Ancient China and its Eurasian Neighbors Katheryn M. Linduff, Yan Sun, Wei Cao, Yuanqing Liu, 2017-11-23 This volume examines the role of objects in the region north of early dynastic state centers at the intersection of Ancient China and Eurasia a large area that stretches from Xinjiang to the China Sea from c 3000 BCE to the mid eighth century BCE This area was a frontier an ambiguous space that lay at the margins of direct political control by the metropolitan states where local and colonial ideas and practices were reconstructed transculturally These identities were often merged and displayed in material culture Types of objects styles and iconography were often hybrids or new to the region as were the tomb assemblages in which they were deposited and found Patrons commissioned objects that marked a symbolic vision of place and person and that could mobilize support legitimize rule and bind people together Through close examination of key artifacts this book untangles the considerable changes in political structure and cultural makeup of ancient Chinese states and their northern neighbors *The Cambridge World History: Volume 2, A World with Agriculture, 12,000 BCE-500 CE* Graeme Barker, Candice Goucher, 2015-04-16 The development of agriculture has often been described as the most important change in all of human history Volume 2 of the Cambridge World History series explores the origins and impact of agriculture and agricultural communities and also discusses issues associated with pastoralism and hunter fisher gatherer economies To capture the patterns of this key change across the globe the volume uses an expanded timeframe from 12 000 BCE 500 CE beginning with the Neolithic and continuing into later periods Scholars from a range of disciplines including archaeology historical linguistics biology anthropology and history trace common developments in the more complex social structures and cultural forms that agriculture enabled such as sedentary villages and more elaborate foodways and then present a series of regional overviews accompanied by detailed case studies from many different parts of the world including Southwest Asia South Asia China Japan Southeast Asia and the Pacific sub Saharan Africa the Americas and Europe *The Comparative Archaeology of Complex Societies* Michael E. Smith, 2011-09-05 Part of a resurgence in the comparative study of ancient societies this book presents a variety of methods and approaches to comparative analysis through the examination of wide ranging case studies Each chapter is a comparative study and the diverse topics and regions covered in the book contribute to the growing understanding of variation and change in ancient complex societies The authors explore themes ranging from urbanization and settlement patterns to the political strategies of kings and chiefs to the economic choices of individuals and households The case studies cover an array of geographical settings from the Andes to Southeast Asia The authors are leading archaeologists whose research on early empires states and chiefdoms is at the cutting edge of scientific

archaeology Empires and Diversity Gregory E. Areshian, 2013-12-31 For more than four thousand years empires have been geographically the largest polities on Earth shaping in many respects the human past and present in different epochs and on different continents Covering the time span from the second millennium B C E to the sixteenth century C E and geographic areas from China to South America the case studies included in this volume demonstrate the necessity to combine perspectives from the longue duree and global comparativism with the theory of agency and an understanding of specific contexts for human actions Contributions from leading scholars examine salient aspects of the Hittite Assyrian Ancient Egyptian Achaemenid and Sasanian Iranian Zhou to Han Dynasty Chinese Inka and Mughal empires **Envisioning Eternal Empire** Yuri Pines, 2009-01-01 This ambitious book looks into the reasons for the exceptional durability of the Chinese empire which lasted for more than two millennia 221 B C E 1911 C E Yuri Pines identifies the roots of the empire s longevity in the activities of thinkers of the Warring States period 453 221 B C E who in their search for solutions to an ongoing political crisis developed ideals values and perceptions that would become essential for the future imperial polity In marked distinction to similar empires worldwide the Chinese empire was envisioned and to a certain extent preplanned long before it came into being As a result it was not only a military and administrative construct but also an intellectual one Pines makes the argument that it was precisely its ideological appeal that allowed the survival and regeneration of the empire after repeated periods of turmoil Envisioning Eternal Empire presents a panoptic survey of philosophical and social conflicts in Warring States political culture By examining the extant corpus of preimperial literature including transmitted texts and manuscripts uncovered at archaeological sites Pines locates the common ideas of competing thinkers that underlie their ideological controversies This bold approach allows him to transcend the once fashionable perspective of competing schools of thought and show that beneath the immense pluralism of Warring States thought one may identify common ideological choices that eventually shaped traditional Chinese political culture *Memory and Agency in Ancient China* Francis Allard, Yan Sun, Kathryn M. Linduff, 2018-12-20 Applies the life history of objects approach to China s prehistoric early dynastic and more recent material culture Multiscalar Approaches to Studying Social Organization and Change in the Isthmo-Colombian Area Scott D. Palumbo, Ana María Boada Rivas, William A. Locascio, Adam C.J. Menzies , 2013-11-04 Chapters offer new understandings of how ranked societies emerged and developed in prehistoric southern Central America and northern South America the Isthmo Colombian Area The emphasis is on integrating the results of studies of social units at a range of different scales from the household to the local community to the region and beyond Complete text in English and Spanish **The Routledge Handbook of the Bioarchaeology of Climate and Environmental Change** Gwen Robbins Schug, 2020-10-27 This handbook examines human responses to climatic and environmental changes in the past and their impacts on disease patterns nutritional status migration and interpersonal violence Bioarchaeology the study of archaeological human skeletons provides direct evidence of the human experience of past climate and environmental

changes and serves as an important complement to paleoclimate historical and archaeological approaches to changes we may expect with global warming. Comprising 27 chapters from experts across a broad range of time periods and geographical regions, this book addresses hypotheses about how climate and environmental changes impact human health and well-being factors that promote resilience and circumstances that make migration or interpersonal violence a more likely outcome. The volume highlights the potential relevance of bioarchaeological analysis to contemporary challenges by organizing the chapters into a framework outlined by the United Nations Sustainable Development Goals for 2030. Planning for a warmer world requires knowledge about humans as biological organisms with a deep connection to Earth's ecosystems, balanced by an appreciation of how historical and socio-cultural circumstances, socioeconomic inequality, degrees of urbanization, community mobility, and social institutions play a role in shaping long-term outcomes for human communities. Containing a wealth of nuanced perspectives about human environmental relations, this book is key reading for students of environmental archaeology, bioarchaeology, and the history of disease. By providing a longer view of contemporary challenges, it may also interest readers in public health, public policy, and planning.

Settlement, Subsistence, and Social Complexity Richard E. Blanton, 2006-12-31. This volume brings together the work of some of the most prominent archaeologists to document the impact of Jeffrey R. Parsons on contemporary archaeological method and theory. Parsons is a central figure in the development of settlement pattern archaeology, in which the goal is the study of whole social systems at the scale of regions. In recent decades, regional archaeology has revolutionized how we understand the past, contributing new data and theoretical insights on topics such as early urbanism, social interactions among cities, towns, and villages, and long-term population and agricultural change among many other topics relevant to the study of early civilizations and the evolution of social complexity. Over the past 40 years, the application of these methods by Parsons and others has profoundly changed how we understand the evolution of pre-Hispanic Mesoamerican civilization, and now similar methods are being applied in other world areas. The book's emphasis is on the contribution of settlement pattern archaeology to research in pre-Hispanic Mesoamerica, but its authors also point to the value of regional research in South America, South Asia, and China. Topics addressed include early urbanism, household and gender, agricultural and craft production, migration, ethnogenesis, the evolution of early chiefdoms, and the emergence of pre-modern world systems.

Chinese Society in the Age of Confucius (1000-250 BC) Lothar von Falkenhausen, 2006-12-31. Winner of the 2009 Society for American Archaeology Book Award, *Chinese Society in the Age of Confucius* is based on the most up-to-date archaeological discoveries. It introduces new data as well as new ways to think about them, modes of analysis that while familiar to archaeological practitioners in the West and in Japan are herein applied to evidence from the Chinese Bronze Age for the first time. The treatment of social stratification, clan and lineage organization, as well as gender and ethnic differences, will be of interest to those involved in the general or comparative analysis of grand themes in the Social Sciences.
