Murphy, April G. Rasmussen, 2020-01-08 There are few things in our society that provoke such raw emotions as that of child abuse Most people justifiably so are outraged when they hear of allegations of abuse and their anger is intensified as they learn of what seems to be an inappropriate criminal justice response However the debate on child abuse usually happens through visceral emotions rather than facts Taking emotions out of a child abuse debate is much easier said than done but it is of utmost importance to identify the facts When the reader has a better understanding of the scope of child abuse they can become more objective but still maintain their passion about ways to protect this vulnerable and targeted population Child Abuse Child Exploitation and Criminal Justice Responses is unique in that it offers the reader contributing facts based not only through scholarly research but practical experience working in field from this wonderful collaboration of criminal investigator and forensic nurse Thus providing much personal insight and demonstrating how these two areas of expertise can join forces to achieve the objective of working as a team to facilitate safeguarding children The authors also presents the research on this complex yet worthy topic by identifying the unique challenges of investigating these offenses while ultimately bringing the perpetrators to justice and presenting the research from various perspectives of child abuse including both national and international issues and responses

Research Advances in Alcohol and Drug Problems Reginald Smart, 2013-11-22 This book continues the series of reviews of research advances first published in 1974 The editors aim here is to present critical and integrative reviews by internationally recognized scholars of areas in which there has been much recent research In this task we have been greatly helped by the staff of Plenum Press and the Advisory Panel listed at the front of this volume Several members of the Panel have retired Dr W M D Paton Dr K Bruun Dr K F Killam and Dr J R Seeley Dr Klaus Makela has accepted our invitation to join

the Panel Unfortunately one member of the Panel Professor William McGlothlin died as a result of a tragic accident He was a gifted and sensitive researcher His work over many years was well known to those studying alcohol and drug problems We want to acknowledge his contributions to the Research Advances Series and to the field in general The editors wish to acknowledge the help of Julliana Newell Ayoub in preparation of this volume This volume contains three papers by H Fingarette R Room and B Kissin on The Disease Concept They were originally prepared for an earlier volume but could not be included because of scheduling problems The editors and not the authors are responsible for this delay Because they are primarily philosophical and theoretical in nature they are not diminished in value by the lesser number of references to recent research

Handbook of Drug Abuse Prevention Zili Sloboda,William J. Bukoski,2007-08-06 There are a number of reasons why this book is important First there is no one source that summarizes what we know about the prevention of substance abuse from the research field

so the book serves as a repository of accumulated knowledge on prevention theory intervention design and development and prevention research methodology Second as an evolving field prevention science has only begun to assert itself in both the arenas of practice and policy The formation of the Society for Prevention Research in 1991 was the first recognition that a science of prevention existed and required a separate forum to present the rapidly growing content of the field for discussion and review Finally there is a need to establish a baseline a reference point against which progress in the field of prevention science can be assessed This book serves all of these purposes The idea for this book grew from the observation in the early 1990s that after decades of attempts to develop effective interventions to prevent drug use among children and adolescents in the United States that we were finally having success particularly in addressing the initiation of use These successes are the result of research that has provided a better understanding of the factors and processes associated with the onset of substance use
