to understand or appreciate the transformative power of science fiction **Back in the Spaceship Again** Karen Sands-O'Connor, Marietta Frank, 1999-08-30 Much literature for children appears in the form of series in which familiar characters appear in book after book In the late nineteenth and early twentieth century authors began to write science fiction series for children These early series generally had plots that revolved around inventions developed by the protagonist But it was the development and use of rocket and atomic science during World War II that paved the way for interesting and exciting new themes conflicts and plots While much has been written about the early juvenile science fiction series particularly the Tom Swift books comparatively little has been written about children s science fiction series published since 1945 This book provides a broad overview of this previously neglected topic The volume offers a critical look at the history themes characters settings and construction of post 1945 juvenile science fiction series including the A I Gang the Animorphs Commander Toad Danny Dunn Dragonfall Five the Magic School Bus and Space Cat The book begins with an introductory history of juvenile science fiction since 1945 with chapters then devoted to particular topics Some of these topics include the role of aliens and animals attitudes toward humor the absence and presence of science and the characterization of women A special feature is an appendix listing the various series In addition the volume provides extensive bibliographical information

A Spaceship Named McGuire Randall Garrett,2016-01-21 No Nobody ever deliberately named a spaceship that The staid and stolid minds that run the companies

which design and build spaceships rarely let their minds run to fancy The only example I can think of is the unsung hero of the last century who had puckish imagination enough to name the first atomic powered submarine Nautilus Such minds are rare Most minds equate dignity with dullness This ship happened to have a magnetogravitic drive which automatically put it into the MG class It also happened to be the first successful model to be equipped with a Yale robotic brain so it was given the designation MG YR 7 the first six had had more bugs in them than a Leopoldville tenement So somebody at Yale another unsung hero named the ship McGuire it wasn't official but it stuck The next step was to get someone to test hop McGuire They needed just the right man quick minded tough imaginative and a whole slew of complementary adjectives They wanted a perfect superman to test pilot their baby even if they knew they'd eventually have to take second best **Unission** Udo Daumer,2024-12-13 Overpopulation lack of resources natural disasters this is the future in the year 2199 The richest have emigrated to Mars the Earth is bursting at the seams due to overpopulation Technical development is progressing rapidly but the scarcity of resources is also affecting the people on Mars A solution must be found The Americans launch Unission One Two spaceships equipped with the latest technology set off on a mission into the universe Their goal to find planets on which human life is possible To do this the spaceships are to travel to the end of the infinitely expanding universe a return to Earth is not planned Will they find planets to ensure the survival of mankind Lesser Ruins Mark Haber,2024-10-08 From the author of Reinhardt's Garden and Saint Sebastian's Abyss comes a breathless new novel of delirious obsession Bereft after the death of his ailing wife a retired professor has resumed his life's work a book that will stand as a towering cathedral to Michel de Montaigne reframing the inventor of the essay for the modern age The challenge is the litany of intrusions that bar his way from memories of his past to the nattering of smartphones to his son's relentless desire to make an electronic dance album As he sifts through the contents of his desk his thoughts pulsing and receding in a haze of caffeine ghosts and grievances spill out across the page From the community college where he toiled in vain to an artists colony in the Berkshires from the endless pleasures of coffee to the finer points of Holocaust art the professor's memories churn with sculptors poets painters and inventors all obsessed with escaping both mediocrity and themselves Laced with humor as acrid as it is absurd Lesser Ruins is a spiraling meditation on ambition grief and humanity's ecstatic agonizing search for meaning through art

A Spaceship Named McGuire and two more Stories Vol IV Randall Garrett,2020-03-06 Three Classic Short Stories from The Golden Age of Science Fiction by Randall Garrett Volume 4 Featured here A Spaceship Named McGuire Out Like A Light and Or Your Money Back **JUPITER ONE** RON DACIAN, Jupiter One is a science fiction story with a philosophical focus It is the first installment in a series depicting a possible future where human civilization must coexist with human spirits The story follows the exciting adventures of a group of normal people with no superpowers or superintelligence They are as they are with both good and bad habits and facing both good and bad things The first book Jupiter One describes what might happen when humans are able to separate their souls from their bodies No it is not about death or an inevitable end

There are no such things There are just limits The author attempts to present a scientific perspective on how human spirits confront one of their most significant challenges the flow of time When we do not have our body to stabilize the flow of time this flow might become strange Enjoy your reading
