Regime Consequences Methodological Challenges And Research Strategies:

Regime Consequences A. Underdal, Oran R. Young, 2013-06-05 This volume has a long and distinguished pedigree It is the product of an effort to devise clear and unambiguous methods for demonstrating that international regimes make a difference stretching back at least to the early 1990s What has transpired in the meantime is the development of a suite of useful techniques of analysis rather than the creation of a single correct methodology for use in this field of study Our assumption is that we can be relatively confident regarding assessments of the consequences of individual regimes when those employing a variety of methods converge on the same conclusions When different methods yield divergent conclusions on the other hand we can take this as a signal that more work is needed to arrive at convincing judgments regarding the consequences of the regimes in question Along the way we came to understand that there is an important distinction between what we describe in this book as simple effectiveness and broader consequences Most analyses of the effectiveness of international regimes focus on individual cases and seek to assess the performance of regimes on a case by case basis This is entirely understandable Yet it is now clear that individual regimes not only interact with one another but also operate in and affect broader settings The study of these broader consequences is less mature than research on the effectiveness of individual regimes

Managing Institutional Complexity Sebastian Oberthür, Olav Schram Stokke (jurist), 2011 The book a product of the Institutional Dimensions of Global Environmental Change research project IDGEC offers both theoretical and empirical perspectives

Disaggregating International Regimes Olav Schram Stokke, 2012 Evaluating the effectiveness of international regimes presents challenges that are both general and specific What are the best methodologies for assessment within a governance area and do they enable comparison across areas In this book Olav Schram Stokke connects the general to the specific developing new tools for assessing international regime effectiveness and then applying them to a particular case governance of the Barents Sea fisheries Stokke s innovative disaggregate methodology makes cross comparison possible by breaking down the problem and the relevant empirical evidence Provided by publisher

Institutional Interaction in Global Environmental Governance Sebastian Oberthür, Thomas Gehring, 2006 The first large scale systematic investigation of how interaction among international institutions affects global environmental governance with a conceptual framework and ten case studies

The Politics of Climate Change Paul G. Harris, 2013-09-13 Climate change is now a mainstream part of the international political agenda It has become clear that it is not solely a technical issue to be resolved by scientists but a political issue with political implications at all levels of global governance Indeed some may argue that few long term problems in international affairs are more important than this one The purpose of this book is to reveal and apply some of the latest thinking on the implications of climate change for international affairs and to explore how various proposals for tackling climate change will affect interstate relations in coming years Chapters by scholars of international relations international political economy and international law contribute to current discussions of climate change doing so in

way that is accessible to students stakeholders government officials and informed laypersons Some questions considered in the book include the following How has the discussion of climate change affected interstate relations How does this problem and how do environmental issues more generally challenge international relations theory How do international climate politics influence domestic politics and vice versa How would climate change or action taken to tackle it affect the balance of power or balance of influence Is climate change a matter of international security or international justice or both and how does the answer to this question affect policy responses of governments Which states are likely to benefit or suffer from the various proposals to address climate change What are the legal ethical and political implications of the uneven distribution of the impacts of climate change This book was previously published as a special issue of the Cambridge Review of International Affairs

The Legitimacy of International Regimes Helmut Breitmeier, 2016-12-05 How legitimate are outcomes outputs and impacts of global environmental regimes Can non state actors contribute to improve the output and input oriented legitimacy of global environmental governance Helmut Breitmeier responds to these questions balancing the volume with both theoretical and empirical chapters The theoretical and conceptual chapters illustrate the relevance and meaning of legitimacy as well as the impact of non state actors on environmental governance They also describe various methodological issues involved with the coding of 23 environmental regimes The empirical chapters are based on the findings of the International Regimes Database IRD They explore whether problem solving in international regimes is effective and equitable and the influence of a regime's contribution to how states comply with international norms These chapters also analyze whether non state actors can improve the output and input oriented legitimacy of global governance systems

Indian Ocean Region Manoj Gupta, 2010-08-09 It is a privilege to introduce the reader to this book as I believe that it will make a significant contribution to given the difficulties in the knowledge of the Indian Ocean developing cooperation in the Indian Ocean region There have been numerous failed efforts at regional cooperation in different fora in the Indian Ocean As a result of the land based orientation of the people in the region the importance for countries to develop the power to govern the sea has largely been ignored The maritime approach taken by Manoj Gupta to the Indian Ocean as a region in international relations offers a timely and critical assessment of the potential for regional cooperation and ocean governance The political leadership in the region can no longer ignore the need for cooperation in maritime affairs in the Indian Ocean This book enriches the literature on Indian Ocean issues as it argues convincingly that the security of nations economic well being of the people and health of the Indian Ocean cannot be divested from one another All are fundamentally dependant on the ability of the countries in the region to individually and collectively exert the power to govern the sea

The Influence of International Institutions on the EU O. Costa, K. Jørgensen, 2012-04-05 An exploration of how the EU is influenced by multilateral institutions There has recently been a dramatic increase in interaction between the EU and multilateral institutions This book shows that international institutions shape EU policies as well as acting as a source of preferences and

strategies for EU stances internationally *The Bologna Process and its Global Strategy* Hannah Moscovitz, Hila Zahavi, 2020-05-21 This book critically reflects on the international function of the Bologna Process by exploring motivations and interests behind its global strategy as well as how the reforms have been perceived and applied beyond Europe Since its initiation in 1999 the Bologna Process has evolved into an important example of regional higher education policy coordination Now with 48 signatory states both within and outside the European Union the Bologna reforms have pushed forward an ambitious agenda for a European Higher Education Area EHEA and the EU specifically as it aims to consolidate its knowledge economy Alongside its regional focus the Bologna Process has also promoted an international reach through its global strategy Through this externalisation the Bologna Process has become a point of reference for higher education internationalisation worldwide Featuring examples of Bologna's reach from Oceania to North America and in between the book offers a timely contribution to the understanding of the reform's global influence As a whole the contributions offer important insights to the understanding and conceptualisation of the EU's global influence comparative regionalism and global higher education development more broadly This book was originally published as a special issue of the *European Journal of Higher Education* *Routledge Handbook on the European Union and International Institutions* Knud Erik Jørgensen, Katie Verlin Laatikainen, 2013 This Handbook addresses the increasingly contested issue of profound political importance Europe's presence in multilateral institutions It assesses both the evolving role of Europe in international institutions and the transformations in international institutions themselves *Regimes in Southeast Asia* Henriette Litta, 2011-11-01 In the context of massive environmental problems in Southeast Asia the countries in the region have decided at least in some instances to create regimes to solve these problems jointly This empirical observation is surprising given the Southeast Asian countries' general reluctance to regional cooperation the governance and budgetary constraints that are typical for developing countries and the huge heterogeneity of the involved countries in terms of environmental vulnerability economic capacity and hegemonic power This book analyzes the creation and effectiveness of two environmental regimes one on transboundary haze pollution and a second on resource management of the Mekong It will be shown that regime creation is extremely problematic and strategies to overcome conflicting actor constellations are mostly lacking *Encyclopedia of Global Environmental Governance and Politics* Philipp H. Pattberg, Fariborz Zelli, 2015-11-27 The *Encyclopedia of Global Environmental Governance and Politics* surveys the broad range of environmental and sustainability challenges in the emerging Anthropocene and scrutinizes available concepts methodological tools theories and approaches as well as overlaps with adjunct fields of study This comprehensive reference work written by some of the most eminent academics in the field contains 68 entries on numerous aspects across 7 thematic areas including concepts and definitions theories and methods actors institutions issue areas cross cutting questions and overlaps with non environmental fields With this broad approach the volume seeks to provide a pluralistic knowledge base of the research and practice of global

environmental governance and politics in times of increased complexity and contestation Providing its readers with a unique point of reference as well as stimulus for further research this Encyclopedia is an indispensable tool for anyone interested in the politics of the environment particularly students teachers and researchers

Regime Interaction and Climate Change Beatriz Martinez Romera, 2017-12-06 The regulation of greenhouse gas emissions from international aviation and maritime transport has proved to be a difficult task for international climate negotiations such as the Paris Agreement in 2015 Almost two decades prior Article 2.2 of the Kyoto Protocol excluded emissions from international aviation and maritime transport from its targets delegating the negotiation of sector specific regulations to the International Civil Aviation Organization ICAO and the International Maritime Organization IMO respectively However progress at these venues has also been limited

Regime Interaction and Climate Change maps out the legal frameworks in the Climate ICAO and IMO regimes and explores the law making process for the regulation of international aviation and maritime transport through the lenses of fragmentation of international law and regime interaction The book sheds light on how interaction between these three regimes occurs what the consequences of such interaction are and how they can be managed to resolve conflicts and promote synergies This book will be of great interest to scholars of international environmental law and governance climate change policy and climate change law

International Norms and Decision Making Gary Goertz, 2003 This book presents a punctuated equilibrium framework for understanding the nature of policy decision making by governments as well as a theory of the creation functioning and evolution of international norms and institutions

Prakash, 2008-02-27 We still lack practical answers to one of the most basic questions in empirical research How should researchers interpret meanings The contributors take seriously the goals of both post modernist and positivist researchers as they offer detailed guidance on how to apply specific tools of analysis and how to circumvent their inherent limitations

The World Ocean in Globalisation Davor Vidas, Peter Johan Schei, 2011-08-11 This book addresses emerging challenges for the World Ocean in the Anthropocene epoch and the effects of increasing globalisation on the seas The issues explored in particular include climate change sustainable fisheries biodiversity shipping and regional seas adjoining Europe

International Cooperation and Arctic Governance Olav Schram Stokke, Geir Hønneland, 2006-12-05 A new exploration of the impacts of Arctic regimes in such vital areas as pollution biodiversity indigenous affairs health and climate change The post Cold War era has seen an upsurge in interest in Arctic affairs With new international regimes targeting Arctic issues at both the global and regional levels the Northern areas seem set to play an increasingly prominent role in the domestic and foreign policies of the Arctic states and actors not least Russia the USA and the EU This volume clearly distinguishes between three key kinds of impact effectiveness defined as mitigation or removal of specific problems addressed by a regime political mobilization highlighting changes in the pattern of involvement and influence in decision making on Arctic affairs region building understood as contributions by Arctic institutions to denser interactive or discursive connectedness among the inhabitants of the region Empirically the main focus is on three institutions the Arctic Council the Barents Euro Arctic Region and the Council of the Baltic Sea States
