a smaller place We think nothing of jumping on a plane to travel to another country or continent The most exotic locations are now destinations for mass tourism Small business people are dealing across frontiers and language barriers like never before The Internet brings different languages and cultures to our finger tips English the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication But historically periods of cultural and economic domination have never lasted forever Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures As citizens of this shrunken world would we not be better off if we were able to speak a few languages other than our own The answer is obviously yes Certainly Steve Kaufmann thinks so and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia Why do not more people do the same In his book The Way of The Linguist A language learning odyssey Steve offers some answers Steve feels anyone can learn a language if they want to He points out some of the obstacles that hold people back Drawing on his adventures in Europe and Asia as a student and businessman he describes the rewards that come from knowing languages He relates his evolution as a language learner abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency Many people have taken on the challenge of language learning but have been frustrated by their lack of success This book offers detailed advice on the kind of study practices that will achieve language breakthroughs Steve has developed a language learning system available online at www.thelinguist.com
