Regulating The European Environment:

Regulating the European Environment Thomas Handler, 1994 Environmental regulation imposes strict limits on business activity but it also offers opportunities to gain an advantage in the market and to meet industry compliance requirements Understanding the limitations and the market potential is difficult and time consuming but also important and rewarding Regulating the European Environment cuts straight through the uncertainties It is designed not to be exhaustive but to provide an initial understanding of the general shape of the mass of rules and legislation in Europe and to provide a basis for further detailed analysis of the subject if required Regulating Europe Pio Baake, 1996 First published in 2004 Routledge is an imprint of Taylor Francis an informa company

Environmental and Health Regulation in the United States and the European Union M. Smith, 2012-03-12 During the first decade of the twenty first century the United States increasingly has relaxed its regulatory posture in the face of critical challenges to public health and the environment This is true for regulation of recycling of end of life products including autos and electronic components potentially hazardous chemicals and health claims on food labels Coincidentally the European Union has gravitated toward more restrictive regulation in these very same areas How might we explain these diverging regulatory trajectories of the world s two largest market economies in an era of rising public awareness of dangers to the public and the planet The explanation derives not from cultural differences in willingness to tolerate risk but rather from distinctive regulatory tradeoffs between environment and competitiveness in the United States and environment competitiveness and integration in the EU

Krämer's EU Environmental Law Ludwig Krämer, Christopher Badger, 2024-05-30 The new edition of this essential book details the present state of EU environmental law as it has developed over the last 50 years The author was personally involved in its making and enforcement having worked for more than 30 years in the environmental department of the European Commission The book therefore provides unique insights into this complex field The book discusses in detail governance and other horizontal issues such as competence questions the division of power between the EU and its Member States the individual right to a clean environment and the integration of environmental requirements into other EU policies such as energy transport agriculture fisheries trade and tourism New chapters elaborate on the relationship between UK and EU law after Brexit written by Christopher Badger and on the global effect of EU environmental law and policy Other chapters deal with climate change biodiversity water protection air and noise pollution products and waste Implementation of EU law in the Member States and the prominent role of the EU Court of Justice with its more than 1 100 environmental judgments are discussed as well as an overall assessment of EU law and policy in environmental matters and its perspectives to 2030 under the 8th EU environmental action programme At a time of globalisation the book is indispensable reading for students researchers and practising lawyers alike

Regulating Europe Giandomenico Majone, 2002-11-01 Regulating Europe explains why economic and social regulation is rapidly becoming the new frontier of public policy and public administration in Europe both

at the national and EU levels Statutory regulation implemented by independent regulatory bodies is replacing not only older forms of state intervention but also to some extent the redistributive policies of the welfare state Thus Regulating Europe is an examination of the emergence of the regulatory state as the successor of the Keynesian welfare state of the past Contributions emphasize the parallelism of policy developments at the national and European levels Part one provides the necessary theoretical background including a new model of demand and supply of Community regulation The second part presents a series of case studies of particular regulatory policies and institutions in the UK Germany France Spain and the EU Part three evaluates current policy and institutional developments pointing out how the lack of a tradition of statutory regulation in Europe affects the design of the new institutions Special attention is devoted to the issue of the democratic accountability of expert politically independent agencies a problem which contrary to widespread opinion is as severe at the national level as it is in Brussels It is suggested that the requirements of democratic accountability and of subsidiarity cannot be met by re nationalizing European policies much less by increasing the current level of centralization A more promising solution is the development of regulatory networks closely integrating national and supranational regulators **EU**

Environmental Law and Policy David Langlet,Said Mahmoudi,2016 An accessible and comprehensive resource this volume details the structure and logic of EU environmental law and enables readers to quickly gain a thorough understanding of the different areas of EU secondary law pertaining to the protection of the environment **Research Handbook on EU**

Governing European Communications Maria Michalis, 2007-01-01 Governing European Communications provides a comprehensive and up to date account of the emergence dynamics and evolution of European level communications governance in the post war era focusing on telecommunications and television policies and regulation and their technological convergence Concentrating on the EU the book embeds governance within broader economic and political developments in a global context and demonstrates that European governance has been more about the character rather than the level of regulation

EU Environmental Law, Governance and Decision-Making Maria Lee, 2014-01-12 A vast and diverse body of EU law addresses an enormous range of environmental matters This book examines a number of areas of substantive EU environmental law focusing on the striking preoccupation of EU environmental law with the structure of decision making It highlights the observation that environmental protection and environmental decision making depend intimately on both detailed specialised information about the physical state of the world and on political judgments about values and priorities It also explores the elaborate mechanisms that attempt to bring these distinctive decision making resources into EU environmental law in areas including industrial pollution chemicals regulation environmental assessment and climate change

Handbook of European Environmental and Climate Law Patrick Thieffry, 2021-05-06 This Handbook of European Environment and Climate Law is the 2nd edition of the work previously titled Handbook of European Environment Law It is associated with the *Trait de droit europ en de l environnement et du climat* and the *Manuel de droit europ en de l environnement et du climat* both in the French language and published in the same collection and with which it shares a same structure The *Trait* provides a more in depth approach with further historic policy and caselaw considerations and more complete references The introduction in the book s title of the climate dimension while it was already quite present in the previous edition is testimony to its growing importance absent a dedicated EU policy and corresponding legislative basis Climate law is covered in its many occurrences along the work its specificities noted and their consequences recognized especially with respect to the international background which brings about novel legal interventions an upheaval of classical

approaches through the creation of a new governance for the implementation of the Paris Agreement and of the resulting EU legislation. The recurring changes in the many and diverse environmental legislations are also of course presented in context including in light of the growing importance of circular economy and the proposal of a European Green Deal. The growing interference of fundamental rights is henceforth considered. Charter of Fundamental Rights of the Union, Convention for the Protection of Human Rights and Fundamental Freedoms etc. More broadly, the development of environmental and climate disputes settlement is accounted for beyond the traditional recourse to the EU judges in the national courts including through transnational private litigation and in international arbitration.

EU Environmental Law Geert Van Calster, Leonie Reins, 2017-02-24. EU Environmental Law discusses the reality for legal practice throughout the EU as environmental law of the Member States is becoming ever less national. Consequentially, European environmental regulation is becoming more complex and interrelated, making it an emerging field of study for European law graduates and an area of increasing exposure to the legal profession. This book gives readers a thorough overview of core European environmental law with a section on the basic framework and principles as well as on substantive law issues giving insight into the legislation in the different sectors and the most topical developments.

Regulating Shale Gas Leonie Reins, 2017-04-28. *Regulating Shale Gas* discusses the regulatory context of shale gas in the European Union and draws conclusions on the EU's broader approach towards the regulation of new technologies. Providing the first dedicated examination of the overall regulatory context of shale gas in the EU, Leonie Reins reveals how the EU's new constitutional setup after the Lisbon Treaty has complicated rather than facilitated the EU's quest for a common energy policy.

EU Administrative Law Paul Craig, 2018-10-25. The third edition of *EU Administrative Law* provides comprehensive coverage of the administrative system in the EU and the principles of judicial review that apply in this area. This revised edition provides important updates on each area covered including new case law, institutional developments and EU legislation. These changes are located within the framework of broader developments in the EU. The chapters in the first half of the book deal with all the principal variants of the EU administrative regime. Thus there are chapters dealing with the history and taxonomy of the EU administrative regime, direct administration, shared administration, comitology, agencies, social partners and the open method of coordination. The coverage throughout focuses on the legal regime that governs the particular form of administration and broader issues of accountability drawing on literature from political science as well as law. The focus in the second part of the book shifts to judicial review. There are detailed chapters covering all principles of judicial review and the discussion of the law throughout is analytical and contextual. It begins with the principles that have informed the development of EU judicial review. This is followed by a chapter dealing with the judicial system and the way in which reform could impact on the subject matter of the book. There are then chapters dealing with competence, access, transparency, process, law, fact and discretion, rights, equality, legitimate expectations, two chapters on proportionality, the precautionary principle, two chapters on remedies and the
