Novye Materialy I Tekhnologii Sbornik Statei

Library of Congress

Novye Materialy I Tekhnologii Sbornik Statei:

"Smart Technologies" for Society, State and Economy Elena G. Popkova, Bruno S. Sergi, 2020-10-15 This proceedings book presents a comprehensive view of smart technologies and perspectives of their application in various areas of economic activity. The authors of the book combined the results of the cutting edge research on the topic of smart technologies in the digital economy and Industry 4.0 and developed a unified scientific concept. The current experience has been considered and the prospects for the application of smart technologies in society to promote social advance have been identified. Smart technologies in public administration and law as well as the experience in development of e government have been examined. Smart technologies in business activity have been studied and the transition from digital business to business 4.0 has been justified. The book contains the collection of the best works following the results of the 13th International Research to Practice Conference Smart Technologies for society state and economy which was run by the Institute of Scientific Communications ISC and was held on July 2-3 2020. The target audience of this book includes researchers investigating fundamental and applied problems of development of smart technologies as well as concerned parties outside the academic community in particular representatives of the digital society high tech business entities and officials regulating the digital economy and Industry 4.0. ASTM Special Technical Publication, 1964. **Friends Or**

Foes? Norman E. Saul, 2006. With Friends or Foes Norman Saul continues his monumental multivolume magnum opus on U.S. Russian relations over the course of 200 years. This fourth volume provides the first comprehensive study in any language of an era that shaped the rest of the century and captures the major changes in relations between two nations on the verge of becoming dominant global powers. Among other things Saul examines the rationale for America's failure to recognize the Soviet government through the early 1930s analyzing the impact of the Red Scare and the roles of the State Department. Russian migr's religious groups and key individuals like Charles Evans Hughes Robert Kelley Herbert Hoover Boris Skvirsky Olga Kameneva and Maxim Litvinov on the policy process. In addition he recalls the American Relief Administration's gigantic effort to help Russian peasants and garners new material from American business records on concession arrangements and commerce and on Soviet responses during the first Five Year Plan. He also records travelers' impressions cultural exchange and the role of academia in each country particularly the contribution of Russian migr scholars to American education and the contributions of American journalists in Russia. Saul also reveals the tendency on both sides to preserve an atmosphere of secrecy conducting business behind closed doors and rarely on paper. His prodigious research in the Hoover Presidential Library the Franklin Roosevelt Library and the Hoover Institution at Stanford University incorporating overlooked Diplomat Post Records and featuring an interview with George Kennan on his diplomatic role has yielded a wealth of new insights into what really happened during a period in the history of the relations between the two countries that remains mysterious and controversial. Breaking new ground in diplomatic economic social and cultural history Saul's book illuminates both the mutual

fascination that briefly permitted peaceful coexistence and eventual alliance and the ideological battles that ultimately led to the Cold War **Coden for Periodical Titles: Periodical titles by coden. Non-periodical titles. Deleted coden**

Wyandotte-ASTM Punched Card Project,1966 *Pastoralist Landscapes and Social Interaction in Bronze Age Eurasia*
Michael David Frachetti,2009-01-05 Offering a fresh archaeological interpretation this work reconceptualizes the Bronze Age prehistory of the vast Eurasian steppe during one of the most formative and innovative periods of human history Michael D Frachetti combines an analysis of newly documented archaeological sites in the Koksu River valley of eastern Kazakhstan with detailed paleoecological and ethnohistorical data to illustrate patterns in land use settlement burial and rock art His investigation illuminates the practical effect of nomadic strategies on the broader geography of social interaction and suggests a new model of local and regional interconnection in the third and second millennia B C E Frachetti further argues that these early nomadic communities played a pivotal role in shaping enduring networks of exchange across Eurasia
