Italian Cuisine Alberto Capatti, Massimo Montanari, 2003-09-17 Italy the country with a hundred cities and a thousand bell towers is also the country with a hundred cuisines and a thousand recipes Its great variety of culinary practices reflects a history long dominated by regionalism and political division and has led to the common conception of Italian food as a mosaic of regional customs rather than a single tradition Nonetheless this magnificent new book demonstrates the development of a distinctive unified culinary tradition throughout the Italian peninsula Alberto Capatti and Massimo Montanari uncover a network of culinary customs food lore and cooking practices dating back as far as the Middle Ages that are identifiably Italian o Italians used forks 300 years before other Europeans possibly because they were needed to handle pasta which is slippery and dangerously hot o Italians invented the practice of chilling drinks and may have invented ice cream o Italian culinary practice influenced the rest of Europe to place more emphasis on vegetables and less on meat o Salad was a distinctive aspect of the Italian meal as early as the sixteenth century The authors focus on culinary developments in the late medieval Renaissance and Baroque eras aided by a wealth of cookbooks produced throughout the early modern period They show how Italy's culinary identities emerged over the course of the centuries through an exchange of information and techniques among geographical regions and social classes Though temporally spatially and socially diverse these cuisines refer to a common experience that can be described as Italian Thematically organized around key issues in culinary history and beautifully illustrated *Italian Cuisine* is a rich history of the ingredients dishes techniques and social customs behind the Italian food we know and love today

Italian Identity in the Kitchen, or Food and the Nation Massimo Montanari, 2013-07-23 Massimo Montanari draws readers into the far flung story of how local and global influences came to flavor Italian identity The fusion of ancient Roman cuisine which consisted of bread wine and olives with the barbarian diet rooted in bread milk and meat first formed the basics of modern eating across Europe From there Montanari highlights the importance of the Italian city in the development of gastronomic taste in the Middle Ages the role of Arab traders in positioning the country as the supreme producers of pasta and the nation's healthful contribution of vegetables to the fifteenth century European diet Italy became a receiving country with the discovery of the New World absorbing corn potatoes and tomatoes into its national cuisine As disaster dispersed Italians in the nineteenth century new immigrant stereotypes portraying Italians as macaroni eaters spread However two world wars and globalization renewed the perception of Italy and its culture as unique in the world and the production of food constitutes an important part of that uniqueness
