Christianity as Distinct Practices Jan-Olav Henriksen, 2019-01-10 Jan Olav Henriksen reconstructs and analyzes Christianity as a cluster of practices that manifest a distinct historically and contextually shaped mode of being in the world Henriksen suggests that these practices imply a complicated relationship between the tradition in which they originate the community that emerges from and is constituted by that tradition and the individuals who appropriate the tradition that these communities mediate through their practices Thus to think of Christianity simply in terms of belief is misleading and represents an underdetermination of its distinct character Henriksen further argues this relationship needs to be described primarily as practices aimed at

orientation and transformation His analysis points to Christianity's similarity to other religions in regard to the functional or pragmatic dimensions it displays Examining facets such as prayer the use of scripture preaching and doctrine Henriksen emphasizes that the element that makes a practice distinctively Christian is how it relates to and is informed by the Jesus story

New Religions and Globalization Armin Geertz,Margit Warburg,2008-08-01 Globalization is a predominant theme in contemporary educational and political circles Research on globalization has become a political priority because the world has become a single place as Roland Robertson formulated it where events in any particular part of the world can and often do have political economical and military consequences for the rest of the world Discourse on globalization however has generally ignored the cultural consequences Recent waves of violence that seem to be religiously fueled if not motivated among immigrants and refugees in Europe and their home regions in the Middle East have demonstrated that we can only ignore culture values and religion at our own peril Globalization and new religions is the theme of this book It is argued here that studying new religions in a globalization perspective offers theoretical and methodological advantages both for the general study of religion and the general study of globalization Religions are often cosmopolitan and universal in their overall message yet they may at the

same time be utterly immersed in local interactions This is often clearly expressed among minority religions The contrast of the local and the global is accentuated by globalization and in particular many new religions have followed suit This book draws together a selection of top quality papers given at a conference held in Aarhus in 2002 under the auspices of the Research Network on New Religions RENNER The papers which have been edited and up dated represent the work of leading scholars in the history of religions sociology of religion psychology of religion and other disciplines They address questions that are vital for everyone in the modern world whether approached as a reflection of world economy and power dynamics new possibilities of communication and cultural exchange in the light of mass media and technology increased cultural plurality in the wake of migration or as a combination of any of these globalization challenges the academic study of religion to renewed theoretical and methodological reflection

New Religious Movements and Comparative Religion Olav Hammer, Karen Swartz, 2024-02-22 This Element provides an introduction to a number of less frequently explored approaches based upon the comparative study of religions New religions convey origin myths present their particular views of history and craft Endtime scenarios Their members carry out a vast and diverse array of ritual activities They produce large corpuses of written texts and designate a subset of these as a sacrosanct canon They focus their attention on material objects that can range from sacred buildings to objects from the natural world that are treated in ritualized fashion The reason for this fundamental similarity between older and newer religions is briefly explored in terms of the cognitive processes that underlie religious concepts and practices A final section returns to the issue of how such shared processes take specific shapes in the context of modern Western societies
