Assessment of the Eastern Caribbean OECD, 2022-10-07 Eastern Caribbean countries enjoy rich natural endowments and have achieved significant economic development Throughout the last decades they have also been confronted with a number of rising economic social and environmental challenges **Handbook of Small States** Lino Briguglio, 2018-05-11 This handbook covers a wide spectrum of issues relating to small states Chapters in the volume have been grouped under the three main themes of economic social and environmental issues The economics sections include chapters dealing with trade finance and regulatory frameworks while the social theme covers health migration population ageing as well as overall social wellbeing The environmental theme examines matters such as measuring environmental performance natural disasters the ocean economy and the validity of the Sustainable Development Goals One major issue is the definition of small states As this volume demonstrates generally speaking population is used to measure country size in the literature However it clearly emerges that there is no real consensus as to the population cut off point that distinguishes small states from large ones While the approaches taken by the authors vary in all cases the chapters draw practical policy implications for small states The book can therefore be considered as a wide ranging depository of information on small states with the aim of deriving policy prescriptions and thus as an excellent resource for academics students and policymakers **From Political to Economic Awakening in the Arab World** Jean-Pierre Chauffour, 2012-12-05 The popular grievances that have fueled the Arab Spring since 2010 demonstrate that past development paradigms have failed to achieve the inclusive and sustainable

growth expected by Arab populations Countries in the Middle East and North Africa MENA region have failed to develop a strong private sector that is linked with global markets survives without state assistance and generates productive employment for young people One key symptom of this maldevelopment is that with the exception of the petroleum sector MENA remains the least trade integrated region in the world The Deauville Partnership launched by the Group of Eight G8 in Deauville France in May 2011 is thus strategic and timely At the request of the G8 this report provides an analytical framework for increasing trade and foreign direct investment FDI for Egypt Jordan Libya Morocco and Tunisia the Partnership countries Increased trade and FDI is a key means by which Partnership countries can achieve a path of sustainable growth that reduces youth unemployment Moreover trade and investment can also show short term results The G8 countries Turkey the Gulf states and other Deauville partners can help the new Arab democracies achieve their objectives in two main ways by effectively expanding market opportunities and by supporting domestic regulatory reforms To start implementing a long term vision of increased trade and investment integration based on an integrated economic space in the Mediterranean basin the Deauville Partnership could focus on five priority areas These are helping Partnership countries adapt to a fast changing trade FDI and jobs landscape improving market access opportunities and market regulations fostering competitiveness diversification and employment facilitating trade and mobilizing trade finance and diaspora resources and promoting inclusiveness equity and sustainability of the structural transformation brought about by the process of integration The success of the Arab political awakening will greatly depend on the emergence of such an economic awakening that can generate quality employment for the millions of young Arab men and women who seek jobs and a decent life

Informal International Lawmaking Berman Duquet Pauwelyn Wessel, Wouters, 2012-12-24 Informal International Lawmaking Case Studies compiles case studies on instances of informal international lawmaking IN LAW in diverse policy areas including finance investment competition pharmaceuticals and medical device regulation food regulation human rights disaster management and trade in diamonds The term informal

international lawmaking is used in contrast and opposition to traditional international lawmaking More concretely IN LAW is informal in the sense that it dispenses with certain formalities traditionally linked to international law These formalities may have to do with the process actors and output involved The literature has mostly criticized IN LAW for its accountability deficits The chapters in this book hence do not simply give a descriptive overview of the case studies but approach them from an accountability perspective In this context different questions are raised such as Is IN LAW subject to any accountability measures How accountable are IN LAW participants to their constituents How accountable are they towards those affected by their decisions Are the accountability measures available at the international or at the domestic level The book also examines how IN LAW is elaborated and subsequently received in domestic legal systems using the Netherlands and Brazil as case studies
