Regional Development Strategies A European Perspective:

Regional Development Strategies Jeremy Alden, Philip Boland, 1996 This textbook provides a conceptual theoretical and empirical analysis of regional development strategies within a European context

Regional Development Strategies Jeremy Alden, Philip Boland, 2013-10-18 Regional development strategies have become the focus of attention in many countries in the 1990s This textbook provides a conceptual theoretical and empirical analysis of regional development strategies within a European context It examines the various regional development strategies which are currently being pursued within the regions of Europe defined in its loosest term to include East and West The book describes how many different European regions are attempting to reduce regional disparities by engaging themselves in coherent and focused regional development strategies and there is also private sector approach to regional economic development There are many case studies from Europe and from other parts of the world including Japan thereby providing lessons that different countries and regions can learn from each other

Visions and Strategies in European Integration Lars Lundqvist, Lars O. Persson, 2012-12-06 The first years of the 90s have witnessed thorough political and economic changes in northern Europe The long period of strong political separation between east and west and the less strong economic separation between the northern and southern sides of the Baltic Sea seemed to be replaced by far reaching integration There is no doubt that further integration will have additional impacts on the regional patterns in northern Europe The amplitude and composition of these changes are difficult to project In this volume a number of scholars in regional science and related disciplines geography economics environmental and political sciences planning have brought together important material on the current processes that reshapes northern Europe Visions and strategies on local national and supranational levels are penetrated in depth A mosaic vision of the regional development pattern emerges highlighting the importance of cooperative and competitive strategies affecting the local conditions of European regions

Regional Development and Spatial Planning in an Enlarged European Union Neil Adams, 2016-04-01 The expansion of the European Union in 2004 has had significant consequences for both existing and new members of the Union New member states are assimilating into a new institutional and policy framework while the changing geography of Europe provides a different context for policy development in pre 2004 member states One of the more important fields in which these changes are impacting is regional development The admission of the new countries changes patterns of economic and social disparities across the territory of the European Union which in turn demands that existing approaches to regional development are reconsidered An approach which has proved to be one of the most innovative is spatial planning This book brings together a team of academics and policy makers from across the new Europe involved in regional development and spatial planning Providing insights into different approaches it offers a valuable opportunity to compare experiences across European borders

Creative Industries and Innovation in Europe Luciana Lazzeretti, 2013 In recent years the study of creativity has shifted from analysis of culture as an

end in itself to one of economic enhancement and its capability to generate wealth and promote economic development. Increasingly European cities and regions are using the arts to fuel wellbeing and reinvigorate economies after the comparative demise of more traditional industry and manufacturing. A growing literature is starting to highlight the innovation capacity of cultural and creative industries (CCIs) as they intersect the innovation processes of other manufacturing and services sectors with an innovative and creative output. Culture and creativity may be a strategic weapon to exit the present crisis and redefine an economic model of sustainable development. This book brings together a set of multidisciplinary contributions to investigate the kaleidoscope of European creativity focussing on CCIs and the innovations connected with them. The two main questions that this volume aims to address are: How can we identify, map and define CCIs in Europe? And how do they contribute to innovation and sustainable growth? The volume is split into two parts. The first part deals with the definition, measurement and mapping of the geography of European CCIs according to a local economic approach focussing on Italy, Spain, the UK, Austria, Denmark and France. This section surveys the different industrial typologies and spatial patterns which underline a significant dissimilarity between the North and the South of Europe, mainly due to the difference between heritage driven and technology driven countries. The section concludes with a case study on a Japanese creative city. The second part collects some interesting cases of innovation generated in creative spaces such as cities of art or creative clusters and networks. This entails the study of innovations among creative and non creative sectors, e.g. laser technologies in conservation of works of art and design networks in Italy and across European and non European countries, e.g. Spaghetti Western movies in the US or visual artists in New Zealand. Finally, an innovation capacity of culture that can regenerate mature sectors, e.g. the French food supply chain and Swiss watch Valley, or combine the creative and green economics paradigms, e.g. the green creative cities in North Europe, is analyzed. This book will appeal to academics, scholars and practitioners of urban and regional studies, cultural and creative economics and managerial and organization studies.

Place-based Economic Development and the New EU Cohesion Policy Philip McCann, Attila Varga, 2018-02-02. The new EU Cohesion Policy is one of the largest integrated development policies in the Western world and one of the largest of such programmes anywhere in the world. The reforms to the EU Cohesion Policy contain many different elements, each of which interlink in order to provide a cohesive overall framework. Some of the key elements in the reforms, however, relate to the conditionalities employed and their effects on policy governance and the control mechanism, the smart specialization approach to policy prioritization and resource allocation, the underlying place based logic of the policy and the overall results orientation and evaluation emphasis of the policy. In each of the areas of the EU Cohesion Policy reforms, many different scholars from the fields of regional studies, regional science and economic geography have played important roles in shaping the new policy, and the chapters here highlight these increasing interactions between the policy and academic spheres of debate. The collection of essays in this book each deal with specific aspects of these critical elements of the Cohesion Policy.

reforms In particular they examine some of the strengths and weaknesses of these individual elements and allowing for a better understanding of the origins and backgrounds of many of the ideas underpinning these reforms This book was previously published as a special issue of Regional Studies **Geography of Innovation** Nadine Massard,Corinne Autant-Bernard,2018-12-07 Within the European context of innovation for growth public and corporate actors are faced with pressing questions concerning innovation policy and the return on public and private investment in innovation at the regional level To help them answer these questions researchers in the field of Geography of Innovation propose interesting developments and new perspectives for the analysis of localized innovation processes interactions between science technology and industry and their impact on regional growth and competitiveness offering new foundations for designing and evaluating public policies The aim of this book is firstly to highlight major recent methodological advances in the Geography of Innovation particularly concerning the measurement of spatial knowledge externalities and their impact on agglomeration effects Strategic approaches using microeconomic data have also contributed to showing how firms strategies may interact with the local environment and impact upon agglomeration dynamics Interesting new results emerge from the application of these new methodologies to the analysis of innovation dynamics in European regions and this book shows how they can help revisit some of the main tenets of received wisdom concerning the rationale and impact of public policies on the Geography of Innovation This book was previously published as a special issue of Regional Studies **Governing Smart**

Specialisation Dimitrios Kyriakou,Manuel Palazuelos Martínez,Inmaculada Perriáñez-Forte,Alessandro Rainoldi,2016-10-04 In recent years smart specialisation has been a key building block of regional economic and development policy across the European Union Providing targeted support for innovation and research it has helped identify those areas of greatest strategic potential developing mechanisms to involve the fullest range of stakeholders before setting strategic priorities and using the policy to maximize the knowledge based potential of a region or territory Governing Smart Specialisation contributes to the emerging debate about the role of the entrepreneurial discovery process EDP which is at the heart of smart specialisation strategies for regional economic transformation Particular focus is placed on what methods procedures and institutional conditions are necessary in order to generate information that helps buttress policy decisions It draws on existing literature that analyses the relevance of EDP within smart specialisation for regional policy Chapters are complemented with case studies about regions with different geographical and socioeconomic characteristics in Europe from Norwegian regions to the Greek region of East Macedonia and Thrace As one of the first books to directly address the EDP this is essential reading for students interested in regional economics public policy urban studies and technology innovation as well as for policy makers in regional and national administrations **Territorial Policy and Governance** Iain Deas,Stephen Hincks,2017-02-24 In response to both policy and conceptual debates alternative narratives have begun to emerge about territorial governance and policymaking As local and regional policy actors strive to respond to the

geographically uneven effects of the economic crises of the early twenty first century a crucial question emerges what are the opportunities and challenges presented by alternative forms of territorially based governance and policy The aim of this edited volume therefore is critically to explore the opportunities and challenges presented by different forms of territorial policy and governance Drawing on conceptual debates and empirical research from the United Kingdom and other international contexts the contributors engage with issues around the politics and governance of territorial development economic development planning and regeneration and the environment Territorial Policy and Governance addresses the question of how alternative forms of territorial governance and policy can help to shape patterns of urban and regional development highlighting the related opportunities constraints and challenges that confront their operationalisation This book will be essential reading for international audiences with an interest in territorial development governance politics human geography and planning and regeneration

Cultural Political Economy of Small Cities Anne Lorentzen, Bas van Heur, 2012-02-13 The volume highlights ongoing changes in the political economy of small cities in relation to the field of culture and leisure Culture and leisure are focal points both to local entrepreneurship and to planning by city governments which means that these developments are subject to market dynamics as well as to political discourse and action Public private partnerships as well as conflicts of interests characterise the field and a major issue related to the strategic development of culture and leisure is the balance between market and welfare This field is gaining importance in most cities today in planning production and consumption but to the extent that these changes have drawn academic attention it has focused on large metropolitan areas and on creative clusters and flagship high culture projects Smaller cities and their often substantively different cultural strategies have been largely ignored thus leading to a huge gap in our knowledge on contemporary urban change By bringing together a number of case studies as well as theoretical reflections on the cultural political economy of small cities this volume contributes to an emerging small cities research agenda and to the development of policy relevant expertise that is sensitive to place specific cultural dynamics In taking this approach the volume hopes to contribute to emerging research on culture and leisure economies by developing a differentiated spatial dimension to it without which sustainable urban strategies cannot be developed This book integrates perspectives of economic development with questions of governance and equity in relation to the fields of culture and leisure planning and development This book should be of interest to students and researchers of Urban Studies and Planning Regional Studies and Economics as well as Sociology and Geography

Planning in the UK Andy Thornley, 2018-10-24 This title was first published in 2003 The advent of the Labour government in 1997 provoked major change in the political landscape of the UK Priorities changed and different themes moved to the top of the agenda such as local democracy community transparency sustainability and coordinated or joined up thinking Many of the new priorities such as community empowerment involved a reappraisal of the purpose and procedures of planning while others changed the legislative and institutional frame within which planning

operated This indispensable volume traces and analyzes the implications for planning created by this political shift Presenting an overview of the general debates on contemporary UK planning the book proceeds to identify four major areas as key themes for planning in the third millennium These are the new institutional context ensuring social inclusion and participation promoting sustainability and the debate over building at higher densities on Brownfield sites Illustrated with in depth case studies the book provides a timely and important examination of the current state of planning in the UK and suggests best case scenarios for the future *Shrinking Cities* Harry W. Richardson, Chang Woon Nam, 2014-03-14 This book examines a rapidly emerging new topic in urban settlement patterns the role of shrinking cities Much coverage is given to declining fertility rates ageing populations and economic restructuring as the factors behind shrinking cities but there is also reference to resource depletion the demise of single company towns and the micro location of environmental hazards The contributions show that shrinkage can occur at any scale from neighbourhood to macro region and they consider whether shrinkage of metropolitan areas as a whole may be a future trend Also addressed in this volume is the question of whether urban shrinkage policies are necessary or effective The book comprises four parts world or regional issues with reference to the European Union and Latin America national case studies the United States India China Korea Taiwan Germany Romania and Estonia city case studies Detroit Buffalo Cleveland Naples Belfast and Halle and broad issues such as the environmental consequences of shrinking cities This book will be of interest to scholars and practitioners working in the fields of urban studies economic geography and public policy **Approaches to Economic Geography** Ray Hudson, 2016-06-10 The last four decades have seen major changes in the global economy with the collapse of communism and the spread of capitalism into parts of the world from which it had previously been excluded Beginning with a grounding in Marxian political economy this book explores a range of new ideas as to what economic geography can offer as it intersects with public policy and planning in the new globalised economy *Approaches to Economic Geography* draws together the formidable work of Ray Hudson into an authoritative collection offering a unique approach to the understanding of the changing geographies of the global economy With chapters covering subjects ranging from uneven development to social economy this volume explores how a range of perspectives including evolutionary and institutional approaches can further elucidate how such economies and their geographies are reproduced Subsequent chapters argue that greater attention must be given to the relationships between the economy and nature and that more consideration needs to be given to the growing significance of illegal activities in the economy The book will be of interest to students studying economic geography as well as researchers and policy makers that recognise the importance of the relationships between economy and geography as we move towards a sustainable future economy and society **Leadership and Place** Chris Collinge, John Gibney, Chris Mabey, 2013-10-18 Despite the radical transformation of society associated with globalisation shifting patterns of demography and the revolution in information and communication technologies over the last two decades we remain

profoundly attached to place in economic social cultural and emotional terms The idea of sustainable place shaping has made its way to the heart of the debate on the form and delivery of integrated economic development planning housing regeneration education transport and health policy for our neighbourhoods towns cities and regions The delivery of policy for place shaping has become a far more complex cross boundary and relational leadership task and there is now a requirement for a refreshed approach to leadership development for collaborative learning and associational working Going forward what is needed is a more insightful and comprehensive conceptual framework related to the leadership of place that takes account of the paradigm shift occurring in economic development planning and regeneration studies Against this background this timely book takes stock of the leadership literature and connects with the experience and views of those working in economic development planning and regeneration In this book we seek to enhance the discussion of these new leadership challenges This collection first appeared as a special issue of Policy Studies and is now published by kind permission in the Regional Studies Association book series Regions and Cities

Soft Spaces in Europe Phil Allmendinger, Graham Haughton, Jörg Knieling, Frank Othengrafen, 2015-05-01 The past thirty years have seen a proliferation of new forms of territorial governance that have come to co exist with and complement formal territorial spaces of government These governance experiments have resulted in the creation of soft spaces new geographies with blurred boundaries that eschew existing political territorial boundaries of elected tiers of government The emergence of new non statutory or informal spaces can be found at multiple levels across Europe in a variety of circumstances and with diverse aims and rationales This book moves beyond theory to examine the practice of soft spaces It employs an empirical approach to better understand the various practices and rationalities of soft spaces and how they manifest themselves in different planning contexts By looking at the effects of new forms of spatial governance and the role of spatial planning in North western Europe this book analyses discursive changes in planning policies in selected metropolitan areas and cross border regions The result is an exploration of how these processes influence the emergence of soft spaces governance arrangements and the role of statutory planning in different contexts This book provides a deeper understanding of space and place territorial governance and network governance

Socio-Economic Segregation in European Capital Cities Tiit Tammaru, Maarten van Ham, Szymon Marcińczak, Sako Musterd, 2015-07-24 Growing inequalities in Europe are a major challenge threatening the sustainability of urban communities and the competitiveness of European cities While the levels of socio economic segregation in European cities are still modest compared to some parts of the world the poor are increasingly concentrating spatially within capital cities across Europe An overlooked area of research this book offers a systematic and representative account of the spatial dimension of rising inequalities in Europe This book provides rigorous comparative evidence on socio economic segregation from 13 European cities Cities include Amsterdam Athens Budapest London Milan Madrid Oslo Prague Riga Stockholm Tallinn Vienna and Vilnius Comparing 2001 and 2011 this multi factor approach links segregation to four underlying universal structural

factors social inequalities global city status welfare regimes and housing systems Hypothetical segregation levels derived from those factors are compared to actual segregation levels in all cities Each chapter provides an in depth and context sensitive discussion of the unique features shaping inequalities and segregation in the case study cities The main conclusion of the book is that the spatial gap between the poor and the rich is widening in capital cities across Europe which threatens to harm the social stability of European cities This book will be a key reference on increasing segregation and will provide valuable insights to students researchers and policy makers who are interested in the spatial dimension of social inequality in European cities Chapters 1 and 15 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 3 0 license

Regional Disparities in Small Countries Daniel Felsenstein, 2005-05-09 This book challenges the common perception that significant regional disparities do not exist in small countries As small developed countries become increasingly competitive and their economic structures resemble those of the large a re assessment of the regional consequences of these changes is of timely importance Regional Disparities in Small Countries presents a systematic discussion of the unique theoretical methodological and measurement challenges in analyzing regional inequalities in small countries and a series of empirical analyses addressing the issue of regional convergence and divergence in these countries With contributions from leading regional scientists and economists this book also examines the policy experience of small countries in closing regional gaps and the effectiveness of public interventions in this field see Reviews

The Creative Class Goes Global Charlotta Mellander, Richard Florida, Bjørn T. Asheim, Meric Gertler, 2013-11-07 The whole landscape of research in urban studies was revolutionized by the publication of Richard Florida's The Rise of the Creative Class in 2002 and his subsequent book entitled The Flight of the Creative Class has helped to maintain a decade long explosion of interest in the field While these two books examine the creative class in the context of the United States research has emerged which investigates the creative class worldwide This book brings together detailed studies of the creative class in cities across the globe examining the impact of the creative class on growth and development The countries covered include the United Kingdom the Netherlands Germany Australia China Japan and Canada in addition to the United States Taken together the contributions deepen our understanding of the creative class and the various factors that affect regional development highlighting the similarities and differences between the creative class and economic development across countries This book will be of great interest to scholars of economic geography regional economics urban sociology and cultural policy as well as policy makers involved in urban development

Working Regions Jennifer Clark, 2013-05-29 Working Regions focuses on policy aimed at building sustainable and resilient regional economies in the wake of the global recession Using examples of four working regions regions where research and design functions and manufacturing still coexist in the same cities the book argues for a new approach to regional economic development It does this by highlighting policies that foster innovation and

manufacturing in small firms focus research centers on pushing innovation down the supply chain and support dynamic design driven firm networks This book traces several key themes underlying the core proposition that for a region to work it has to link research and manufacturing activities namely innovation and production in the same place Among the topics discussed in this volume are the issues of how the location of research and development infrastructure produces a clear role of the state in innovation and production systems and how policy emphasis on pre production processes in the 1990s has obscured the financialization of intellectual property Throughout the book the author draws on examples from diverse industries including the medical devices industry and the US photonics industry in order to illustrate the different themes of working regions and the various institutional models operating in various countries and regions Entrepreneurial Knowledge, Technology and the Transformation of Regions Charlie Karlsson, Börje Johansson, Roger Stough, 2013-06-26 In recent years policy makers have given much credence to the role of entrepreneurship in the transformation of regions As a result a new set of policy responses have emerged that focus on the support of new venture creation small business growth and idea generation and commercialization While there is a wealth of research about entrepreneurship in general less attention has been given to the development of new tools and programs in support of entrepreneurial activities and to the ways in which the emergence the character and the types of entrepreneurship policies might differ between countries In particular the transatlantic perspective is of special interest because of the pioneering role of the United States in this area and also due to the European Union s focus on economic competitiveness The contributions included in this book explore the emergence of entrepreneurship policies from a transatlantic comparative perspective and address different aspects of entrepreneurship policies including local entrepreneurship policies and the relationship between knowledge based industries and entrepreneurship policies
