Limiting Modes of Aircraft Flight Alexander Nikolaevich Akimov, Vadim Vadimovich Vorobyov, Dmitry Alexandrovich Zatuchny, 2022-10-31 This book describes in detail a method of direct optimization which makes it possible to choose the best trajectory of an aircraft in conditions of its limited resource This can happen in the event of an emergency on board associated with both a possible equipment failure and external influences for example when lightning strikes an aircraft or collides with a moving object The highlight of this book is the fact that the results presented in it can be applied universally to the choice of the flight path of large and small aircraft as well as helicopter technology In addition they take into account various conditions of aircraft flight including a possible accident The methods and algorithms presented here can be used as the basis for the creation of automatic collision avoidance systems as well as the choice of the best aircraft trajectory for flights in different regions and in different conditions

Sastry,Nazif C. Tas,2009-06-30 Optimal Observation for Cyber physical Systems addresses the challenge fundamental to the design of wireless sensor networks WSNs presented by the obligatory trade off between precise estimates and system constraints A unified theoretical framework based on the well established theory of optimal experimental design and providing consistent solutions to problems hitherto requiring a variety of approaches is put forward to solve a large class of optimal observation problems The Fisher information matrix plays a key role in this framework and makes it feasible to provide analytical solutions to some complex and important questions which could not be answered in the past Readers with an applied background in WSN implementation will find all the understanding of the key theory of optimal experimental design they need within this book The use of multiple examples to illustrate the theoretical parts of the book brings the subject into sharper focus than would an abstract theoretical disquisition *Nuclear Science Abstracts* ,1971-10
