-Strauss, 1990-11-08 The Origin of Table Manners is the third volume of a tetralogy devoted to American Indian mythology Unlike the first two volumes The Raw and the Cooked From Honey to Ashes which are devoted to South American myths the present one establishes relations with North America which is the subject of the fourth The Naked Man In the course of the analysis the myths link up with ideas of more general interest Thus we find discussions of numeration of morals and of the origin of the novel The Origin of Table Manners is thus of special interest to students of American Indian mythology although it contains ideas of interest to other fields and even to the general reader Daniel C Raffalovich American Anthropologist An immense anthropological erudition is here wielded by one of the world s finest minds and the myths themselves have never been taken more seriously L vi Strauss raises issues and then resolves them with the suspenseful cunning of a mystery novelist John Updike New Yorker The Logic of Practice Pierre Bourdieu, 1990 Our usual representations of the opposition between the civilized and the primitive derive from willfully ignoring the relationship of distance our social science sets up between the observer and the observed In fact the author argues the relationship between the anthropologist and his object of study is a particular instance of the relationship between knowing and doing interpreting

and using symbolic mastery and practical mastery or between logical logic armed with all the accumulated instruments of objectification and the universally pre logical logic of practice In this his fullest statement of a theory of practice Bourdieu both sets out what might be involved in incorporating one's own standpoint into an investigation and develops his understanding of the powers inherent in the second member of many oppositional pairs that is he explicates how the practical concerns of daily life condition the transmission and functioning of social or cultural forms The first part of the book Critique of Theoretical Reason covers more general questions such as the objectivization of the generic relationship between social scientific observers and their objects of study the need to overcome the gulf between subjectivism and objectivism the interplay between structure and practice a phenomenon Bourdieu describes via his concept of the habitus the place of the body the manipulation of time varieties of symbolic capital and modes of domination The second part of the book Practical Logics develops detailed case studies based on Bourdieu's ethnographic fieldwork in Algeria These examples touch on kinship patterns the social construction of domestic space social categories of perception and classification and ritualized actions and exchanges This book develops in full detail the theoretical positions sketched in Bourdieu's Outline of a Theory of Practice It will be especially useful to readers seeking to grasp the subtle concepts central to Bourdieu's theory to theorists interested in his points of departure from structuralism especially from L. vi Strauss and to critics eager to understand what role his theory gives to human agency It also reveals Bourdieu to be an anthropological theorist of considerable originality and power
