International Contracts and National Economic Regulation: Dispute Resolution Through International Commercial Arbitration Mahmood Bagheri, 2000-12-06 The growth of national economic regulation and the process of globalisation increasingly expose international transactions to an array of regulations from different jurisdictions These developments often contribute to widespread international contractual failures when parties claim the incompatibility of their contractual obligations with regulatory laws The author challenges conventional means of dispute resolution and argues for an interdisciplinary approach whereby disciplines such as international economic law conflict of laws contract law and economic regulations are functionally united to resolve international and multifaceted regulatory disputes He identifies the normative foundation of contract law as an important determinant in this process contending that contract law is essentially neutral and underpinned by the concept of corrective justice while economic regulations are mainly prompted by distributive justice Applying this corrective distributive justice dichotomy to international contracts the author critically assesses major conflict of laws approaches such as proper law the Rome Convention and governmental interest analysis which could disregard either public interest or private rights The author taking these theories into account proposes an alternative two dimensional interest analysis approach He tests the viability of this approach with reference to arbitral awards and court decisions in various jurisdictions and concludes that it uniquely fits into the structure of international commercial arbitration In adopting this approach arbitrators would take into account both corrective and distributive justice and to the extent that corrective justice prevails would be able to avert a total failure of the contract

Noll,2023-04-28 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1985 *Private Regulation and Enforcement in the EU* Madeleine de Cock Buning,Linda Senden,2020-06-25 Globalisation and technological innovation have been fuelling the need for increasing levels of trust in private actors such as companies or special interest groups to regulate and enforce significant aspects of people s daily lives from environmental and social protection to the areas of food safety advertising and financial markets This book investigates the trust vested in private actors from the perspective of European citizens It answers the question of whether private actors live up to citizens expectations or whether more should be done as to the safeguarding of citizens interests Several cross cutting studies explore how private regulation and enforcement are embedded in EU law The book offers an innovative approach to private regulation and enforcement by focusing on the specific EU context which unlike the national and transnational ones has not yet been widely explored This context merits a stand alone analysis because of the unique normative framework of the EU as a particular polity itself but also in relation to its Member States With an overall analysis of the main aspects of private regulation and enforcement across different policy fields of the EU the book adds a missing tile to the mosaic of public private governance studies **Better Regulation Practices across the European Union 2022** OECD,2022-06-28 Laws and regulations affect the daily lives of businesses and citizens It is important that they are designed in a way that takes account of their social environmental and business impacts and ensures they remain relevant in today s fast changing context The second edition of the Better Regulation Practices across the European Union report analyses recent developments and current practices for improving the quality of laws and regulations across all 27 EU Member States and the European Union **Better Regulation in Europe: Ireland 2010** OECD,2010-11-02 This report maps and analyses the core issues which together make up effective regulatory

Better Regulation Stephen Weatherill, 2007-06-28 The discourse of Better Regulation is a hot topic intimately associated with the drive for cost savings and a more efficient economy In the UK and in the EU rule makers have lately endeavoured to achieve a more satisfactory balance between the demands of proper protection from market failure and inequity on the one hand and commercial freedom and the potential for innovation on the other But who is the regulator listening to and what effect does this have on the regulatory pattern governing the integrating EU market What is best practice in the matter of regulatory assessment The essays in this collection explore these and other questions and will foster greater understanding of UK and EU regulation the accountability issues involved and problems of enforcement It is no coincidence that since efforts to construct a Constitution for Europe have stalled the attention of policy makers politicians and the business community has turned instead to the quest for Better Regulation or perhaps it might be said a Better European Union
