Regional Economic Development In The European Union And North America:

Regional Economic Development in the European Union and North America Morris L. Sweet, 1999-06-30

Mainstream economists have given insufficient attention to regional and urban economics and economic geography Comparing nations in the European Union and North America this book examines government activities aimed specifically at regional economic development It provides a wide ranging consideration of numerous facets of regional economic development encompassing both national and subnational levels Proposing that a period of economic prosperity is the best time to invest in regional development the author indicates the need for a direct role by the federal government The study is based on a review of the U S Canada and Mexico the European Union and supranational organizations such as NAFTA and the WTO and their internal impact on regions The comparison shows that the U S lags dramatically behind the European Union The EU particularly the Western European countries has long been in the forefront of regional policy and is actively formulating policy whereas the U S has no semblance of a federal regional policy

Regional Economic Development Compared: EU-Europe and the American South Collectif, 2016-09-29 Comparing economic development in a regional context both in the South of the United States and in the European Union today raises many fascinating questions How much money in the form of tax credits and subsidies should communities and states invest to attract foreign investors in the U S Should individual states and communities in the U S commit public funds in the form of tax money and tax credits etc to bring foreign businesses to their shores Is the argument of bringing jobs and more employment home the only argument that should count politically Or might these generous subsidies doled out to foreign businesses from public funds deprive local populations from improving their infrastructure and public education What if these foreign investors then locate to other shores if their investments are not profitable enough in the short run Might foreign investors come to the American South because it has never been unionized like the rest of the country Is the attraction of the non union South then only a means to get away from the burdens of stricter worker protection and social programs at home in Germany or Austria or elsewhere

European Socio-Economic

Integration Elias G. Carayannis, George M. Korres, 2012-12-06 Economic integration is one of the most noteworthy issues in international economic policy at the end of the twentieth century The recent examples of the European Union EU and the North American Free Trade Association NAFTA have raised important questions about the economic integration process and the possible establishment of economic unions in other parts of the world Against the backdrop of the financial crisis in Europe and prospects of increasing integration in Asia this volume showcases research from an international array of researchers to provide a basic understanding of the current issues problems challenges and opportunities for achieving integration addressing both empirical and theoretical aspects of such topics as monetary union social policy reform and social union public finance and technology policy The chapters in Part 1 are focused primarily on economic issues while Part 2 covers on social policy the welfare state and political reforms with a particular emphasis on the European Union Among the questions addressed What are the main determinants and implications for socio economic integration How can economic policy influence the growth and integration process Why is innovation important for regional economic development What has been the policy response so far and what lessons have we learned from it And finally what are our action lines for the future

Pastor, 2001 The Mexican peso crisis struck in late December 1994 coinciding with a new Mexican administration and the end of the first year of the North American Free Trade Agreement NAFTA The crisis poignantly highlighted the success and the inadequacy of the treaty success in the expansion of trade and capital flows and inadequacy in institutional capacity The Canadian Mexican and US governments defined the agreement so narrowly that they failed to devise a mechanism that could monitor anticipate plan or even respond to such a serious problem The president of Mexico Vicente Fox has boldly proposed transforming the free trade area into a common market like Europe's In this visionary study Robert A Pastor seizes Fox's idea and maps out the paths toward making it a reality He analyzes NAFTA's successes and shortcomings extracts lessons from the European Union's 40 years of reducing disparities between rich and poor countries and proposes ways that NAFTA can adapt and incorporate those lessons The centerpiece of the book is a detailed proposal for new institutions and North American plans for infrastructure and transportation immigration and customs and projects aimed at lifting the poorer regions This book is

the first to propose a detailed approach to a North American Community different from the European Common Market but drawing lessons from its experience It will be of considerable interest to policymakers as well as researchers and students of international political economy world trade and foreign affairs *The Rules of the Game in the Global Economy* Lee E. Preston, Duane Windsor, 1997-03-31 The subject of this study is the way that firms industries and nations organize their relationships with one another in order to engage in international business To the casual observer the processes of buying and selling borrowing and lending investing and receiving investment returns may seem much the same whether they occur within a single country or between and among businesses in different political jurisdictions In fact however business contacts between firms or individuals in different countries are significantly different from their domestic counterparts Not only do international buyers and sellers borrowers and lenders investors and earnings recipients often use different languages and currencies they also frequently operate under different basic rules governing contracts accounting practices and dispute settlement arrangements and they are subject to different tax systems Most important they may require explicit permission or at least facilitating arrangements from their respective governments in order to engage in any economic contact whatsoever It may well be that as Adam Smith believed there is a certain propensity in human nature to truck barter and exchange one 1 p 17 but the fact is that most important for another 1776 volume important markets and business relationships do not simply appear and evolve as natural phenomena In fact they are created by human effort and are highly organized and international business relationships are the most highly organized of all **Complete Guide to Indian Railways (RRB)**

Matambalya, 2014-08-27 Of the 54 African states only South Africa is categorised by the United Nations Industrial Development Organization UNIDO amongst industrialised countries The economic activities in Africa are still dominated by the production and trade of agricultural and mineral commodities This situation is in spite of the longstanding Africa European Union EU co operation which intends among other things to support Africa's industrialisation endeavours Imperatively a long road to substantive levels of industrialisation still lies ahead of most African countries This raises the question as to what role the international community could and should play in the twenty first century to provide the support needed to expedite Africa's industrial transformation This book argues that to supplement the initiatives of each African country international partnerships of both a North South and South South nature will serve better purposes if they are leveraged to develop productive capacities in African economies In order to enable the African countries to leverage their traditional partnership with the EU for industrialisation a paradigm shift is obligatory A feasible model should emulate the Japanese led flying geese model and the Chinese led bamboo capitalism model **Ultimate Guide to SSC Multi Tasking**
