both consume and are consumed Inspired by Marx's use of the cyborg vampire as a metaphor for the objectification of physical labor in the factory Latham shows how contemporary images of vampires and cyborgs illuminate the contradictory processes of empowerment and exploitation that characterize the youth consumer system While the vampire is a voracious consumer driven by a hunger for perpetual youth the cyborg has incorporated the machineries of consumption into its own flesh Powerful fusions of technology and desire these paired images symbolize the forms of labor and leisure that American society has staked out for contemporary youth A startling look at youth in our time Consuming Youth will interest anyone concerned with film television and popular culture Hacking Education in a Digital Age Bryan Smith,Nicholas

Ng-A-Fook,Linda Radford,Sarah Smitherman Pratt,2018-04-01 In this collection the authors put forth different philosophical conceptions of hacking education in response to the educational societal and technological demands of the 21st century Teacher Educators are encouraged to draw on the collection to rethink how hacking education can be understood simultaneously as a praxis informed by desires for malice as well as a creative site for us to reconsider the possibilities and limitations of teaching and learning in a digital era How do we hack beyond the limits of circumscribed experiences regulated subjective encounters with knowledge and the limits imposed by an ever constrained 21st century schooling system in the hopes of imagining better and more meaningful futures How do we foster ingenuity and learning as the end itself and not learning as economic imperative in a world where technology in part positions individuals as zombie like and as an economic end in itself Can we hack education in such a way that helps to mitigate the black hat hacking that increasingly lays ruin to individual lives government agencies and places of work How can we as educators facilitate the curricular and pedagogical processes of reclaiming the term hacking so as to remember and remind ourselves that hacking's humble roots are ultimately pedagogical in its very essence As a collection of theoretical and pedagogical pieces the chapters in the collection are of value to both scholars and practitioners who share the same passion and commitment to changing challenging and reimagining the script that all too often constrains and prescribes particular visions of education Those who seek to question the nature of teaching and learning and who seek to develop a richer theoretical vocabulary will benefit from the insightful and rich collection of essays presented in this collection In this regard the collection offers something for all who might wish to rethink the fundamental dynamics of education or as Morpheus asks of Neo in The Matrix bend the rules of conventional ways of knowing and being *Signal* Kevin Kelly,1988 The latest Whole earth catalog The usual jumble of fascinating books and gadgets Topics here are computers audio video on line databases networks propaganda movies dance Annotation copyrighted by Book News Inc Portland OR **A New History of Modern Computing** Thomas Haigh,Paul E. Ceruzzi,2021-09-14 How the computer became universal Over the past fifty years the computer has been transformed from a hulking scientific supertool and data processing workhorse remote from the experiences of ordinary people to a diverse family of devices that billions rely on to play games shop stream music and movies communicate and count their steps In A

New History of Modern Computing Thomas Haigh and Paul Ceruzzi trace these changes A comprehensive reimagining of Ceruzzi's A History of Modern Computing this new volume uses each chapter to recount one such transformation describing how a particular community of users and producers remade the computer into something new Haigh and Ceruzzi ground their accounts of these computing revolutions in the longer and deeper history of computing technology They begin with the story of the 1945 ENIAC computer which introduced the vocabulary of programs and programming and proceed through email pocket calculators personal computers the World Wide Web videogames smart phones and our current world of computers everywhere in phones cars appliances watches and more Finally they consider the Tesla Model S as an object that simultaneously embodies many strands of computing
