Regional Dynamics Of Language Differentiation In Belgium A Study In Culturalpolitical Geography:

The Regional Dynamics of Language Differentiation in Belgium Alexander B. Murphy, Jeffrey A. Gritzner, 1988

Regional Worlds: Advancing the Geography of Regions Martin Jones, Anssi Paasi, 2017-10-02 A key concern in the debate and empirical research on the geography of regions is the evolution of the conceptualizations and practical uses of the idea of region. This idea prioritises both the intellectual and the practical development of regional studies. This book drives the discussion further. It stresses the complex forms of agency advocacy involved in the production and reproduction of regional spaces and space of regionalism as well as the importance of geohistory and context. The book moves beyond the territorial relational divide that has characterized debates on regions and regional borders since the 1990s. The contributors answer key questions from different conceptual and concrete contextual angles and to motivate readers to reflect on the perpetual significance of regional concepts and how they are mobilized by various actors to maintain or transform the contested spatialities of societal power relations. This book was based on a special issue of *Regional Studies*. **A European Geography** Tim Unwin, 2017-09-29 A European Geography provides a geographical interpretation and exposition of the whole of Europe. Beginning with a historical and environmental introduction, the text covers the cultural identity, political structure, economic organisation and social context of Europe, examining the complex issues that are shaping the characteristics and meaning of contemporary Europe. More than fifty contributors are drawn from Europe and North America, contributing a wealth of research expertise in their specialist subject areas. Detailed case studies provide empirical examples of the broader research themes examined. A European Geography is written for undergraduate students taking courses on Europe, Regional Geography, European Studies and European Integration. It will provide valuable reading for anyone interested in developing a detailed understanding of the processes shaping contemporary Europe. **Perspectives on Planning and Urban Development in Belgium** Ashok K. Dutt, F.J. Costa, 2013-03-09 Belgium is a small country but its planning traditions are rooted in a heritage which has been greatly enriched by its central location in the West European community of nations. Medieval Renaissance and industrial age planning and urban design gave Belgium many examples of architectural masterpieces, especially in the city centers. During the post World War II period, Belgian planners and politicians legislated national planning laws that divided the country into 48 planning regions, also called sub regions and sectors, and empowered the municipalities (communes) with potent legal instruments to direct land development in accordance with their plans. Preparation, amendment and execution of these plans in a democratic society with a strong *laissez-faire* tradition have been painstaking but nonetheless significant tangible results have been achieved. The purpose of this book is to explore and assess the successes and failure of Belgian planning and make this record available in English so that they may remain facets of Belgian planning. The general socio-economic and historical background is provided with a view to understanding the theoretical, legal, physical and selected topical aspects of Belgian planning. In doing so, a multi-disciplinary approach has been taken and the authors have

been selected from a variety of disciplines Professor Louis Albrechts of the University of Leuven is a planning theorist Ms Brigitte Beernaert and Mr Karel Vroom are practicing planners Beernaert is also a planning historian Legal and administrative backgrounds are represented by the planning experts Dr *The European Culture Area* Terry G. Jordan-Bychkov, Bella Bychkova Jordan, 2002 Now in its fourth edition this leading text has been extensively revised to reflect the sweeping changes the past decade have brought to Europe and to incorporate new research in the field Employing a richly topical rather than a mechanistic region by region approach the book simultaneously presents the overarching unity of Europe as a human entity and its underlying internal diversity Inclusive intellectual rich in ideas lively controversial humanistic and above all interesting *The European Culture Area* is the text of choice for courses on the geography of Europe Visit our website for sample chapters **The Routledge Handbook of Language Policy and Planning** Michele Gazzola, François Grin, Linda Cardinal, Kathleen Heugh, 2023-09-28 *The Routledge Handbook of Language Policy and Planning* is a comprehensive and authoritative survey including original contributions from leading senior scholars and rising stars to provide a basis for future research in language policy and planning in international national regional and local contexts The Handbook approaches language policy as public policy that can be studied through the policy cycle framework It offers a systematic and research informed view of actual processes and methods of design implementation and evaluation With a substantial introduction 38 chapters and an extensive bibliography this Handbook is an indispensable resource for all decision makers students and researchers of language policy and planning within linguistics and cognate disciplines such as public policy economics political science sociology and education **Urban Regimes and Strategies** A. G. Papadopoulos, 1996-11-15 If a city based its planning decisions on the needs of an international bureaucracy rather than on the traditional needs of local residents and businesses how would that city change Alex G Papadopoulos addresses this question with a detailed study of how the nineteenth century quarters of Leopold and Nord Est in Brussels have been transformed materially and functionally since the European Communities decided to locate their administrative headquarters there in 1957 Drawing on game and rational choice theories spatial analysis and urban morphology studies Papadopoulos analyzes how the landscape of Brussels's center has evolved over the last three decades under the influence of successive coalitions of local and foreign elites He describes how international real estate developers form ephemeral flexible and specialized regimes of cooperation with governmental organizations at all levels and with special interest lobbies to carry out major urban projects while local neighborhood groups conservationists and political factions such as the Green Party oppose them with qualitatively similar regimes of resistance **Developments in Electoral Geography** Ron Johnston, Fred M. Shelley, Peter J. Taylor, 2014-10-03 The essays in this collection show how electoral geography has shifted from empiricist activity towards a closer involvement with the wider issues addressed by social scientists They illustrate the potential contributions that electoral geographers can make towards the understanding of global national and local societies

Nation Shapes Fred M. Shelley, 2013-04-23 This book provides a concise and comprehensive description of all of the borders of every country in the contemporary world including physical boundaries their historical evolution and border related conflicts with other countries *Nation Shapes The Story behind the World's Borders* examines the importance of country boundaries the disconnects between these borders related factors such as cultures religions and economies and how conflicts over boundaries between neighboring countries are articulated The book is organized geographically and by region of the world the Americas Africa Europe the Middle East South and Southeast Asia East and Southeast Asia and Australia and Oceania It provides comprehensive descriptions of the boundaries of each country in the world the historical evolution of these boundaries and current and potential future boundary disputes and conflicts While the work contains an entry for each country the emphasis is on countries of major importance in the modern global economy *Calvinists Incorporated* Anne Kelly Knowles, 1997-02 Bringing immigrants onstage as central players in the drama of rural capitalist transformation Anne Kelly Knowles traces a community of Welsh immigrants to Jackson and Gallia counties in southern Ohio After reconstructing the gradual process of community building Knowles focuses on the pivotal moment when the immigrants became involved with the industrialization of their new region as workers and investors in Welsh owned charcoal iron companies Setting the southern Ohio Welsh in the context of Welsh immigration as a whole from 1795 to 1850 Knowles explores how these strict Calvinists responded to the moral dilemmas posed by leaving their native land and experiencing economic success in the United States Knowles draws on a wide variety of sources including obituaries and community histories to reconstruct the personal histories of over 1 700 immigrants The resulting account will find appreciative readers not only among historical geographers but also among American economic historians and historians of religion *Historical Dictionary of Brussels* Paul F. State, 2015-04-16 Brussels has become the capital of Europe serving as the headquarters for key regional and international agencies including the European Union the North Atlantic Treaty Organization UN organizations multinational businesses lobbying firms governmental groups and nongovernmental organizations Its status as a diplomatic political and economic center assumes ever greater importance as the EU grows in depth and breadth This second edition of *Historical Dictionary of Brussels* covers its history through a chronology an introductory essay appendixes and an extensive bibliography The dictionary section has over 900 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent access point for students researchers and anyone wanting to know more about Brussels *The State, Development and Identity in Multi-Ethnic Societies* Nicholas Tarling, Terence Gomez, 2008-03-03 The controversial work of Amy Chua argues that as rapid modernization industrialization technological change and globalization bring about fundamental changes in national ethnic and class identities especially in developing countries there is a danger that the laissez faire capitalist system will cause serious racial conflagration especially in societies where there is ethnic minority market dominance combined with ethno nationalist type politicians who mobilize

support from ethnic majority communities by drawing attention to inequalities in wealth distribution This controversial work goes on to argue for an authoritarian political system with curbs against the corporate expansion of enterprises owned by ethnic minorities until parity in equity ownership among all communities is achieved This book tests the assumptions behind these arguments discussing ethnic communities identity economy society and state and the links between them in a range of countries in East Asia Southeast Asia and the Pacific and diaspora communities of Asian peoples in the West It demonstrates that identity transformation occurs as generations of minority communities succeed each other that old discourses of fixed origins which are assumed to bind ethnic communities into cohesive wholes do not apply that there are very extensive inter linkages in the daily activities of people of different ethnic and religious backgrounds that affirmative action type policies along racial lines can undermine overall societal cohesion and that there is no case for limiting democracy until economic equity is achieved This is a rich important book with huge implications for economic development and for states throughout the world as multi ethnic societies world wide become more extensive and more complicated *Routledge Library Editions: Political Geography* Various, 2021-06-23 From votes to strikes to street violence politics is intrinsically geographical Many of the books in this set originally published between 1964 and 1990 illustrate that the social contexts provided by localities are crucial in defining distinctive political identities and subsequent political activities *Restructuring the European State* Paolo Dardanelli, 2017-12-12 Why European integration fuels state disintegration **Defending French in Flanders, 1873-1974** David J. Hensley, 2023-12-28 This book examines the efforts of the French speaking minority in Flanders Belgium to maintain a legal and social presence of the French language in Flemish public life Chronologically the study is bookended by two developments almost exactly a century apart In 1873 the first laws were passed which required the use of Dutch in some aspects of public administration in Flanders challenging the de facto use of French among the Flemish ruling class One hundred and one years later the last French daily newspaper in Flanders collapsed marking the end of a once vibrant French language public sphere in Flanders The author contends that the methods and arguments by which French speakers defended the role of French in Flemish public life changed along with the social and political situation of this minority As the Flemish movement grew over the course of the twentieth century French speakers appeals to the free choice of language lost traction and they put forward claims that they represented an ethnolinguistic minority who deserved protection for their mother tongue Providing new insights for scholars of European history and in conversation with the literature on liberalism national identity and Francophonie this book demonstrates how the debate over the role of French in Flanders was at the center of Belgium s ethnolinguistic conflict the repercussions of which continue to be felt to this day *Secessionism and the European Union* Glen M.E. Duerr, 2015-10-30 Secessionist also called nationalist or pro independence political parties exist in many countries in the developed world they raise and then spend a lot of money win votes in elections and their elected officials serve in seats in local regional and national parliaments Yet despite all of this effort there has not been a

successful case of secession since 1921 when the Irish Free State effectively seceded from the United Kingdom UK Perhaps the biggest issue is that these secessionist political parties have rarely been popular enough to form a government even amongst their core ethnic group This is further compounded by the fact that secessionist parties have historically been unable to win support from immigrants or people outside their core ethnic and or linguistic group Given this context four central questions are posed in this study including whether and also why any of the secessionist parties have transitioned from ethnic based to civic based policy platforms Why have these secessionist parties not yet achieved independence And what role does the European Union EU play in facilitating or deterring secession in independence seeking regions within member states This study examines three different cases Flanders in Belgium Scotland in the UK and Catalonia in Spain to investigate how secessionist political parties are approaching the issue of independence All of the cases are different with respect to history governmental structure and economic situation Yet all of the cases are similar in some ways they are close to the same size in terms of population operate within mature democratic political systems have distinct secessionist political parties and all reside within member states of the EU Categorically in all cases there are also shared influences of the ability of the region to secede institutions interests and ideas

Just Democracy Philippe Van Parijs, 2014-12-01 Philippe Van Parijs is one of the world's leading political philosophers In this book he argues that the purpose of democracy should be to promote justice we need not just democracy in the sense of unqualified democracy but a just democracy Machiavelli and Rawls must be brought together In a series of provocative and timely essays he explores what creating such a just democratic political system would involve in order to tackle such issues as intergenerational justice multiculturalism and linguistic diversity He illustrates his arguments with examples drawn from the European Union and his native Belgium

The Minorities of Cyprus Nicholas Coureas, Marina Elia, Andrekos Varnava, 2009-05-27 This book examines the various minorities living in the island of Cyprus from the early modern late Venetian and early Ottoman period down to the present day It charts their history with special emphasis on their relations with the powers ruling Cyprus and with the two dominant Christian Greek and Muslim Turkish communities The theme running through the book is that despite being significant members of Cyprus society the three historical minorities Maronites Armenians and Latins were only included in society to a certain extent by the two major communities This was formalised in the post independence 1960 period when they were compelled to become members of either dominant community and thus they suffered internal exclusion by being regarded as religious sub groups of one of the two dominant communities rather than national minorities in their own right Within this general context the social legal and political roles customs culture and language of the various minorities are examined as they evolved through time and in response to internal and external developments affecting Cyprus in the political economic and global spheres They are discussed not as static entities but as evolving groups that have adapted with greater or lesser degrees of success to the radical and at times painful changes Cyprus has undergone especially over the last 150 years in all

walks of life Finally the question of what the future holds for the minorities of the island in the light of Cyprus EU membership and the prospect of reunification are also analysed This book is a product of the conference Minorities of Cyprus Past Present and Future which was held on 24 and 25 November 2007 at the European University Cyprus The Belgian Army and Society from Independence to the Great War Mario Draper, 2018-02-13 This book explores Belgian state building through the prism of its army from independence to the First World War It argues that party politics which often ran along geographical linguistic and religious lines prevented both Flemings and Walloons from reconciling their regional identities into a unified concept of Belgian nationalism Equally it obstructed the army from satisfactorily preparing to uphold Belgium's imposed neutrality before 1914 Situated uneasily between the two powerhouses of nineteenth century Europe Belgium offers a unique insight into the concepts of citizenship and militarisation in a divided society in the era of fervent nationalism By examining the composition experience and image of the army's officer corps and rank and file as well as those of the auxiliary forces this book shows that although military and civilian society often stood aloof from one another the army as a national institution offered a fleeting glimpse into the dichotomy that was pre war Belgium **Culture, Identity and Nationalism** Timothy Baycroft, 2004 This study examines the evolution of national and regional cultural and political identities in that northern region of France which borders Belgium over the two centuries which followed the French Revolution During that time the region was transformed by the development of the industrial economy population shifts war and occupation and numerous changes of political regime Through an analysis of a wide range of issues including language regional and national political movements educational policy attitudes towards immigrants and the border the press trade unions and the church as well as the attitude of the French State the author questions traditional interpretations of the process of national assimilation in France At the same time he illustrates how the Franco Belgian border originally an arbitrary line through a culturally homogeneous region became not only a significant marker for the identity of the French Flemish but a real cultural division TIMOTHY BAYCROFT is lecturer in French history University of Sheffield
