Modernising Post-war France Nicholas Bullock, 2022-11-22 This book is about the role played by architects engineers and planners in transforming France during the three post war decades of growing prosperity a period when modernisation was a central priority of the state promising a way forward from the shame of defeat in 1940 to a place at the centre of the new Europe The first part of the book examines the scale of transformation showing how architecture and urbanism both served the cause of modernisation and shaped the identity of the new France Mainstream modernism was co opted to the service of the state from major public buildings to Gaullist plans for the transformation of Paris to establish the city as the capital of Europe By contrast the second part of the book explores the critique of state sponsored modernisation by radical architects from Le Corbusier to the young Turks of the 1960s such as Georges Candilis and the students who attacked the banality of mainstream modernism and its inability to address the growing problems of France s cities Following May 1968 the Beaux Arts was closed the Grand Prix de Rome symbol of the old order abolished for a while the establishment might continue as before but progressive architecture was set on a new course Beautifully illustrated and written to be accessible to all the book sets the discussion of architecture and urbanism in its social political and economic contexts As such it will appeal both to students and scholars of the history of architecture and urbanism and to those with a wider interest in France s post war history

Why There Is No Poststructuralism in France Johannes Angermuller, 2015-10-08 French thinkers such as Lacan and Derrida are often labelled as representatives of poststructuralism in the Anglophone world However in France where their work originated such a category has never gained currency this group of theorists were never perceived as a coherent intellectual group or movement Outlining the institutional contexts affinities and rivalries of among others Althusser Lacan Barthes Foucault Derrida and Kristeva Why There is No Poststructuralism in France insightfully traces the evolution of the French intellectual field after the war and Poststructuralism as a phenomenon By critically embracing Bourdieu s concept of intellectual field Angermuller places French Theory both in the specific material conditions of its production and the social and historical contexts of its reception accounting for a particularly creative moment in French intellectual life which continues to inform the theoretical imaginary of our time **A History of Everyday Things** Daniel Roche, 2000-03-09 Things which we regard as the everyday objects of consumption and hence re purchase and essential to any decent civilised lifestyle have not always been so in former times everyday objects would have passed from one generation to another without anyone dreaming of acquiring new ones How therefore have people in the modern world become prisoners of objects as Rousseau put it The celebrated French cultural historian Daniel Roche answers this fundamental question using insights from economics politics demography and geography as well as his own extensive historical knowledge Professor Roche places familiar objects and commodities houses clothes water in their wider historical and anthropological contexts and explores the origins of some of the daily furnishings of modern life A History of Everyday Things is a pioneering essay that

sheds light on the origins of the consumer society and its social and political repercussions and thereby the birth of the modern world *Paris at War* David Drake,2015-11-16 David Drake chronicles the lives of ordinary Parisians during WWII drawing on diaries and reminiscences of people who endured these years From his account emerge the broad rhythms and shifting moods of the city and the contingent lives of resisters collaborators occupiers and victims who unlike us could not know how the story would end Twilight of History Shlomo Sand,2017-05-02 The acclaimed and controversial historian turns his critical gaze on the writing of history today On its publication in 2009 Shlomo Sand's book *The Invention of the Jewish People* met with a storm of controversy His demystifying approach to nationalist and Zionist historiography provoked much criticism from other professional historians as well as praise The furore gave him a privileged position to consider his academic discipline which he reflects on here in *Twilight of History* Drawing on four decades in the field Sand takes a wider view and interrogates the study of history whose origin lay in the need for a national ideology Over the last few decades traditional history has begun to fragment yet only to give rise to a new role for historians as priests of official memory Working in Israel has sharpened Sand's perspective since the role of history as national myth is particularly salient in a country where the Bible is treated as a source of historical fact He asks such questions as Is every historical narrative ideologically marked Do political requirements and state power weigh down inordinately on historical research and teaching And in such conditions can there be a morally neutral and scientific truth Despite his trenchant criticism of academic history Sand would still like to believe that the past can be understood without myth and finds reasons for hope in the work of Max Weber and Georges Sorel Transnational Intellectual Networks Christophe Charle,Jürgen Schriewer,Peter Wagner,2004 The university system both in America and abroad has always claimed a universal significance for its research and educational models At the same time many universities particularly in Europe have also claimed another role as custodians of national culture *Transnational Intellectual Networks* explores this apparent contradiction and its resulting intellectual tensions with illuminating essays that span the nineteenth and early twentieth century nationalization movements in Europe through the postwar era **Colonial Culture in France since the Revolution** Pascal Blanchard,Sandrine Lemaire,Nicolas Bancel,Dominic Thomas,2013-12-02 This landmark collection by an international group of scholars and public intellectuals represents a major reassessment of French colonial culture and how it continues to inform thinking about history memory and identity This reexamination of French colonial culture provides the basis for a revised understanding of its cultural political and social legacy and its lasting impact on postcolonial immigration the treatment of ethnic minorities and national identity Catholicism and the Welfare State in Secular France Fabio Bolzonar,2023-10-02 Even though the policy impact of Catholicism has increasingly been acknowledged existing scholarship lacks a coherent view on its changing influence over time and in different political contexts In this book Fabio Bolzonar investigates the influence of Catholicism on developments in French social protection from World War II to the mid 2010s He discusses the factors that have favoured or inhibited it

and explores the hybridization between Catholic values and secular principles in the social engagement of Catholic actors in secular France. By doing so, this multidisciplinary study integrates current scholarship which has given limited attention to the changing patterns of Catholic involvement in the social policy domain over a long period of time and the renewed influence of Catholic values in secularized societies. Catholic mobilization has relocated from the political to the civil society sphere, making voluntary organizations and social movements rather than political parties the main channels for defending Catholic values in secular France. Rather than marginalizing Catholicism, this process has opened up new opportunities for Catholic actors and values to play a significant role in society and politics. Bolzonar identifies two divergent scenarios that define Catholic social engagement in contemporary France: either the strengthening of new forms of institutional collaboration between Catholic inspired philanthropic organizations and public administrations in the interest of socially vulnerable citizens or the emergence of new ideological conflicts on gender and sexuality related issues.

Heresy and Orthodoxy in Sixteenth-Century Paris: François Le Picart and the Beginnings of the Catholic Reformation Larissa Juliet Taylor, 2021-10-11

This is the story of Paris from the Reformation to the Religious Wars. Through the works of François Le Picart, the most popular preacher from 1530-1556, the book delineates the increasing tensions sparked by Reformation ideas. Targeted by Calvin and Beza, Le Picart was considered the reason Paris remained in the Catholic fold. Exiled by Francis I for his incendiary preaching, he would later serve as a professor and lecturer, coming into close contact with the first Jesuits. A fierce opponent of heresy, he helped compile the Articles of Faith, read heretical books, lectured on scripture, and presided at executions. His 270 sermons, the only substantial preaching source for this period, offer glimpses of life during these increasingly troubled times that challenge works by Denis Crouzet suggesting that France was in the grip of eschatological anguish.
