Perilous Place, Powerful Storms Craig E. Colten, 2010-06-30 The hurricane protection systems that failed New Orleans when Katrina roared on shore in 2005 were the product of four decades of engineering hubris excruciating delays and social conflict In *Perilous Place Powerful Storms* Craig E Colten traces the protracted process of erecting massive structures designed to fend off tropical storms and examines how human actions and inactions left the system incomplete on the eve of its greatest challenge Hurricane Betsy in 1965 provided the impetus for Congress to approve unprecedented hurricane protection for the New Orleans area Army Engineers swiftly outlined a monumental barrier network that would not only safeguard the city at the time but also provide for substantial growth Scheduled for completion in 1978 the project encountered a host of frustrating delays From newly imposed environmental requirements to complex construction challenges to funding battles to disputes over proper structures the buffer envisioned for southeast Louisiana remained incomplete forty years later as Hurricane Katrina bore down on the city As Colten reveals the very remedies intended to shield the city ultimately contributed immensely to the residents vulnerability by encouraging sprawl into flood prone territory that was already sinking within the ring of levees *Perilous Place Powerful Storms* illuminates the political social and engineering lessons of those who built a hurricane protection system that failed and serves as a warning for those guiding the recovery of post Katrina New Orleans and Louisiana

Walking to New Orleans Robert R. N. Ross,Deanne E. B. Ross,2008-09-22 Two and a half years after the devastation of Hurricanes Katrina and Rita New Orleans and south Louisiana continue to struggle in an unsettled gumbo of environmental social and rebuilding chaos Citizens await the fruition of four successive recovery and reconstruction planning processes and the realization of essential infrastructure repairs Repopulation in Orleans Parish has slowed considerably the parish remains at best two thirds of its former size thousands of former residents who wish to return face barriers of many kinds Heroic efforts at rebuilding have occurred through the efforts of individual neighborhood associations and voluntary associations who have attempted to address serious losses in affordable housing and health care services Walking to New Orleans traces how a dominant but paradoxical model of the relation between the human and natural worlds in Western culture has informed many environmental and engineering dilemmas and has contributed to the history of social inequities and injustice that anteceded the disasters of the hurricanes and subsequent flooding It proposes a model for collaborative recovery that links principles of ethics and engineering in which citizens become active ongoing participants in the process of the reconstruction and redesign of their unique locus of habitation Equally important it gives voice to the citizens and associations who are desperately working to rebuild their homes and lives both in urban New Orleans and in the villages of coastal Louisiana *Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations for Fiscal Year 2008* United States.
