Interculturality in Schools Robyn Moloney,Maria Lobytsyna,John De Nobile,2022-07-26 This book provides a comprehensive study of professional learning courses in intercultural settings exploring how this impacts teachers and brings about change in classrooms culture across schools as a whole and children s lives The authors argue that teachers and schools must raise the stakes globally in an intercultural practice grounded in educational equity and anti racism Identifying the attributes that make a difference in teacher intercultural learning and change through analysis of both quantitative and qualitative data the study throws up marked tensions and contradictions between the desire to explore both an abstract personal concept and achieve practical outcomes in schools As case studies of two primary schools dig deep into teachers lives the book proposes a model of personal teacher interculturality which is constructed from the inside out The potential of neglected spaces in schools for intercultural identity is also highlighted by images of new practice This book is a supportive resource for schools or educational institutions in any global context that are seeking a fresh approach to intercultural education and holistic change The Subject Index to Periodicals ,1928 *Language and Minority Rights* Stephen

May,2013-06-17 The second edition addresses new theoretical and empirical developments since its initial publication including the burgeoning influence of globalization and the relentless rise of English as the current world language May s broad position however remains largely unchanged He argues that the causes of many of the language based conflicts in the world today still lie with the nation state and its preoccupation with establishing a common language and culture via mass education The solution he suggests is to rethink nation states in more culturally and linguistically plural ways while avoiding at the same time essentializing the language identity link This edition like the first adopts a wide interdisciplinary framework drawing on sociolinguistics applied linguistics sociology political theory education and law It also includes new discussions of cosmopolitanism globalization the role of English and language and mobility highlighting the ongoing difficulties faced by minority language speakers in the world today

useful for event managers the moment we attempt to advance knowledge about events as social cultural and political phenomena we realise the extent to which the field is theoretically impoverished Event studies it is argued must transcend overt business like perspectives in order to grasp events in their complexities This book challenges the reader to reach beyond the established modes of thinking about events by placing them against a backdrop of much wider critical discourse Approaches and Methods in Event Studies emerges as a conceptual and methodological tour de force comprising the works of scholars of diverse backgrounds coming together to address a range of philosophical theoretical and methods related problems The areas covered include the concepts of eventification and eventual approaches to events a mobilities paradigm rhizomatic events critical discourse analysis visual methods reflexive and ethnographic research into events and indigenous acumen Researchers and students engaged in the study of events will draw much inspiration from the contributions and from the volume as a whole
