Love's Enlightenment Ryan Patrick Hanley, 2017-03-30 A number of prominent moral philosophers and political theorists have recently called for a recovery of love But what do we mean when we speak of love today Love s Enlightenment examines four key conceptions of other directedness that transformed the meaning of love and helped to shape the way we understand love today Hume s theory of humanity Rousseau s theory of pity Smith s theory of sympathy and Kant s theory of love It argues that these four Enlightenment theories are united by a shared effort to develop a moral psychology that can provide both justificatory and motivational grounds for concern for others in the absence of recourse to theological or transcendental categories In this sense each theory represents an effort to redefine the love of others that used to be known as caritas or agape a redefinition that came with benefits and costs that have yet to be fully appreciated

Includes a special message from the editor as well as an excerpt from another Loveswept title **So You Want to be a Scientist?** Philip A. Schwartzkroin, 2009-08-27 What does it take to be a scientist Equally important what does it take to be happy as a scientist Drawing on thirty years of experience Philip Schwartzkroin offers the budding scientist an invaluable glimpse into the day to day life of the researcher filling a huge hole in the education of most would be scientists whether undergraduates or high school seniors As Schwartzkroin points out many of the most important things researchers learn as they hone their craft are not written down anywhere And many of these insights come as a surprise to the naive and well meaning student who somehow believes that doing research is an occupation that is substantially different from doing a job in the real world This book looks at the job of science Starting with suggestions about how to decide whether you'd want to pursue such a career and if so how to get started the book works through some of the obvious topics relevant to a research profession how to write a paper give a talk construct a grant proposal It also examines less obvious topics that are generally incorporated into a research education only by trial and error thinking like a scientist negotiating scientific politics dealing with research ethics and understanding social interactions And the book includes many real life situations that may confront the young scientist along with the author's advice on how to solve these problems Based on the author's long career in the laboratory and his rich experience mentoring trainees So You Want to be a Scientist provides information and insights that will help the young scientist make better decisions and choices It will also be useful to teachers counselors and parents for its realistic look at the demands and requirements for success in a research career *A Philosophical Anthropology Drawn from Simone Weil's Life and Writings* Helen E. Cullen, 2017-11-07 A Philosophical Anthropology Drawn from Simone Weil's Life Writings situates Weil's thought in the time between the two world wars through which she lived and traces Weil's consistent conception of a mind/body dualism in the Cartesian sense to a dualism that places the mind within a carnal part of the soul and establishes an eternal part of the soul as the essence of human beings Helen Cullen argues that in Weil's early conception of human nature her Cartesian conception of perception already shows a glimpse of the eternal Weil's dualistic conception also forms the basis of her political analysis of the left of her time and through working in factories and in the fields she develops a conception of labour as a theory of action and work with a method Weil was influenced by leading thinkers of her time prompting her to do an analysis of current scientific theories Cullen argues that Weil's analysis of Christianity already present in Greek philosophy shows us a theory of identical thought inherited from the East India and China and brought forth by peoples around Israel This theory leads to Weil's analysis developed in *The Need for Roots* of how we've been uprooted through colonization and how we can grow roots in a free local society both rural and urban Capital Campaigns Andrea Kihlstedt, 2010 CD ROM contains resources charts graphs and checklists and campaign samples
