Regional Cities in the UK 1890-1980 George Gordon, 1986 Urban Governance Robert J. Morris, Richard H. Trainor, 2017-07-05 This is a coherent and integrated set of essays around the theme of governance addressing a wide range of questions on the organisation and legitimation of authority At the heart of the book is a set of topics which have long attracted the attention of urbanists and urban historians all over the world the growth and reform of urban local government local centre relationships public health and pollution local government finance the nature of local social lites and of participation in local government Approaching these topics through the concept of governance not only raises a series of new questions but also extends the scope of enquiry for the historian seeking to understand towns and cities all over the world in a period of rapid change Questions of governance must be central to a variety of enquiries into the nature of the urban place There are questions about the setting of agendas about when a localised or neighbourhood issue becomes a big city or even national political issue about what makes a problem Public health and related matters form a central part of the issues especially for the British in North America fire and the development of urban real estate have dominated in India the security of the colonial government had a prominent place The historical dynamic of these essays follows the change from the chartered governments of the seventeenth and eighteenth centuries towards the representative regimes of the nineteenth and twentieth However such historical change is not regarded as inevitable and the effects of bureaucratic growth regulatory regimes the legitimating role of rational and scientific knowledge as well as the innovatory use of ritual and space are all dealt with at length **Geographical Perspectives on the Belfast Region** Paul Doherty, 1990 Town & Country Planning , 1986 Entrepreneurship, Innovation and Regional Development Jay Mitra, 2019-10-08 The fields of entrepreneurship innovation and regional development are inextricably linked with people organisations and the environment or their location forming the main building blocks in an integrated model of value creation This second edition of a key textbook draws on the diversity of approaches in these areas to produce a unified understanding of this important subject and its sub sets The author connects theory and practice using references to academic studies as well as industry sources The importance of technology is highlighted throughout to demonstrate the value of new technology based ventures and the role of technology for innovation in both organisational and spatial contexts The economic and social contexts of entrepreneurship are covered in dedicated chapters offering an appreciation of multiple perspectives on key themes of growth and development Drawing on insights and concepts from a wide range of disciplines such as business sociology economics geography and management this unique textbook introduces entrepreneurship to students from different backgrounds and varied interests With a range of new case studies and coverage of emerging themes such as smart cities ecosystems female entrepreneurship and social and human capital this book provides an expert exposition of the elaborate empire of entrepreneurship **City-state and Nation** Roger Ward, 2005 The fascination of historians with the career of

in Spain, 1890-1915 James Michael Yeoman, 2019-10-02 This book analyzes the formation of a mass anarchist movement in Spain over the turn of the twentieth century In this period the movement was transformed from a dislocated collection of groups and individuals into the largest organized body of anarchists in world history the anarcho syndicalist National Confederation of Labour Confederación Nacional del Trabajo CNT At the same time anarchist cultural practices became ingrained in localities across the whole of Spain laying foundations which maintained the movement's popular support until the end of the Spanish Civil War in 1939 The book shows that grassroots print culture was central to these developments driving the development of ideology and strategy broadly defined as terrorism education and workplace organization and providing an informal structure to a movement which shunned recognized leadership and bureaucracy This study offers a rich analysis of the cultural foundations of Spanish anarchism This emphasis also challenges claims that the movement was exceptional or peculiar in its formation by situating it alongside other decentralized bottom up mobilizations across historical and contemporary contexts from the radical pamphleteering culture of the English Civil War to the use of social media in the Arab Spring

Greek Islander Migration to Australia since the 1950s Melissa N. Afentoulis, 2021-11-23 Illuminating the experiences of immigrants to Australia in the late twentieth century this book uses oral history to explore

how identity and belonging are shaped through migration Between the 1950s and the 1970s many inhabitants from the small Greek island of Limnos travelled to Australia to flee post war devastation and economic disaster With an emphasis on the lived experiences and memories of Limnians the book sheds light on the emotional pain and trauma they felt as they were separated from their families and homeland Moving away from more traditional outlooks on migration studies this book emphasises the significance of ethno regional identity and analyses how it can bring strength and longevity to a constructed community Both the roles of men and women within the Greek diaspora are examined in the way that they made the difficult decision to leave their homeland and subsequently how they came to nurture and build families within a new evolving community Looking beyond first generation migration the author analyses the pattern of return visits to Limnos by the descendants of migrants Acting as a form of identity consolidation for second generation migrants this journey to the ancestral homeland highlights the fluidity of what it means to belong somewhere and redefines the notion of home The author provides an alternative perspective to traditional migration studies and reaffirms the importance of transnational identity A unique and important addition to research this book combines memory studies and oral narrative to analyse how identity and belonging can be shaped across borders rather than within them
