Regulating Society:

Regulating the Global Information Society Christopher Marsden, 2005-07-27 An outstanding line up of contributors explore the regulation of the internet from an interdisciplinary perspective In depth coverage of this controversial area such as international political economy law politics economics sociology and internet regulation *Regulating the Global Information Society* covers the differences between both US and UK approaches to regulation and establishes where policy is being made that will influence the future direction of the global information society from commercial democratic and middle ground perspectives

Regulating a New Society Morton Keller, 1994 His final area of concern is one that assumed new importance after 1900 social policy directed at major groups such as immigrants blacks Native Americans and women

Society, Regulation and Governance Regine Paul, Alfons Bora, Marc Mölders, Michael Huber, Peter Münte, 2017-07-28 *Society Regulation and Governance* brings together sociologists political scientists legal scholars and historians for an interdisciplinary critical evaluation of alleged new modes of social change specifically risk publics and participation The editors aim is to refocus scholarly attention on the possibility of intentional social change in contemporary society which underpin all novelty claims in regulation and governance research and practice This book gives significant insight into the new methods of social change suiting a wide range of social science academics due to its collaborative nature Television, Regulation and Civil Society in Asia Philip Kitley, 2003-08-29 Kitley critically compares Western principles of broadcasting civil society and cultural regulation with alternative Asian practices of regulation and organization Scarcity, regulation, and the abundance society Mark A. Lemley, Deven Desai, 2023-04-27 The Regulation of Organised Civil Society Jonathan Garton, 2009-06-25 Although much has been written on organised civil society the loose collective of organisations that operate outside the public sector the private market and the family unit over the past 30 years there has been little jurisprudential analysis This is in spite of the fact that a number of jurisdictions including England New Zealand Northern Ireland and Scotland have recently implemented major reforms to the regulatory frameworks in which civil society organisations operate with a particular emphasis on the charitable sectors Redressing the balance this monograph considers from first principles when it is appropriate to regulate organised civil society and how that regulation might best be accomplished Four broad issues are addressed a whether the activities undertaken by civil society organisations are distinct from the activities undertaken by the state or the market either because they are pursued in unique ways or because they produce unique outcomes b if so whether it is justifiable to regulate organised civil society activities in a sector specific way c if it is whether the peculiar characteristics of these activities make one type of regulation more appropriate than another and d whether it is appropriate to distinguish between charities and other civil society organisations for regulatory purposes The monograph integrates the traditionally separate disciplines of civil society theory and regulation theory to provide answers to these questions and advance a rudimentary theory of regulation specific to organised civil society Better Business

Regulation in a Risk Society Alberto Alemanno, Frank den Butter, André Nijssen, Jacopo Torriti, 2012-09-14 The premise of this volume is that business regulations are expected to grow in the near future as a consequence of the emergence of a world risk society Risks related to terrorism climate change and financial crises for example will penetrate all conditions of life Increasingly the decisions and actions of some bring about risks for many in this era of globalization Controlling these risks implies managing the world through high quality regulation with a particular emphasis on businesses and financial institutions Central to this approach is the argument that a major if not the primary aim of regulation is to internalize externalities or in a broader context to repair market failure Such repair can only be accomplished when the costs are smaller than the welfare gains Featuring contributions from researchers and policy analysts from the fields of economics management law sociology political science and environmental policy this book focuses on three major topics Social risks and business regulation Preconditions for better business regulation Theoretical issues related to better business regulation Collectively the authors demonstrate that the easier it is for regulated businesses to comply at the lowest costs possible without jeopardizing the related public goals the greater the degree of compliance When successful the net result is a balance of individual and collective net benefits and by further implication sustainable business practice and economic growth

Law, Regulation and Governance in the Information Society Maurizio Borghi, Roger Brownsword, 2022-12-30 This edited collection seeks to map the landscape of contemporary informational interests to evaluate a range of recognised and putative rights and wrongs associated with modern information societies and to consider how law regulation and governance should be deployed in response New technologies and new applications constantly disrupt our values our framing of our world and our sense of where we are and who we are In our information societies we entertain mixed hopes and expectations as well as significant fears and concerns At the root of these there are a number of informational interests on the basis of which certain rights are claimed and particular wrongs denounced This book addresses these interests considering them as relating primarily to the integrity of the informational ecosystem to the accessibility accuracy and authenticity of public information and to our individual ability to control the outward and inward flows of information that relates directly to ourselves Covering a wide range of subjects the book's interrogation of our contemporary information society is oriented around two questions first whether the information society in which we live is the kind of society that we think it should be and second if not what we can reasonably expect law regulation and governance to do in providing the basis for improving it This book will be of considerable interest to those working at the intersection of law and technology as well as others concerned with the legal political and social aspects of our information society

The State and Civil Society Nicole Bolleyer, 2018-10-25 State regulation of civil society is expanding yet widely contested often portrayed as illegitimate intrusion Despite ongoing debates about the nature of state voluntary relations in various disciplines we know surprisingly little about why long lived democracies adopt more or less constraining legal approaches in this sphere in which state

intervention is generally considered contentious Drawing on insights from political science sociology comparative law as well as public administration research this book addresses this important question conceptually theoretically and empirically It addresses the conceptual and methodological challenges related to developing systematic comparative insights into the nature of complex legal environments affecting voluntary membership organizations when simultaneously covering a wide range of democracies and the regulation applicable to different types of voluntary organizations Proposing the analytical tools to tackle those challenges it studies in depth the intertwining and overlapping legal environments of political parties interest groups and public benefit organizations across 19 long lived democracies After presenting an innovative interdisciplinary theoretical framework theorizing democratic states legal disposition towards or their disinclination against regulating voluntary membership organizations in a constraining or permissive fashion this framework is empirically tested Applying Qualitative Comparative Analysis QCA the comparative analysis identifies three main paths accounting for the relative constraints in the legal environments democracies have created for organized civil society defined by different configurations of political systems democratic history their legal family and voluntary sector traditions Providing the foundation for a mixed methods design three ideal typical representatives of each path Sweden the UK and France are selected for the in depth study of these legal environments long term evolution to capture reform dynamics and their drivers that have shaped group and party regulation over many decades

Regulating Business for Peace Jolyon Ford, 2015-02-05 This book addresses gaps in thinking and practice on how the private sector can both help and hinder the process of building peace after armed conflict It argues that weak governance in fragile and conflict affected societies creates a need for international authorities to regulate the social impact of business activity in these places as a special interim duty Policymaking should seek appropriate opportunities to engage with business while harnessing its positive contributions to sustainable peace However scholars have not offered frameworks for what is considered appropriate engagement or properly theorised techniques for how best to influence responsible business conduct United Nations peace operations are peak symbols of international regulatory responsibilities in conflict settings and debate continues to grow around the private sector's role in development generally This book is the first to study how peace operations have engaged with business to influence its peace building impact

Civil Society and Financial Regulation Lisa Kastner, 2017-10-12 Coalitions of consumer groups NGOs and trade unions have traditionally been considered politically weak compared to well organized and resourceful financial sector groups which dominate or capture financial regulatory decisions However following the 2008 financial crisis civil society groups have been seen to exert much more influence with politicians successfully implementing financial reform in spite of industry opposition Drawing on literature from social movement research and regulatory politics this book shows how diffuse interests were represented in financial regulatory overhauls in both the United States US and the European Union EU Four cases of reform in the post crisis regulatory context are analyzed

the creation of a new Consumer Financial Protection Bureau in the US the introduction of new consumer protection regulations through EU directives the failure of attempts to introduce a financial transaction tax in the US and the agreement of 11 EU member states to introduce such a tax It shows how building coalitions with important elite allies outside and inside government helped traditionally weak interest groups transcend a lack of material resources to influence and shape regulatory policy By engaging with a less well known side of the debate it explains how business power was curbed and diverse interests translated into financial regulatory policy

The Prudential Regulation of the Equitable Life Assurance Society Great Britain. Treasury, 2009 In response to the Parliamentary and Health Service Ombudsman's investigation Equitable Life a decade of regulatory failure HC 815 4th report session 2007 08 ISBN 9780102957303 the Government accepts that maladministration occurred and that in some cases this caused an injustice to some policyholders The Government apologises to Equitable Life policyholders and will take action to establish a fair ex gratia payment scheme for those policyholders who have suffered a disproportionate impact as a result of the relevant maladministration although it does not accept that it would be appropriate to provide compensation in the form suggested by the Ombudsman Sir John Chadwick has been invited to advise the Government on the matters relevant to disproportionate impact suffered by current and former Equitable Life policyholders The Ombudsman's investigation did not consider the actions of Equitable Life but such matters are relevant to the design of the payment scheme especially as Lord Penrose's report HC 290 session 2003 04 ISBN 9780102926880 found that Equitable Life was principally the author of its own misfortunes Sir John will advise on an appropriate apportionment of losses between the public bodies investigated by the Ombudsman and the actions of Equitable Life and other parties
