Regional Restructuring Under Apartheid Urban And Regional Policies In Contemporary South Africa:

Contemporary South Africa and the Political Economy of Regional Development Methembe Mdlalose, Isaac Khambule, Nene Ernest Khalema, 2025-02-21 South Africa's struggle in balancing its domestic needs while playing a dynamic developmental role in the African region and global context exposes a complex web of relations shaped by its geostrategic location on the continent and the world and the staggering legacies of colonialism and apartheid. As such, understanding the complexities of the global economy and of South Africa's place in it is of great importance. This book builds upon an existing body of literature which has demonstrated that while the post-apartheid South African state has recast its nation-building goals with advances having been made notably in the area of a stellar post-apartheid constitution, policy directives and democratic political integration, economic integration and policy implementation presents a projection of captured interests where big business concerns are entrenched in the post-apartheid state's apparent neo-liberal turn. The main focus of the book is to contextualise issues relating to three main trends in global discourses on development which are significant for South Africa and indeed for the study of the political economy of regional development in the country from the prism of South Africa as a global capitalist state. These trends include the impact of globalisation, regionalisation and the marginalisation of South Africa and indeed the African continent in the global economy, thus unpacking the possible role that South Africa might play in regional development. This volume will be a valuable resource to academics, researchers and students in the fields of regional studies, economics and political theory as well as policymakers, planners and local economic development practitioners.

Regional and Local Economic Development in South Africa Etienne Louis Nel, 2019-07-23 First published in 1999, this volume responds to the recent application of Local Economic Development around the world and examines its impact in South Africa in the wake of the nation's recent political transition. Etienne Louis Nel observes how the initiative is taking on a dual form of community-led and authority-led initiatives. Nel explores the issue through areas including South Africa's space economy, a case study of Stuttenheim and local economic development in East London.

South African Urban Change Three Decades After Apartheid Anthony Lemon, Ronnie Donaldson, Gustav Visser, 2021-06-10 This book provides an analysis of South African urban change over the past three decades. It draws on a seminal text, *Homes Apart*, and revisits conclusions drawn in that collection that marked the final phases of urban apartheid. It highlights changes in demography, social as well as economic structure and their differential spatial expression across a range of urban sites in South Africa. The evidence presented in this book points to a very complex set of narratives in urban South Africa and one that cannot be reduced to a singular statement, so the conclusions of the various investigations are in many ways open. As urban apartheid represented one clear outcome, its post-apartheid urban legacies varies greatly from city to city. As such, this book is a great resource to students and academics focused on urban change in South African cities since

the demise of apartheid and scholars of urban policy making in South Africa and Southern urbanists generally

The Agrarian Question in South Africa Henry Bernstein, 2014-01-21 This is the first collection of its kind It presents a critical political economy of the agrarian question in post apartheid South Africa informed by the results of research undertaken since the transition from apartheid started in 1990 The articles by well known South African British and American scholars cover a variety of topical theoretical empirical and policy issues firmly rooted in an historical perspective

Urbanization in Post-Apartheid South Africa Richard Tomlinson, 2017-10-30 Originally published in 1990 Urbanization in Post Apartheid South Africa examines the democratic future of South Africa in the context of policy options and constraints The book looks at the issue of South Africa's future including access to land and housing marked regional differences in well being large peri urban settlements arising around all major towns and racial inequalities in access to farming land The book will be of interest to students of urbanization geography economics and planning and African studies

Shembe, Ancestors, and Christ Edley J. Moodley PhD, 2008-08-18 The Christian axis has shifted dramatically southward to Africa Asia and Latin America so much so that today there are more Christians living in these southern regions than among their northern counterparts In the case of Africa the African Initiated Churches founded by Africans and primarily for Africans has largely contributed to the exponential growth and proliferation of the Christian faith in the continent Yet even more profoundly these churches espouse a brand of Christianity that is indigenized and thoroughly contextual Further the power and popularity of the AICs beyond the unprecedented numbers joining these churches are attributed to their relevance to the existential everyday needs and concerns of their adherents in the context of a postcolonial Africa At the heart of Christian theology is Christology the confessed uniqueness of Christ in history and among world religions Yet this key feature of Christianity as with other important elements of the Christian faith may be variously understood and re interpreted in these indigenous churches The focus of this study is the amaNazaretha Church an influential religious group founded by the African charismatic prophet Isaiah Shembe in 1911 in the province of KwaZulu Natal South Africa The movement today claims a following of some two million adherents and has proliferated beyond the borders of South Africa to neighboring countries in Southern Africa The book addresses the complex and at times ambivalent understanding of the person and work of Christ in the amaNazaretha Church presenting the genesis history beliefs and practices of this significant religious movement in South Africa with broader implications for similar movements across the continent of Africa and beyond

Sustaining Cape Town Amy Davison, 2010-10-01 Although cities constitute the key contributors to unsustainable development especially due to their ecological and equity impacts they are also viewed as the vehicle for the transition to a sustainable future for humanity both in terms of technologies as well as policies and lifestyle changes This book introduces the theoretical principles which underpin the required transition to sustainable cities in general and Cape Town in particular The subsequent fourteen chapters tackle more specific areas of interventions and the key constraints towards realisation of related transition

interventions in the city of Cape Town **Equilibrium versus Understanding** Mark Addleson,1995-09-28 Equilibrium versus Understanding argues that neo classical theory is incapable of explaining or understanding human conduct The author asserts that a different sort of economic theory is required and proposes a hermeneutic one The book presents a comprehensive description and analysis of the methodologies involved ultimately rejecting the positivist Hope for South Africa Lewis H. Gann,1991 **Local Economic Development in the Changing World** Christian Rogerson,2018-01-16

Over the last two decades the concept and practice of Local Economic Development LED has gained widespread acceptance around the world as a locally based response to the challenges posed by globalization devolution local level opportunities and economic crises Support for local economic development is now firmly on the agenda of many national governments and key international agencies This volume examines the debates about Local Economic Development and examines some of the unfolding experiences of LED in the developing world The focus is upon the region of southern Africa and more especially upon post apartheid South Africa LED emerged in South Africa as one of the more significant post apartheid development options being pursued by empowered localities with the overt encouragement of national government Elsewhere in the developing world much interest surrounds the experience of LED in post apartheid South Africa which is seen as a laboratory for experimentation innovation and learning The seventeen chapters in this book examine the range of LED interventions that have been the basis for experimentation in the last decade including both pro market as well as pro poor interventions Key themes include debates about the most appropriate policy directions for LED its contribution towards sustainable development the role of social capital cluster support public procurement eco development good governance and tourism led LED The book also contains a series of detailed case studies on the implementation of LED in South Africa and the wider region of southern Africa including analyses of LED undertaken at a variety of scales from the provincial metropolitan and small town level Until now most research on local economic development has focused on the developed world This volume breaks new ground in applying LED policy and practices to problems specific to the developing world It will be of interest to scholars of development studies urban and regional planning human geography and urban studies *Globalization, Export Orientated Employment and Social Policy* S. Razavi,R. Pearson,C. Danloy,2004-04-30 Gender and development theory and analysis is replete with implicit assumptions that women s entry into the world of paid work will positively affect their status both in the household and in the public sphere Until recently the debate on global factories and export production has remained focused on women s individual experience of export employment and the extent to which this represents a positive opportunity or gross exploitation In spite of the extended discussion of rights and citizenship in the global economy little attention has hitherto been paid to the implications for women s entitlements arising out of their pivotal role in export sectors Whilst many assume that women s visible and crucial presence in key economic sectors will be reflected in the ways in which social policies are formulated there has been up to now little empirical and analytical engagement with this question

This volume bringing together detailed commissioned studies from six developing countries aims to fill this gap **Politics by Other Means** Richard L. Abel, 1995 First Published in 1995 Routledge is an imprint of Taylor Francis an informal company

Politics By Other Means Richard Abel, 2015-12-22 Politics by Other Means explores the fundamental question of how law can constrain political power by offering a pathbreaking account of the triumphant final decade of the struggle against apartheid Richard Abel presents case studies of ten major legal campaigns including challenges to pass laws black trade union demands for recognition state terror censorship resistance to the independent homelands and treason trials The Migration Experience in Africa Jonathan Baker, Tade Akin Aina, 1995 South Africa by Christian M Rogerson **The Oxford Handbook of the South African Economy** Arkebe Oqubay, Fiona Tregenna, Imraan Valodia, 2021-11-18 While sharing some characteristics with other middle income countries South Africa is a country with a unique economic history and distinctive economic features It is a regional economic powerhouse that plays a significant role not only in southern Africa and in the continent but also as a member of BRICS However there has been a lack of structural transformation and weak economic growth and South Africa faces the profound triple challenges of poverty inequality and unemployment Any meaningful debate about economic policies to address these challenges needs to be informed by a deep understanding of historical developments robust empirical evidence and rigorous analysis of South Africa's complex economic landscape This volume seeks to provide a wide ranging set of original detailed and state of the art analytical perspectives that contribute to scientific knowledge as well as to well informed and productive discourse on the South African economy While concentrating on the more recent economic issues facing South Africa the handbook also provides historical and political context It offers an in depth examination of strategic issues in the country's key economic sectors and brings together diverse analytical perspectives **Politics and Society in South Africa** Daryl Glaser, 2000-12-22 Darryl Glaser supplies an illuminating overview of the scholarship since 1970 on South Africa's political history His emphasis is on the debates between liberals Marxists and to a lesser extent post structuralists about the origins and the course of South Africa's racial order Tom Lodge University of Witwatersrand A well researched well argued readable interesting informative and competent study Capital and Class Providing a wide ranging and critical introduction to contemporary South Africa this book uses an interdisciplinary lens to introduce the student to the main debates historical context and issues that have characterized the study of South Africa over the last three decades Key topics include the role of colonialism capitalism and modernity in the formation of the racial order changes in the South African state questions of class race and ethnicity black resistance and the transition to democracy A number of underlying debates are critically evaluated For example the contribution of materialist and class analytic approaches the application of post structuralism and theories of modernity and the prospects for democratic liberalism and socialism in post apartheid South Africa Antipode, 1991 **The Apartheid City and Beyond** David M. Smith, 2003-09-02 This book explains how apartheid changed South Africa's cities how people responded to regain some

control over urban life and how the forces of urbanization held back under apartheid will affect the post apartheid era
